

HARDWARE FOR
ALUMINIUM PROFILES

2022

**WINDOW
WARE**

We've got it

Hardware for Aluminium Profile Systems

WIDE CHOICE WITHOUT THE LEGWORK

When it comes to sourcing quality furniture and fittings to kit out aluminium door and window systems, fabricators regularly rely on several suppliers to satisfy their hardware requirements. That can often mean extra paperwork, multiple shipments, increased carriage costs and greater chance of delay for hard-pressed production managers.

Window Ware provides the perfect remedy to hardware sourcing headaches. We stock a comprehensive range of aluminium-compatible products all under one roof so that fabricators can check off their parts list without overcomplicating their supply chain.

This catalogue brings together practically everything a fabricator might need to fit out both aluminium doors and windows, while meeting specification on security, safety and ventilation. So whether you're working on residential applications or commercial contracts, we've got all aspect of aluminium hardware covered!

Window manufacturers can create full-functioning casements with our extensive selection of handles, hinges, espagnolette bars, folding openers and manual or automatic gearing.

Meet even intensive ventilation specifications with off-the-shelf trickle vents or custom-built glazed-in ventilators for windows, and made-to-measure aluminium louvre grilles to suit any installation.

Door fabricators can pick their preferred locking action from our selection of lever operated and slam door locks. **Fulfil security requirements** with 1 star and 3 star

cylinders, multi-point door locks, 2 star slim-backset door handles, plus certified hardware that meets PAS 24, Secured by Design, TS 007 and TS 008 accreditations such as the Yale Postmaster Professional – one of the most secure letterplates on the market. **Provide a fast and easy emergency exit** with our reliable panic bar hardware. **Add the finishing touches to any door** with an impressive array of escutcheons, spyholes, door chains, hooks, knockers, pull handles, numerals and more. **Stick to preferred and trusted manufacturers** with quality, proven hardware from leading brands like Yale, Trojan, Eurospec, Duco, RW Simon, Securistyle, Cotswold Architectural Products, Axim, Omec and more!

To top it all off, you'll find our professional team is a pleasure to work with! With several service awards under our belts and a post-COVID average monthly OTIF that currently hovers around +94%, you can expect a professional, friendly customer experience and timely delivery of your goods.

Let Window Ware take the hassle out of sourcing your aluminium door and window hardware.

Hardware for Aluminium Profiles

Window Hardware 6-60
Door Hardware 61-110

Tools & Consumables

111-127

Supporting fabricators from start to finish

Capacity 36,000 ft² premises

Availability £3 million stockholding

Reliability 94% of orders arrive On Time In Full

Choice 1,000 products from 30 of the industry's leading brands

Superior service as standard

Dependable deliveries

Our post-COVID +94% average OTIF means you get the hardware you want, when and where you need it

Fast response

95% of calls answered in 3 rings or less by real people rather than robots

Dedicated sales support

Giving you consistent, familiar points of contact for a closer supply partnership

Extra effort

Last year, we sourced 1524 non-stocked items because customers asked for them

Always in the loop

Stay informed with email order confirmations, back order notifications & delivery tracking

Quality & choice

5,000+ quality branded products from a single source with an ultra-low 0.12% return rate

7 ways to do business

Place your orders by email, phone, fax or web and pay by BACS, credit card or online

Expertise on tap

From a clued-up crew of industry experts, ex-fitters and fabricators with wisdom to share

Where fabricators and installers go for the industry's leading brands.

How can we help?

Specialist expertise

Our fenestration-trained staff are a knowledgeable bunch. Over 50% have worked for us for 10 years or more, giving you the very best advice, from the very best people.

Nemesis Twin Cam Espagnolette Bar

BS EN 1670:2007

This multi-point window lock from Kenrick fulfils fabricator demand for a high-quality locking system capable of delivering the superior performance and proven reliability fit for increasingly popular high-end aluminium windows. PAS 24:2016 and SBD accredited, the crime preventing credentials of this security window lock are second to none. It's fitter-friendly too, with a fast-fix design and adjustable mushroom cams to +/- 1mm, ensuring even compression and an optimum seal.

Key Features

- Multi-point locking system with a robust offset gearbox suitable for aluminium profiles
- High-security bi-directional twin cam
- U-Rail faceplate which also works within a eurogroove
- Available with 5 or 7mm cam heights
- Made from durable high-grade 304 austenitic stainless steel

Guarantees & Certificates

- Security tested to PAS 24: 2016 & Secured by Design certified
- Tested to 100,000 cycles with 10-year mechanical guarantee
- Corrosion resistant to BS EN 1670: 2007 Grade 4 240 hours salt spray

BS EN 13126-5:2011

1971N

Window Restrictors

- Suitable for use on wood, aluminium, PVCu and steel window frames
- Cable length: 200mm
- Allows maximum 89mm opening to comply with child safety function of BS EN 13126-5:2011
- Independently tested to withstand a breaking force of 1971N
- (RST90000) CLS1 and (RST91000) CLS3 combi restrictors are both secured with a standard key mechanism
- (RST92000) CLB1 restrictor has a captive key disc lock mechanism, so the key won't get lost when open
- The sash fixing point for the CLS3 combi Cubelock fits behind the window handle and the locking mechanism fits directly below on the frame
- Includes tamper-proof screws to reduce the likelihood of abuse

Concealed Restrictors

- Spring-loaded releasable arm
- Manufactured from stainless steel
- Complies to BS 6375 : Part 2 : 1987
- Ideal for retrofitting
- Different restrictor stud heights available for different profile stack heights

NB: studs are ordered separately.
See below for details

Yale Quartus Espagnolette Handle

- Key lockable window handle for added security and safety
- Push to unlatch
- Available in inline or cranked/offset designs
- Supplied with 1 x Yale-branded key, screws, colour-matched screw cover caps, cylinder plug matched to the button and a green plug to denote a egress fire escape window
- Spare keys and screw cover caps available on request
- Cylinder plugs convert handles to a non-locking solution
- Available in a choice of popular solid colours and metallic finishes
- Fixed spindle as standard
- Available from stock in 10, 15, 30 & 40mm spindle lengths, please call for part codes or visit www.windowware.co.uk
- Made from Zinc alloy and Aluminium Alloy
- Designed to suite with existing Yale and Trojan hardware ranges

Warranties and accreditation:

- 10-year mechanical guarantee
- 10-year surface finish guarantee
- Corrosion tested to BS EN 1670:2007 Grade 4 240hrs salt spray
- Performance tested to BS 6375 Part 2 (Classification EN 12400) Class - 20,000 cycles

Caldwell folding openers provide a safe, hard-wearing, simple-to-use and cost-effective way to achieve restricted opening on casement windows in public or commercial buildings like schools, hotels, hospitals and offices. They are gravity dependant and therefore best suited to top hung windows, although they may also be fitted to fully reversible and pivot windows. The wide range of fixing brackets available on folding openers mean they are suitable for use on aluminium, PVCu, timber, steel and composite windows.

When it comes to building a best-fit folding opener system, product selection depends, in the first instance, upon the position of the window i.e. is pole operation required? This dictates the type of folding opener used. The next key consideration is the

step size and screw centre. These measurements vary according to the casement profile and are critical to achieving a robust, full-functioning system.

Key Features:

- Configurations to suit virtually any profile
- Standard folding openers give a sash movement of 150mm, shorter openers are available on request
- Resilient anodised satin silver finish
- Quality manufactured to **BS EN ISO 9001: 2008**
- Corrosion resistant to **BS 7412: 2007**
- Open/close cycle tested in excess of 100,000 cycles

Hand operated system shown

Pole operated systems

Wherever windows are high up or hard-to-reach due to obstructions, pole-operated folding openers provide a more durable and economical manual way to control windows remotely compared to electronic systems. The recommended high-level configuration usually comprises of 110/111 series or 'pork chop' folding openers, a pre-drilled tandem bar and a 263 tandem eye which can be operated easily and effectively by a boss pole.

110 Type High-level Folding Opener

Hand operated systems

On low-level or easily accessible windows that can be safely operated by hand, the type 112 opener is the recommended choice. These openers can be linked by an undrilled tandem bar as there is no need for a tandem eye.

112 Type Low-level Folding Opener

Flush & Stepped DuoFlex Folding Openers

Flush DuoFlex folding openers

With flexible, fully-adjustable, packer-free fitting, this DuoFlex window opener can ably achieve safe, secure restricted opening on a range of open-out, flush-style window frames made from timber, aluminium or steel. Cycle tested to beyond 100,000 operations and constructed from strong, corrosion-resistant aluminium, these openers promise enduring, trouble-free service and superior pristine aesthetics.

- Fits most timber, aluminium or steel window frames
- Suitable for open-out top hung and centre pivot sashes
- Attractive and stylish design
- Fitter-friendly and easy to adjust to suit 0-10mm sash step sizes

- No need for packers
- Distance between fixing centres: 29mm
- Minimum sash height: 250mm on windows with butt hinges. 400mm where friction hinges are used.
- 150mm throw when opening and closing sash
- Over centre design gives a secure lock when the window is closed
- Cycle tested to over 100,000 operations
- Available in silver grey and white finish. Other RAL colours available on request
- Made in UK
- Materials: Aluminium alloy with plastic washers or bushes fitted to all moving joints

Tip: We advise that you use a single opener on sash width up to 500mm, two openers plus link bar on sash widths 600 to 900mm and three openers plus link bar for sash widths 900mm to 1500mm.

Pole operated system shown

Stepped DuoFlex folding openers

These great-looking, curvy folding openers achieve the perfect balance of form and functionality! Modern aesthetics combine with flexible design features to produce an adaptable folding opener system that gives secure restricted opening and can easily accommodate a range of step sizes from 0-26mm with simple adjustment and no need for packers. That makes DuoFlex stepped openers ideally suited to most types of top-hung or centre-pivot outward opening PVC-u windows.

- Suitable for use on PVCu window frames
- Contemporary, sleek styling
- Easy-fitting and completely adjustable without packers to accommodate 0-26mm step sizes

- Distance between fixing centres: 48mm
- Minimum sash height: 250mm on windows with butt hinges. 400mm where friction hinges are used.
- Gives 150mm throw when opening and closing sash
- Over centre design gives secure locking when the window is closed
- Cycle tested to over 100,000 operations
- Available in silver grey and white finish. Other RAL colours available on request
- Made in UK
- Materials: Aluminium alloy with plastic washers or bushes fitted to all moving joints

Tip: We recommend you use a single opener on sash width up to 500mm, two openers plus link bar on sash widths 600 to 900mm and three openers plus link bar for sash widths 900 to 1500mm.

Ready to help you maximise your aluminium advantage

Discover why Window Ware is the right hardware supplier to set you up for success with your aluminium windows.

If you're a fabricator ready to branch out into manufacturing aluminium doors and windows for the first time, you're going to need a hardware supplier with the product range, technical know-how and a proven track record to help get you started and turn your growth plans into reality. That's where Window Ware comes in!

We've got plenty of experience of supplying specialist aluminium applications to share and set you up for success. In fact, we've been channelling extra resources into supporting this flourishing market for years now and it's all there ready for your taking!

Since 2018, we've added loads of new products to our portfolio, grown our team with dedicated sales support, become a member of the Council for Aluminium in Building (CAB).

As a result, more and more aluminium fabricators are choosing Window Ware as their preferred hardware supplier. In fact, in the space of just 5 years (2016-2020), our aluminium sales have grown by 90%. More recently, between June and July 2021, we supported 12 aluminium start-ups with essential profile-specific hardware and pre-production support.

In addition, our strong relationships with our industry partners put us right at the centre of the launch of new aluminium system, Garnalex Sheerline Prestige. Working with Garnalex and our brand partner, Yale, we supplied the hardware to support those early testers and ensure successful first adoption. This ground-up involvement gives us a unique and comprehensive understanding of the right hardware to kick-start your own Garnalex fabrication set-ups.

12 Aluminium start-ups

Here's what one Garnalex fabricator had to say:

James Cardno, MD of Direct Roofing Systems Ltd explains, "Garnalex recommended several hardware suppliers, but the decision to go with Window Ware was a no-brainer for us!"

"We already source a range of hardware with them, such as trickle vents, window locks and handles, so we've worked with their Area Sales Manager, Dan Gilson, a lot in the past and he always goes out of his way to look after us.

What's more, by sticking with Window Ware, we can keep our supply chain simple and make ordering easier, as well as benefit from lower volume pricing on larger orders."

Options Glazing Ltd started manufacturing aluminium windows last February.

Director, Nick Loades remarks...

"We needed a one-stop shop for trickle vents, window handles, locks – the lot! If I'm going to spend time raising a purchase order, it makes sense to try to order everything all in one go. Window Ware offers the convenience and the comprehensive product range I was looking for, so I can quickly and easily source everything I need to run my business."

"For me, it's the relationship with our Area Sales Manager that really makes it, and Dan Gilson has got it bang on the button! The whole industry is experiencing supply issues at the moment, but the fact that Dan goes above and beyond to communicate any delays or shortages to us really helps us manage our customers' expectations and adjust our offering accordingly. For example, if we know the grey handle isn't available, our sales guys can focus on selling the white or black handles instead. That transparency is key to keeping our customers happy."

HIGHLINE MANUAL WINDOW CONTROLS

Technical Data

Minimum window height for full 250mm travel of T100 - 500mm

Chain openers fitted on windows less than recommended height must have opening restricted to 30% of the vent height using the T700 spring stop or T720 brass stop to shorten the cable run.

For safety reasons we recommend fitting side support stays to all bottom hung, open-in windows. For bottom hung applications you must fit the THL8200/0/1/5 fixing kit (see page 38) (sold separately).

Maximum Control Run

OPERATOR	MAXIMUM CONTROL RUN
T200	30 metres
T250	18 metres
T300	18 metres

Spent Travel Conduit

To allow for the forward/backward movement of the inner cable, a length of "spent travel" conduit must be fitted at either end of the control path i.e. past the last chain/screw jack and below the operator (except the T250 midi operator (see page 38) which has an integral "spent travel" tube).

TYPE OF OPERATOR	SPENT TRAVEL CONDUIT
SJ138600 Screw Jack	2.5m (for full 380mm travel)
T100 Chain Opener	0.3m

Call sales on **01234 242724** to request your printed copy of our Highline Brochure & Order Form, or to download PDF versions, just scan the code

Number Of Openers Per Vent

Type Of Operation

LOAD = No. of chain openers + No. of bends in conduit

The above figures are based on a single bend in the conduit path. For each additional bend deduct 1 metre from the Vented Length total.

The figures used in these charts are based on windows with 4mm double glazed units fitted to butt hinges or free pivots, not friction stays. Please refer to our sales or technical department for advice if friction stays are fitted.

HIGHLINE MANUAL WINDOW CONTROLS

HIGHLINE® T100 Chain Openers

This compact window opener is one of the most popular choices in the range. It's neat, discreet and can be fitted to most top, bottom, and side hung windows to give a generous 250mm opening stroke for excellent natural ventilation.

- 250mm travel length (also available in 380mm)
- Made to last from substantial zinc castings and aluminium extrusion
- Can be fitted on its own or linked with multiple T100 openers and controlled from a single T250, T200 or T300 mini operator
- Fixing plates and bracket fixing kits available to suit most window profiles
- Available in white, grey and black

TIP: As a rule, frames wider than 1200mm should be fitted with a pair of chain openers.

HIGHLINE® T175 Locking Manual Openers Bottom Hung Open-In

This opener is ideally suited to bottom-hung windows fitted with butt hinges or 'Hopper' style casements that open inwards. It's small enough to fit snugly where space is limited between the reveal and moving frame. Because the moving sash is opened by the strength of the cable alone without the support of any conduit, this opener is better suited to small vents only.

- Works with the helical steel cable (THL41000)
- Used with the T250 or T300 operator on bottom hung windows
- Maximum opening stroke 250mm
- Supplied with mounting brackets
- Available in white, grey and black

TIP: Operate multiple vents by linking locking openers using a rotary junction box.

Roof Vent Horizontal Pivot

SJ138600 Screw Jack Opener

This strong and rigid screw jack actuator gives great opening power, perfectly suited to single or multi-operation of banks of medium-sized (>500mm) and heavier casements. It's particularly useful for controlling the opening pitch of roof lights, as well as operating top-hung windows and horizontal pivoting windows. One thing to bear in mind is that, depending on the application, there can be a lot of spent travel to accommodate (see page 36). This will need taking into consideration with the positioning of the system.

- Sill-mounted screw jack used with T200 maxi handle
- High-powered opener strong enough for use on heavy casements
- Maximum opening stroke: 380mm
- Available in white

Compatible With

Maxi Handle Operator
See Page 40

T250 Manual Midi Operator with Handle

This midi window winder is a popular choice to operate manual window opening systems. Any spent travel (see page 36) is neatly and safely enclosed inside the casing, well away from prying fingers, making it ideal for use in schools and hospitals.

- Can only be used with the T100 and T175 manual openers due to restrictions on the amount of spent travel the casing can accommodate. This allows for a maximum opening of 250mm
- Includes T275 handle, T410 spent travel tube and T720 brass stop
- Remember to allow room for the handle to rotate through 360° (diameter of at least 220mm)
- Use the brass stop included to set the opening size anywhere from 0-250mm
- Available in white, grey and black

Compatible With

Chain Opener

HIGHLINE MANUAL WINDOW CONTROLS

HIGHLINE® T200 Maxi Operators inc. Handles

If you need to control multiple windows or vents with linked cable runs from a single window winder, or you need to work heavier casements, then this capable, robust manual operator is your best choice thanks to its powerful gearing and heavy-duty construction.

- Capable of operating multiple windows
- Heavy-duty metal case
- Compatible with the T100 chain opener and T175 locking manual opener
- Includes T275 handle and fixings
- Remember to allow room for the handle 150 to rotate through 360° (diameter of at least 220mm)
- Available in white, grey and black

TIP: Ideal for operating multiple windows in schools if the conduit is covered.

HIGHLINE® T300 Mini Operators inc. Handles

This compact metal-cased operator is capable of controlling single or several light windows. It's one of our most affordable options, although the spent cable is exposed, and this might be a consideration if the system is going to be installed in a school or public building.

- Compatible with the T100 chain opener and T175 locking manual opener
- Includes T275 handle and fixings
- Remember to allow room for the handle to rotate through 360° (diameter of at least 220mm)
- Available in white, grey and black

Product Information

The Highline electric window controls range offers reliable, flexible and cost-effective systems to automate the opening of vents and high-level windows for natural ventilation. Natural ventilation improves the air quality of inside spaces by allowing clean, fresh air to enter the building while letting stale air out.

Our range of motorised single chain actuators are controllable from either a simple switch or a digital control panel with temperature, wind or rain activation. The 230V AC actuators featured in this brochure all run off standard mains electricity and are available from stock. 24V models for use in bathrooms and kitchens are also available by special order only.

Highlights of the range include the ever-popular ACK4 chain actuator (sometimes referred to as the MAC) with its 7 opening positions ranging between 100mm to 400mm and fitting brackets for most applications. Then there's the newer Micro EVO Actuator. Versatile enough to adapt to any application, it incorporates a synchronisation feature which lets you easily link several actuators together on the same window – perfect for operating wider casements.

We also have access to lots of other actuators and controls not shown in this brochure, so if you need something you can't see here, why not give our technical team a call on 01234 242724 to discuss your specific requirements.

Call sales on **01234 242724** to request your printed copy of our Highline Brochure & Order Form, or to download PDF versions, just scan the code

ACK4 Chain Actuators 300N

If you want complete control over how far your vents open, then the ACK4 electric chain actuator gives no less than 7 different stroke positions from 100mm up to 400mm, so you can achieve your desired level of ventilation. With a strong die-cast aluminium casing, a robust double-link stainless steel chain and a maximum thrust force of 300N, the ACK4 actuator is a hard-working, reliable choice for your window control system.

- Suitable for use on most windows and lightweight roof vents and domes
- Adjustable opening stroke with 7 positions from 100-400mm
- Strong die-cast aluminium casing
- Robust double-link stainless steel chain
- High protection class IP 55 rated
- All electrical parts are double insulated
- Audible alarm sounds when installed incorrectly
- Supplied with 1.5m cable
- Brackets and fixings available to most applications (all sold separately)
- Available in white

HIGHLINE ELECTRICAL WINDOW CONTROLS

HIGHLINE® C30 Chain Actuators WINDOW CONTROLS 330N

This single-chain actuator comes as standard with a selection of different brackets making it suitable for mounting onto top and bottom hung windows. It delivers a maximum push/pull thrust force of 300N which is sufficient to operate most windows, lightweight roof vents and domes. The opening stroke can quickly and easily be adjusted at 200mm or 380mm simply by turning a knob on the outside of the casing.

- Single chain actuator with 2 travel positions (200mm or 380mm)
- Strong composite casing
- All electrical parts are double insulated
- High protection class IP 30 rated
- Features a robust centrally positioned double-link stainless steel chain with a buzzer alarm that sounds in the event of incorrect installation
- Supplied with 1.5m cable
- Comes complete with C30/SB standard bracket and C30/BHB bottom hung bracket
- Available in white

Micro EVO Actuator 230v

If you need high-level electric window controls for a wide casement, then the Micro EVO actuator is just the job. Its integrated synchronisation function means you can easily link up as many as 4 actuators to work together on single window on site and straight out of the box - no need for a separate sync module.

- 4 selectable opening strokes (100-400mm)
- Suitable for most window types and roof vents
- Soft-stop closing for reduced wear on the window frame and actuator
- All electrical parts are double-insulated - Class II AC version – Class III DC version.
- Aluminium casing
- High protection class IP 32 rated
- Double-link chain with anti-corrosion treatment
- Can be easily synced on site to work as a group of up to 4 actuators on wider casements
- Supplied with standard and bottom hung quick-release fixing brackets

HIGHLINE® Control Unit For Natural Ventilation Window Controls

WINDOW CONTROLS

This compact window control unit is a great way to automatically achieve natural ventilation and ensure a more comfortable environment in stuffy rooms or stifling conservatories. With the digital display, it's quick and easy to program the system to automatically open and close windows or roof vents to achieve a specific room temperature, as well as ensure windows are shut and watertight whenever it rains.

- Control unit for 230V AC Window actuators (max output 8 Amp)
- Automatically opens windows if room gets too hot and closes them according to temperature or when it rains.
- Rain sensor and temperature sensor included
- Digital display for simple programming of the desired room temperature
- High protection class IP 4X rated
- Open and close buttons on front of control panel for direct control

Airstrip 19000
‘Glazed-in’ Ventilator

RW Simon Ltd leads the way with this top-performing Airstrip 19000 ventilator, which offers built-in updraught facility and variable operating modes that deliver increased airflow capable of meeting Document F 2010 of building regulations. The Airstrip 19000 is installed between the head of the window profile and held in place by the glazing system. This product is also available as a gas vent, delivering a continuous supply of fresh air in line with Gas Board recommendations. Every ventilator is made to measure to suit your specific application. Please use our custom order form to ensure we have all the relevant information needed to provide you with an accurate quote.

Highlights:

- External hood as standard
- Thermally broken / thermally insulated
- Fitted with storm seal in internal flap. Storm locks available if required
- Flap control offers two opening positions between fully open and fully shut
- Permanent trickle (gas), knob, rod and cord operation available
- Suitable for double glazing thicknesses 20, 24, 28 and 32mm
- Glass height reduction 64mm
- Four standard colour options: Black (RAL9005 matt), White (RAL9910 Hipca satin), Dark Brown Mahogany (RAL8019 matt) & Grey (RAL7016 matt)
- Special colours and dual colours also available

Performance:

- Tested to BS EN 13141-1:2004 achieves 12,931mm² equivalent area
- 5000mm² EA achieved on a length of just 386mm
- 2500mm² EA achieved on a length of just 193mm
- BS 5440-2:2000 compliant
- Water tightness limit of 600pa
- Acoustically tested to BS EN 20140-10:1992, ISO 140-10:1991

Components:

Two aluminium bodies assembled with thermal break, flap with knob controls at both ends (cord/rod control as optional), pair of end caps, 4 x screws, standard fly screen or gas fly screen, glass and ventilator gasket.

Airstrip 400
‘Glazed-in’ Ventilator

Not only is the Airstrip 400 easy to assemble and simple to install, it's also versatile and achieves superior thermal performance. That's all down to its unique twin shutter system, external hood and thermally broken all-aluminium design, which lets fabricators mix and match the internal/external faces to achieve exactly the look they're after. The Airstrip 400 is installed between the head of the window profile and held in position by the glazing unit. Every ventilator is custom made to suit your requirements. Please use our special order form to ensure we have all the relevant information needed to provide you with an accurate quote.

Highlights:

- Includes external hood
- Thermally broken / thermally insulated design
- Optional internal updraught deflector
- Twin open and close shutters
- Knob and cord operation available
- Trickle ventilation as standard
- Suitable for double glazing thicknesses 20, 24 and 28mm
- Glass height reduction 45mm
- Four standard colour options: Black (RAL9005 matt), White (RAL9910 Hipca satin), Dark Brown Mahogany (RAL8019 matt) & Grey (RAL7016 matt)
- Special RAL colours and dual colours also available

Performance:

- Tested to BS EN 13141-1:2004 achieves 4,103mm² equivalent area
- 5000mm² EA achieved on a length of 1,218mm
- 2500mm² EA achieved on a length of 609mm
- BS 5440-2:2000 compliant
- Water tightness limit of 400pa
- Acoustically tested to BS EN 20140-10:1992, ISO 140-10:1991
- Weather performance tested to BS EN 1026:2016 & BS EN 1027:2016

Components:

Supplied assembled. Aluminium body with thermal break and 2 PVCu shutter strips. External hood and fixing screws. Optional internal updraught deflector and fixing screws. Knob or cord control mechanism. Pair of 16, 20 or 24mm end caps. Trickle ventilation baffle plate. 4 x screws. Fly screen and glazing gasket.

To order either the Airstrip 400 or 19000, please contact our sales team on 01234 242724

DUCO Grille Solid F30Z Ventilation & Sun Control Glazed-in Window Louvre

Q Quality
BS EN ISO 9001

10 Year Finish
Guarantee

 Vandal-proof

 130HP Excellent
Water Resistance

These high-quality aluminium window louvres are custom-made to your exact specifications to fit aluminium, timber & PVCu window frames of any size or finish. DucoGrilles provide intensive ventilation ideally suited to all kinds of industrial and commercial buildings. They let in plenty of fresh air to create a healthy, comfortable environment without compromising security. The unique stackable 'Z' shaped blades in the DucoGrille Solid deliver excellent burglar-resistant, weather-proof strength and durability.

- Available in 24mm or 28mm glazing thickness
- P1 Integrated fly screen as standard. P2 Stainless steel bird mesh or NP non-punched mesh (100% screening louvre) also available
- P2 Bird blade with additional 6mm galvanised mesh meets current gas regulations
- Free area: 34% (with fly screen) or 48% (with bird mesh)
- Blades and frame manufactured from extruded aluminium for strength and precision
- Unique clip-free design ensures blades are held fast by the outer frame and won't rattle in exposed areas or extreme conditions
- Independently tested by the BSRIA for water tightness
- Certified for burglar resistance to European Classification Class 2
- Quality manufactured to BS EN ISO 9001
- RAL polyester powder coated 60-80 microns with a 10-year finish guarantee
- Recessed (with or without flange) and surface mounted wall louvres also available

Q 10

Quality BS EN ISO 9001 Year Finish Guarantee

**Grille Classic 45HP
Glazed-in
Window Louvre**

This high-performance aluminium grille has Z-shaped louvre blades which not only look smart but deliver excellent airflow too. As a result, the DucoGrille Classic 45HP is particularly well suited to projects that require intensive ventilation and refined aesthetics. All louvre variants are custom made to order using extruded aluminium for strength and durability. A fine nylon insect mesh is fitted as standard, with other vermin control options available. The DucoGrille Classic F45 HP window louvres suit PVCu, timber and aluminium casements

- Available in 24mm or 28mm glazing thickness
- Nylon insect mesh fitted as standard
- Stainless steel 6 x 6mm vermin mesh and 20 x 20mm bird mesh also available
- Physical free area: 60%
- Blades and frame manufactured from extruded aluminium for strength and precision
- Quality manufactured to BS EN ISO 9001
- A choice of finishes available all with a 10-year surface guarantee:
 - Standard aluminium anodised coated 15-20 microns
 - Polyester powder coated 60-80 microns
 - RAL colours and texture available on demand
- Choose from glazed-in window louvres and recessed wall louvres (with or without flange)

DUCO Grille Classic 50HP Ventilation & Sun Control **Glazed-in Window Louvre**

Q 10

Quality
BS EN ISO 9001

Year Finish
Guarantee

The DucoGrille Classic 50HP has been specially developed for intensive ventilation. The uniquely shaped 'High Performance' 50HP louvre blades on this aluminium architectural louvre have a low resistance factor which allows plenty of air to flow in and out of spaces. That makes the DucoGrille Classic 50HP a perfect choice for intensive ventilation requirements such as commercial air conditioning and heating applications. All louvres are custom manufactured to suit your exact size, performance and finish specifications, with options to suit PVCu, timber and aluminium windows, as well as recessed wall installations.

- Nylon insect mesh fitted as standard
- Stainless steel 6 x 6mm vermin mesh and 20 x 20mm bird mesh also available
- Physical free area: 68%
- Blades and frame manufactured from extruded aluminium for strength and precision
- Quality manufactured to BS EN ISO 9001
- A choice of finishes available all with a 10-year surface guarantee:
 - Standard aluminium anodised coated 15-20 microns
 - Polyester powder coated 60-80 microns
 - RAL colours and texture available on demand
- Choose from glazed-in window louvres and recessed wall louvres (with or without flange)

A louvre solution for every project

Our louvre panels can be custom-built to suit virtually any screening or ventilation project. They're guaranteed to look the part, meet specification and comply with building regulations in a whole range of industrial, commercial and residential applications from exterior screening, solar shading and weather protection, to ventilation for flats and offices, as well as plant and generator rooms.

Louvres can be made to order in almost any size or shape (such as round or square grilles, full louvre doors, plenum boxes or roof turrets) and in a choice of finishes and textures to suit the architect's or builder's requirements exactly. An extensive choice of optional accessories such as sound-absorbing acoustic blades, insect and vermin mesh, blanking and insulation panels offers ultimate customisability.

Please call our sales team on 01234 242724 to discuss your particular needs.

PANIC BARS

PR-7200 Series Full Width Release Panic Bar Exit Device

The Axim PR-7200 is a full width, soft touch non-handed panic exit device with a concealed vertical rod which secures the top and bottom of the door. To open the door, the rods are retracted with a turn of a cylinder key or when the touch bar is locked down with an Allen key (dogged).

- The internal mechanism is manufactured from stainless and plated steel
- 8.5mm diameter steel operating rods provide a 16mm bolt throw
- Optional external key access also available
- The push bar is extruded aluminium in an anodised finish with coloured alloy end caps to match
- All mounting screws are concealed
- Available in 3 standard widths (36", 42" & 48") which can be cut to size
- BS EN 1125 compliant
- 30 months manufacturer's guarantee

SIZE	SILVER	BOX QTY.

**Axim PR-7085
Concealed Rod
Panic Bar Exit Device**

The Axim PR Series is a range of concealed vertical rod crash bar panic exit devices which are compliant to BS EN 1125 to give even unfamiliar users a quick and straightforward way to escape a building.

- BS EN 1125 compliant
- Cross bar is made from extruded aluminium in a silver satin finish
- All housings and lever arms are finished in an abrasive resistant finish to complement the crossbar anodising
- Heavy duty lever springs deliver durable operation of the lever arms
- Standard model suitable for narrow and wide stile doors up to 2135mm high and 1155mm wide
- All fixings are concealed to ensure streamlined looks
- Projection from the door: 120x186mm
- Permanent latch retention by either cylinder key from the outside or concealed pins under the levers
- Non-handed and left- or right-hand paddle handle option
- 30 months manufacturer's guarantee

Anti-panic Modular Hardware

- CE approved panic hardware system conforming to EN 1125
- Precision engineered to open with minimum pressure
- Entirely surface mounted to maintain the integrity of door and frame
- Suits doors up to 2700mm high and 1100mm wide
- Available from stock in white or silver
- Full mounting instructions come with every kit
- Outside access available. Note this non key-retaining access handle allows removal of the key once unlocked. Access remains unlocked until the key is used to re-lock the outside access handle.

NB. To ensure compliance with current fire and building regulations we recommend consultation with local fire officers and building control inspectors prior to finalising specifications. All panic bars now sold in Europe must conform to the latest CE Regulations. Each panic bar kit comes complete with certificate of approval.

Lockmaster 28 Bi-fold Long Lock with 24mm U-channel for AluK profile

Yale's hugely popular multipoint locking system now comes in a slim 28mm backset gearbox specifically designed to secure aluminium bi-fold doors. This 24mm u-channel variant suits the AluK profile to give fabricators and installers a high-security, top-quality, user-friendly bi-fold locking solution that's backed by one of the best-known brands in the business for added confidence and peace of mind. For bi-fold door hardware components see pages 91-97.

Key features

- 24mm Yale-branded u-channel variant to suit the AluK profile
- Lockmaster renowned twin hook and anti-lift bolts for enhanced security, strength & usability.
- Deadbolt centre with an easily reversible latch to minimise stock holding
- 28mm backset with PZ92mm centre case
- Suitable for use on traffic doors to provide easy and convenient access without having to open the whole bi-fold door
- Passive mechanism for French doors also available
- 2 lock lengths for flexibility to fit a range of door heights
Long (this version) - top hook and anti-lift bolt is 1790mm from the bottom of the lock. Standard (page 68) is 1644mm
- Quality manufactured in Britain
- Box quantity – 5 locks

Guarantee & certifications:

- Secure - PAS 24: 2016 compliant
- Long service - Tested to 100,000 cycles with a 10-year mechanical guarantee
- Trusted - Yale Lifetime Security Guarantee
- Durable – Anti-corrosion performance tested to BS EN 1670:2007 Grade 4 with a 10-year surface finish guarantee

Material Specifications

- Lock Case: Galvanised Mild Steel
- Faceplate : Mild Steel, BZP and Clear Trivalent
- U-channel: Mild Steel CS4 – ST2473
- Deadbolt and Latchbolt: Zinc Alloy Casting
- Keeps : Mild Steel, BZP and Clear Trivalent

Lockmaster 28 Bi-fold Standard Lock with 24mm U-channel for AluK profile

Yale's hugely popular multipoint locking system now comes in a slim 28mm backset gearbox specifically designed to secure aluminium bi-fold doors. This 24mm u-channel variant suits the AluK profile to give fabricators and installers a high-security, top-quality, user-friendly bi-fold locking solution that's backed by one of the best-known brands in the business for added confidence and peace of mind. For bi-fold door hardware components see pages 91-97.

Key features

- 24mm Yale-branded u-channel variant to suit the AluK profile
- Lockmaster renowned twin hook and anti-lift bolts for enhanced security, strength & usability.
- Deadbolt centre with an easily reversible latch to minimise stock holding
- 28mm backset with PZ92mm centre case
- Passive mechanism for French doors also available
- 2 lock lengths for flexibility to fit a range of door heights Standard (this version) - top hook and anti-lift bolt is 1644mm from the bottom of the lock. Long (page 67) is 1790mm
- Quality manufactured in Britain
- Box quantity – 5 locks

Guarantee & certifications:

Lockmaster Bi-fold - Standard Version	Latch & Deadbolt	92mm	28mm	Single	2	1	2	YBF00428

Lockmaster Bi-fold Short Lock with 16mm Faceplate for Smarts & Exlabesa profiles

Yale's top-selling multipoint door lock now comes in a 28mm backset gearbox to fit modern narrow door sets and the slim sightline profiles of today's increasingly popular aluminium bi-fold doors. This 16mm euro groove version works with Smarts and Exlabesa profiles, to deliver industry-leading security, British quality, proven usability and long service life. For fabricators that already know and prefer the Lockmaster brand, this latest offering lets them suite across their entire door range. For bi-fold door hardware components see pages 91-97.

Key features

- Standard Yale-branded 16mm faceplate to suit Smarts and Exlabesa profiles
- Lockmaster renowned twin hook and anti-lift bolts for enhanced security, strength & usability.
- Deadbolt centre with an easily reversible latch to minimise stock holding
- Pre-compression roller engagements cams achieve excellent weather-proofing
- 28mm backset with PZ92mm centre case
- Suitable for use on traffic doors to provide easy and convenient access without having to open the whole bi-fold door
- Passive mechanism for French doors also available
- Quality manufactured in Britain
- Box quantity – 5 locks

Guarantee & certifications:

- Secure - PAS 24: 2016 compliant
- Long service - Tested to 100,000 cycles with a 10-year mechanical guarantee

Yale TS 007 3 Star Platinum Kitemarked Profile Cylinder

The Yale Platinum 3 star euro profile cylinder has been independently tested by The British Standards Institution and awarded the BSI Kitemark TS 007:2014 3 star accreditation. That makes this cylinder the perfect choice for professionals in need of a proven, high-security solution capable of providing maximum defence against common methods of cylinder attack.

- Anti-snap, sacrificial front section
- Anti-pick, anti-bump, anti-screw, anti-pull and anti-drill
- Superior strength with cylinder stability system for superior protection
- Horizontal keyway
- Flat reversible dimple key with new stylish nylon key bow
- Key card for easy code identification and key duplication
- Available in standard key/key, thumb turn and keyed-alike in pairs. Brass and Nickel finishes
- TS 007 2014 3 star approved
- BS EN 1303:2005 approved
- KM 559658

Anti-Snap
A small section of the cylinder is sacrificed under attack, leaving the remainder of the cylinder intact and your door safely locked.

Anti-Bump
Specialised side pins provide bump resistance.

Anti-Pick
Unique multi shear-line technology designed to resist lock picking and bumping.

Horizontal Keyway
With reversible flat key for easy key entry.

Inner Strength
The dedicated central bridge delivers unparalleled inner strength to the cylinder providing protection even if the cylinder is attacked from the outside.

Anti-Drill
Hardened steel protection incorporated within the cylinder provides undeniable resistance against drill attacks.

Certified
Approved to TS 007:2014 3 star - the highest current certified level. BSI accredited to KM 559658 Tested to BS EN 1303:2005

Yale TS 007 3 Star Platinum Kitemarked Profile Cylinder

TS 007:2014

TS 007 is a standard developed in response to concerns over cylinder attacks. The standard is characterised by a 3 star rating system and can be achieved by combining a 1 star cylinder with 2 star security door furniture or by using a standalone 3 star cylinder. The Platinum series cylinder is approved to TS 007 3 stars and does not require any additional security furniture.

Maintenance and care of your Yale cylinder

Yale recommend regular lubrication of your Yale cylinder locks to ensure continuous trouble-free performance and operation.

For this we recommend using a PTFE-based lubricant. A small amount of lubricant should be applied to the key and then inserted into the cylinder. Rotate the key a couple of times in line with the normal locking function. Remove the key from the cylinder and wipe away any remaining lubricant to ensure it isn't transferred onto other objects.

TS 007 1 STAR PROFILE CYLINDERS

Yale KM Superior 1 Star Kitemarked Key/Key Profile Cylinder

The Yale KM Superior Euro Profile cylinder has been developed to provide resistance against common cylinder attack methods. The KM Superior offers British Kitemarked TS 007:2014 1 star security and has been tested to the British Standard BS EN 1303:2005. Suitable as a replacement product on PVCu, wood and composite doors this cylinder is Secured by Design approved and recommended for use on doors that require a high level of security and attack protection.

TS 008	TS 008 is a rating for the letter plate, or flap, covering the door aperture for receipt of postal items, together with a letter box on the inside of doors, walls or panels. This is a security requirement of PAS24 & document Q which deals with fishing through a letterplate.		

Trojan Unicorn 12'' Range Letterplate

- A unique and elegant design
- Letter flaps and torsion springs are made from stainless steel for ultimate corrosion resistance
- Flaps open to 180 degrees, eliminating any excess leverage on pivot points
- External flap has a complete peripheral seal that also forms a full thermal and acoustic barrier
- Cycle tested to 100,000 operations
- Available in a choice of finishes with or without colour coded end caps
- Detachable lugs enabling face fix on panel
- Telescopic sleeves for panel fitting 20 - 40mm and midrail fitting 40 - 80mm which suits doors up to 70mm thick
- Overall letterplate size 300 x 70mm

Yale Postmaster Professional TS 008 Letterplate

The patented Postmaster Professional TS 008 Letterplate is designed to meet the exacting requirements of TS 008. It's suitable for doorsets that need to be Document Q or PAS 24: 2016 compliant. Manufactured from 304 Stainless Steel for ultimate corrosion resistance, its simple but elegant styling will complement any doorface.

- TS 008 accredited
- Conforms to PAS 24: 2016 and approved Document Q
- Suitable for both composite doors and PVCu doors (range from 40mm to 75mm thickness)
- Inner protective housing has unique concealed hinge mechanism to prevent attack
- Inner flap has a positive stop feature for maximum protection from 'fishing'
- Will fit any door to meet TS 008 accreditation without the need to retest
- Available in white, PVD gold, chrome and satin stainless steel external finishes from stock. Other finishes available to order including brushed stainless steel and black.
- The internal letterplate can be colour coded to match the door colour
- Guarantee 25 years anti-corrosion available on all Stainless Steel product finishes
- Guarantee 10 years mechanical
- Overall letterplate size:

External: 300.5 x 96mm

Internal: 300.5 x 98.4 x 52mm

Yale Postmaster
Professional TS 008
Letterplate

Product materials:

- External flap is manufactured from 304 stainless steel for ultimate corrosion resistance (galvanised mild steel for painted finishes)
- Internal flap manufactured from die-cast zinc

Testing:

- Corrosion tested to BS EN 1670 Grade 5
- Cycle test – opening and closing action tested to 20,000 cycles
- PAS 24: 2016 compliant and approved Document Q
- TS 008:2015 compliance

Adjustments:

- For composite doors 0793-2001 (4 Screws m4 x 30mm csk pozi zn)
- For PVCu doors 0793-2002 (4 Screws m4 x 60mm csk pozi zn)

Bi-fold Door Top Guide Assembly

This top guide assembly from Glide Hardware is used above the roller at the top of bi-fold door installations wherever two hinged door leaves sit in the running track. It works with the bi-fold roller to ably support moving door panels top and bottom and keep the whole system consistently tracking and operating smoothly.

- Security tested to PAS 24
- Quality manufactured to BS EN ISO 9001:2015
- All rollers, clamp plates and fittings supplied
- Suitable for door panels up to 100kg and 1200mm wide
- Chrome-plated brass wheels & high-quality bearings achieve smooth sliding function
- Main body manufactured from corrosion-resistant die-cast ZP5 Zinc alloy
- Available in black RAL9005 and HIPCA white
- 10-year manufacturer's warranty

Standard Bi-fold Roller Assembly

These robust bi-fold rollers are used at the bottom of folding door installations wherever two hinged panels are sitting directly onto the track. Each roller assembly works with a top guide to support the moving door leaves top and bottom and keep your bi-fold door system consistently tracking smoothly.

- Security tested to PAS 24
- Quality manufactured to BS EN ISO 9001:2015
- All rollers, clamp plates and fittings supplied
- Suitable for door panels up to 100kg and 1200mm wide
- Chrome-plated brass wheels & high-quality bearings mounted on 303 austenitic stainless-steel axles achieve smooth sliding function
- Main roller body manufactured from die-cast ZP5 Zinc alloy
- Available in black RAL9005 and HIPCA white
- 10-year manufacturer's warranty

Bi-fold Door D-Handle with Hinge

This D-handle with hinge is used instead of a centre hinge on stack-out bi-fold door configurations where two hinged panels do not sit on the track, providing extra leverage to pull the panels shut. All Glide Hardware bi-fold hinges are designed to form a strong, flexible and secure joint between door leaves, as well as give a smooth, superior folding action.

- Security tested to PAS 24
- Quality manufactured to BS EN ISO 9001:2015
- All clamp plates and fittings supplied
- Suitable for door panels up to 100kg and 1200mm wide
- Ergonomic D-handle made from die cast zinc
- Hinge made from extruded aluminium for greater toughness and accuracy with stainless steel pins for strength and durability
- Available in black RAL9005, HIPCA white and polished chrome
- 10-year manufacturer's warranty

Shootbolt Rods, Cones & Guides

Glide Hardware bi-fold door M10 threaded rod - This shootbolt rod works with the Glide Hardware bi-fold locking gearbox to secure the traffic door on folding door installations against forced entry.

- M10 x 1500mm long rods
- Security tested to PAS 24
- Designed to work on door panels up to 100kg and 1200mm wide

Glide Hardware bi-fold door shootbolt rod end guide - Secured and mounted to the face of the sash, this end guide works with the rod end cone on a shootbolt rod to guide the locking mechanism into location and aid compression.

Glide Hardware bi-fold door shootbolt rod end cone - Screwed to the end of the M10 threaded shootbolt rod, this end cone works with the rod end guide to direct the locking mechanism into location and aid compression.

- Quality manufactured to BS EN ISO 9001:2015
- Suitable for door panels up to 100kg and 1200mm wide
- 10-year manufacturer's warranty

FLUSH BOLTS

Axim FB-6200 23mm Wide Flush Bolts

These finger-operated shoot bolts work to secure the passive leaf on double aluminium door assemblies. They are rebated into the leading edge or inside face of the door and operated by a lever which sits flush when the bolt is engaged and the door is closed. To ensure ease of operation, Axim FB series flush bolts have a deep finger recess and large lever. A standard installation requires two flush bolts morticed into the top and bottom of the door. For maximum security the Axim flush bolt has a hardened steel bolt, zinc plated with an anti-rattle sleeve.

- Smooth lever action flush bolts
- Radiused faced or flat faced available
- Mounted in the leading edge or inside face of the passive leaf of a pair of doors
- Manufacturer's guarantee: 30 months
- Available in one fully threaded length, 305mm (12") which can be cut to suit
- Silver satin chrome finish
- Shoot bolt: 18 mm diameter and a die cast zinc alloy body mechanism
- Fixings included

Axim ES-2200 Electric Strike

The Axim ES-2200 series of electric strikes are an ANSI style door release designed to work with most leading brand deadlocking night latch locks. They come complete with stainless-steel short and long faceplates for use in most metal or timber door frame applications. The Axim ES-2200 series are shipped as fail-secure and can be converted to fail-safe mode by the simple removal of a screw. The Axim ES-2200 can also be set to 12V or 24V by simply re-configuring the wires in a different sequence.

- 450kg Holding Force
- Simple fail-safe/fail-secure changeover
- Easy installation
- Can be set to 12/24V AC/DC on site
- AC fail-secure only & DC fail-safe/fail-secure
- Comes with stainless-steel flat design face plates in two sizes:
Short: 124mm x 31.7mm, Long - 201.5mm x 31.7mm
- Simple, effective replacement for most leading brand ANSI electric releases
- Supplied with 250mm of cable
- 10mm, 25mm and 50mm extension lips available
- Power consumption and current draw: 12/24V DC – 300mA, 24/24V DC – 150mA

LK-2100 Series Reversible Deadlatch

The Axim LK-2100 series fully reversible deadlatch is non-handed for ultimate flexibility, cost-effectiveness and reduced stock holding. The LK-2100 deadlatch series accepts euro profile cylinders, with a choice of 25, 28 and 38mm backsets and strike plates to suit most single and double door configurations. An all metal case, sturdy construction and hardened steel pins help to prolong life and resist burglar attack.

- Latch bolt can be reversed without opening the deadlatch case
- Accepts euro profile cylinders
- 3 backsets available: 25mm, 28mm and 38mm
- Strike plates available to suit single and double door applications
- A reverse turn of the key while the bolt is retracted retains the latch in the case to allow two-way traffic when required
- All metal case and strong construction prevent certain unauthorised case entry
- Flat face or radius face faceplates available separately
- Suitable for use with the ES-2200 Electric Strikes
- 30 months manufacturer's guarantee

MORTICE HOOK LOCKS

Axim LK-1800 Series Mortice Hook Lock

If you're looking for a secure and affordable quality deadlocking system for narrow stile hollow metal doors, then the Axim LK-1800 mortice hook lock is just the job. A heavy-duty 5 ply laminated hook lock clasps the keep and stops the door from being separated from the frame, while a hardened case and roll pin resists hacksawing. The LK-1800 series accepts standard euro and round profile cylinders, with a choice of 25, 30 and 40mm backsets to suit most single and double aluminium or steel door configurations.

- Hacksaw-resistant 5-ply laminated hook bolt, hardened centre case and roll pin
- 19mm bolt throw
- Suitable for centre hung or offset pivot double or single aluminium and steel door assemblies
- Available in 25mm, 30mm and 40mm backset options
- Axim locks are designed to accept euro profile cylinders as standard (round cylinder version on special order)
- Flat (ALK18010F) or radius (ALK18010R) faceplates available with a natural satin silver anodized finish
- Steel case and mechanism have a corrosion-resistant zinc coating
- 30 months manufacturer's guarantee

DOOR CLOSERS

Axim TC-8800 Size 2 Concealed Overhead Transom Closer

The Axim TC-8800 universal concealed closer is a hidden commercial closing solution held integrally in the door leaf and transom. This means that the door requires no external hardware to create an uncluttered and secure solution. Choose from a variety of door control options to achieve the desired level of functionality such as no-hold opening for low-traffic areas or 90° hold-open for high traffic installations. The TC range is fully adjustable vertically and laterally so it's easy to ensure smooth operation and perfect closing.

- Includes body unit and fixings – 70mm bracket size 2
- Suitable for single and double action doors
- 10mm and 15mm extended spindle models
- 2 valves for closing and latching speed adjustment
- Pre-set cushion back-check
- No hold-open or mechanical hold-open at 90° in stock (hold-open 105° available by special order)
- Suitable for door widths 751mm to 950mm
- Maximum door leaf weight 100Kg
- Standard & Anti finger trap package options are available
- Dummy unit available
- Conforms to EN 1154
- 30-month manufacturers guarantee

Axim TC-9600 Series with Extended Spindle Concealed Overhead Transom Closer

The Axim TC-9600 concealed door closer offers all the functionality of the TC-8800 closer but with a longer spindle suitable for patch fittings and door rails. This sleek and reliable hidden closing system works for double or single door configurations to deliver controlled closing and hold-open functionality if required

- Includes body unit and fixings – 70mm bracket size 2
- Suitable for single and double action doors
- Extended spindle compared to TC-8800
- 2 valves for closing and latching speed adjustment
- Pre-set cushion back-check
- No hold-open or mechanical hold-open at 90°
- Size 2 closer suitable for door widths 751mm to 950mm
- Maximum door leaf weight 100Kg
- Standard & Anti finger trap package options are available
- Dummy unit available
- Conforms to EN 1154
- 30-month manufacturer’s guarantee

DOOR CLOSERS

Axim TC-9900-ADJ Series Universal Concealed Overhead Transom Closer

The TC-9900 universal concealed door closer offers a sleek and smooth-operating closing solution for both new commercial door installations and replacement applications where other leading transom closers have failed. Quick and easy to fit, it will confidently replace the Axim TC-8800 series closer, as well as other leading brands such as Dorma, Peters Jackson, Newman, Tonks, Ryobi - all without costly modifications to the door or door frame.

- Includes body unit and universal fixings – 70mm bracket
- Suitable for single and double action doors
- 2 valves for closing and latching speed adjustment
- Pre-set cushion back-check
- No hold-open or mechanical hold-open at 90°
- Suitable for closer sizes 1-4 and door widths 750-1150mm
- Maximum door leaf weight 100Kg
- Standard & Anti finger trap package options are available
- Dummy body unit available
- Conforms to EN 1154
- 30-month manufacturer's guarantee

Axim Side Load and End Load Arms for Transom Closers

These arms are an essential component of the concealed transom door closer system. Available as either side loading (suitable for use on anti-finger trap doors, armour glass doors and those with a round door stile or narrow door rail) or end loading (for use with anti finger trap doors). These products are fully adjustable, come with hexagonal spanner and feature handy hole and centre lines in channel for easy location of pivot point.

End load- The door is fitted in the open position therefore the cut-out for the transom spindle is at the end of the arm – hence end load

Side load- The door is fitted in the closed position. Therefore the spindle cut-out is at the side of the arm – hence side load.

	DESCRIPTION	SIZE	PART CODE	BOX QTY

Adjustable Standard and High Lift Tandem Patio Rollers

**94kg
MAX
PER ROLLER**

Need to replace worn out or broken rollers on a sliding door?
These replacement patio rollers / patio wheels are just the job and are suitable for use on most types of aluminium and PVCu patio doors.

- Maximum load per roller: 94Kg
- Height adjustment: **standard lift** 32-42mm
high lift 39-50mm
- 1¼ inch bearings
- Body size 88 x 28 x 19mm (LxHxW)
- Corrosion resistant body - available in passivated steel or premium stainless steel
- Quality manufactured according to BS EN ISO 9001: 2015
- Designed and engineered in the UK
- Suitable for aluminium and PVCu patio doors

reXon 117 LMN Silicone

This low modulus neutral oxime curing multi-purpose silicone sticks firmly without primer to most surfaces including PVC, treated wood, aluminium, steel and glass*, making it ideal for sealing joints in construction and engineering applications. With the use of a primer, reXon 117 can also be used with confidence on alkali surfaces such as concrete and brick.

*reXon 117 silicone is not recommended for use on insulated glass (can affect the butyl sealing) or security glass (can affect the PVB film).

- For use outdoors and indoors in well-ventilation rooms
- High resistance to ageing, UV, weather conditions, low and high temperatures
- Not suitable for applications in continuous contact with water
- Permanent elasticity
- Neutral oxime curing system
- Application temperature: between 5°C & 40°C (do not apply when there is a risk of rain or frost)
- Skin forming time: 25-30 minutes at 23°C and 50% relative humidity
- Hardening rate: 2.5mm in 24 hours at 23°C and 50% relative humidity

reXon 111
Hi-grade Silicone

This high-quality neutral silicone stays elastic and water resistant, and achieves universal adhesion* without primer on metals, wood, stone and masonry, as well as synthetic materials such as plastic (PVC, polycarbonate and plexi). That makes it ideal for sealing joints and junctions in a multitude of construction projects in buildings, cars, boats and caravans.

*reXon 111 silicone does not stick to bitumen, polyethylene, PTFE or polypropylene.

- Easy to apply indoors and outdoors
- Water resistant
- Neutral, odourless and acid-free
- Excellent adhesion without primer
- Cannot be painted
- Permanent elasticity
- Retains original colour and is UV and weather resistant
- Withstands temperatures from -50°C to 150°C
- Meets ISO 11600 F in G2
- Application temperature: between 5°C & 40°C (do not apply when there is a risk of rain or frost)
- Skin forming time: 25 minutes (colours) or 10 minutes (clear) at 23°C and 50% relative humidity
- Hardening rate: 3mm in 24 hours at 23°C and 50% relative humidity

reXon 114
Sanitary Silicone

This high-quality neutral silicone sealant forms a flexible, water-resistant seal and is specifically designed for use in areas of high moisture such as baths, sinks and showers. It is neutral and odourless, mould resistant with a smooth consistency that's easy work and apply. ReXon 114 sanitary sealant can be used on acrylic, sensitive metals (eg stainless steel, aluminum), ceramic tiles, plastic, glass and all other materials commonly found in wet rooms and bathrooms.

- Water resistant
- Anti-mould
- Resistant to UV, chlorine and temperatures from -50°C to + 150°C
- Very easy to work and smooth
- Does not stick to hands or form threads
- Permanent elasticity
- Acid free
- Excellent adhesion without primer
- Application temperature: between 5°C & 40°C
- Drying time: Film formed after 6 minutes at 23°C and 50% relative humidity
- Hardening: 2.5mm in 24 hours at 23°C and 50% relative humidity

reXon 121
Acrylic

12.5%
Expansion Rate

If you need to fill cracks and gaps in walls, plaster board and brick work, around door- and window frames and window sills, then reXon 121 acrylic silicone is the right product for the job. This high-quality caulk is very easy to work with and smooth to give a superior finish that can be painted once dry. It can be used indoors and outdoors but should not be used in areas that are constantly wet. 121 acrylic adheres to brick, concrete (cellular), masonry, plaster, wood, ceramic tile, metals and rigid PVCu.

- Can be painted perfectly
- Easy to work
- Excellent adhesion without primer
- Remains watertight after polymerisation complete
- Suitable for use indoors only
- Elastoplastic permanently (max 12.5% elasticity)
- Does not contain phthalates
- Application temperature: between 5°C & 40°C
- Drying time: Film formed after 70 minutes
- Completely dry after approx. 7 days

Silirub® A

- Low modulus acetoxy silicone
- Very fast skinning and curing
- Contains a powerful fungicidal agent
- Primerless adhesion on many common construction materials (glass, ceramic, porcelain, metals and wood)
- Resistant to UV, rain, snow and ozone, plus many chemicals
- High and low temperature resistant

COLOUR	SIZE	PART CODE	BOX QTY.
White	300ml	SIL57000	24
Clear	300ml	SIL57006	24

Decorators Caulk

7.5%
Expansion Rate

- Acrylic polymer based sealant and filler
- Solvent free and virtually odourless
- Very easy to apply
- Colourfast and waterproof after curing
- Can be painted after curing
- Very good adhesion on many porous surfaces
- For sealing of window sills, skirting boards, architraves, plasterboard, brickwork, etc
- Can be used for filling small cracks in plaster

COLOUR	SIZE	PART CODE	BOX QTY.
White	300ml	SIL59001	25

reXon 284
Adhesive

This high-quality white building mastic uses hybrid polymers to achieve flexible and durable adhesion of almost all building materials including stone, wood, PVC, aluminium, metal, concrete and more. Please note, reXon 284 adhesive will not stick to PA, PE, PP, Teflon® and bitumen.

- Elastic-bonding
- Air- water- and dust-tight
- Can be used in- and outdoors. Apply in temperature between 5°C & 40°C
- UV and weather resistant
- Can be painted with most water and solvent based paints.
- Film formed after approx. 30 min at 20°C and 65% relative air humidity
- Touch dry after 2 hours
- Hardening: 2.5mm in 24 hours at 20°C and 65% relative humidity
- Contains no solvents, isocyanates or phthalates
- 290ml tube

COLOUR	SIZE	PART CODE	BOX QTY.
White	290ml	TGLU20000	12

reXon 282
Adhesive

There's virtually no limit to the different materials reXon 282 multipurpose adhesive will stick to! This translucent MS polymer mastic forms a completely clear permanent bond between a huge range of smooth or porous surfaces, including traditional building substrates such as brick, plaster, stone, marble, granite, concrete and metal, as well as synthetic materials including polystyrene, polyurethane, chipboard and polycarbonate.

- Translucent - virtually invisible when gluing together layers of glass or acrylic
- Easy to apply
- Adheres to wet surfaces
- Good weather and UV resistance although there may be a small colour change over time
- Solvent free and virtually odourless
- Apply in temperature between 5°C & 40°C
- Film formed after approx. 25 min at 20°C and 65% relative air humidity
- Touch dry after approximately 2 hours
- Fast hardening: 2-3 mm in 24 hours at 20°C and 65% relative humidity
- Maximum adhesion obtained after 3 weeks
- Can be painted immediately with most water and solvent based paints

Fix ALL® High Tack

- Fix ALL® High Tack is a high quality, single component joint sealant with high adhesive strength. It is based on MS-Polymers®
- High initial tack reducing the need for initial support
- Fast curing, quick build-up of end strength, high sheer strength after full cure (no primer)
- Easy to apply and easy to tool and finish
- Remains elastic after curing
- No odour
- Does not contain isocyanates, silicones or solvents
- Paintable with all water based paints
- Good colour stability, weather and UV resistance
- Can be applied on wet surfaces, even under water

COLOUR	SIZE	PART CODE	BOX QTY.
White	290ml	TGLU40290HT	12

Fix ALL® Crystal

- A crystal clear, neutral, elastic, single component sealant/adhesive based on MS-Polymers®
- Completely transparent
- High performance mechanical properties
- Good extrudability even at low temperatures
- Ecological advantages – free of isocyanates, solvents, halogens and acids
- Minimal health and safety considerations
- Can be painted with water-based paints and a number of other systems (preliminary test required)
- Permanently elastic after full cure
- Invisible bonding of glass and other transparent materials

reXon 311
Handheld PU Foam

This high-performance polyurethane foam provides a quick and easy way to seal and insulate joints and cracks against heat loss, drafts and noise. ReXon 311 foam will adhere to many common building materials, such as wood, concrete, stone, masonry, plaster, metal, glass, polyester, polystyrene foam and PVC. Please note, this product does not stick to polyethylene film, silicone or PTFE.

- Suitable for use indoors and outdoors (protect against atmospheric influences)
- Good resistance to chemicals, aging and temperatures from -40°C to 90°C
- Good sealing capacity
- Should be applied in temperatures between 5°C and 30°C
- High volume production – gives 35-40 litres
- Minimum counter-blow (low expansion)
- Ozone-friendly - free of CFK and HCFC
- Hardens under the influence of the humidity in the air
- Touch dry after 16 minutes
- Hard enough to cut, saw, sand and paint after 40 minutes
- Excellent adhesion to many surfaces

Soudafoam® Comfort B3
Hand Held Foam
Simply Genius!

Perfect use with one hand

Perfect control of extrudability of the foam

Possible to re-use up to 6 weeks after first use

- Regular users of hand held PU foam are often frustrated by inconvenient two-handed operation, difficulty of application and a limited shelf life after first use
- The GENIUS GUN® is different! This specially designed patented trigger mechanism ensures precise dosage and removes the need for an additional gun. Simply Genius!
- Soudafoam Comfort B3 Genius Gun is a one component, polyurethane expanding foam
- Excellent form stability; no shrink; no post expansion
- Excellent filling characteristics
- Excellent adhesion to all building materials (except PE, PP and PTFE)
- High insulation values, both thermal and acoustical

SIZE	PART CODE	BOX QTY.

reXon 341
Gun Grade Foam

reXon 342 Fire Resistant
Gun Grade Foam

This fast-curing thermal and acoustic insulating polyurethane foam can be used indoors and outdoors to fill holes, cracks and cavities in walls, ceilings and roofs, as well as to insulate pipes, tubes and electrical conduits. It will adhere to most building materials such as wood, concrete, stone, masonry, plaster, metal, glass and many synthetic materials such as polyester, polystyrene and PVC. Please note, reXon 341 will not stick to polyethylene sheets, silicones or PTFE.

- Should be applied with a standard NBS gun in temperatures between 5°C and 30°C
- Suitable for use indoors and outdoors (protect against atmospheric influences)
- Good resistance to chemicals, aging and temperatures from -40°C to 90°C
- Safety valve ensures no moisture intrusion
- High yield: 50-55 litres
- Minimal counter-blow: low expansion
- Ozone-friendly - free of CFK and HCFC
- Can be painted
- Excellent adhesion to many surfaces
- Good closing power
- Hardens under the influence of the humidity of the air
- Touch dry in 10-14 minutes
- Hard enough to cut in 30-40 minutes

SIZE	341	BOX QTY.
750ml	FIF20000	12

This fire-resistant single-component expanding PU gun foam from reXon is ideal for sealing, insulating and filling bigger joints and cracks in fire-rated walls, ceilings or between the frames of fire-proof windows and doors. This foam has excellent adhesion, sticking to most common building materials including concrete, timber, stone, masonry, plaster and metal, as well as plastic, polystyrene, PU-foam and PVC etc.

- Foam is fire resistance rated to EN 1366-4 and will stop fire for up to 4 hours
- Ozone-friendly: CFC and HCFC free
- Foam can be cut and painted after less than 30 minutes curing time
- Achieves precise application with a standard NBS gun
- Safety valve shuts out moisture to ensure foam can't cure in the can
- Good filling capacity yields 40-45 litres from a 750ml can
- Recommended application in temperatures from +5°C - +30°C (Optimal at 20°C)
- Suitable for indoor and outdoor use – cured foam resists temperatures from -50°C - +90°C
- Foam relies on the moisture in the air (humidity) to cure
- Excellent adhesion to most surfaces

SIZE	342 FR	BOX QTY.
750ml	FIF20701	12

Soudafoam® B3
Gun Grade Foam

This Soudal gun foam is a one component, self expanding ready to use foam. Suitable for window and door frame installation, filling of cavities and sealing of openings in roof constructions.

- Adhesive with most substrates
- Precise application with foam gun system
- High thermal and acoustic insulation
- Excellent filling capabilities
- Very stable (unlikely to shrink after application)

reXon 127
Cement Repair

A convenient, simple way to repair cracks and fill holes in walls without having to go to the trouble and mess of mixing up a batch of mortar from scratch. Easy-to-use and ready-to-go, this high-quality plasto-elastic cement repair has a granular structure and comes in cement grey to make light work of repairing joints in masonry. ReXon 127 cement repair is particularly useful for making good on crumbling cement around windows and window sills during fitting.

- Ready to use and easy to apply
- Suitable for indoor and outdoor use
- Excellent adhesion on all porous substrates such as plaster structure, stone, concrete and wood.
- Can be painted once dry
- Not suitable for joints that are continually exposed to water
- Application temperature: between 5°C & 40°C. (Do not apply when there is a risk of rain or frost)
- 310ml tube
- Drying time: Film formed after 20 minutes
- Hardening: 0.5mm in 24 hours at 23°C and 50% relative humidity
- Allows 5% joint movement

COLOUR	SIZE	PART CODE	BOX QTY.
Grey	300ml	SIL25000	12

Soudafill Light

- Soudafill Light is an ultra lightweight ready to use filler for gaps and cracks in most porous building materials
- Easy to use and fast curing
- Smooth finish, no sanding required
- Sets hard on curing
- Does not sag or shrink
- Can be painted with alkyd & water based paints
- Suitable on most porous surfaces
- Can be sanded after curing

SIZE	PART CODE	BOX QTY.

WINDOW WARE – (“THE SELLER”) – GENERAL CONDITIONS OF SALE

You can also find a copy online at www.windowware.co.uk/terms-sale

1. DEFINITIONS AND INTERPRETATIONS

1.1 In these conditions: **“Buyer”** means the person who accepts a quotation of the Seller for the sale of the Goods or whose order for the Goods is accepted by the Seller. **“Conditions”** means these standard terms and conditions of sale. **“Consumer”** means a Buyer that is an individual acting for purposes that are wholly or mainly outside that individual’s trade business, craft or profession. **“Contract”** means the contract for the sale and purchase of the Goods (in which these Conditions apply). **“Goods”** means the goods (including any instalment of the goods or any parts for them) which the Seller is to supply pursuant to or in connection with the Buyer’s purchase order and Contract. **“Seller”** means Heywood Williams Components Limited trading as Window Ware. **“Service”** means the service if any which the Seller is to perform pursuant to or in connection with the Buyer’s purchase order and the Contract.

1.2 Any reference in these Conditions to any provision of a statute shall be construed as a reference to that provision as amended, re-enacted or extended at the relevant time.

1.3 If the Buyer is a Consumer then Condition 22 applies.

2. ACCEPTANCE AND AMENDMENT

2.1 These Conditions shall (unless or except to the extent a director of the Seller otherwise agrees in writing) apply to all tenders, offers, quotations, acceptances, agreements and deliveries relating to the sale of Goods and/or the provision of the Service by the Seller and the Buyer shall be deemed to assent thereto.

2.2 No other conditions or modifications of these Conditions shall be binding on the Seller unless agreed by a director of the Seller in writing and the Seller shall not be deemed to accept such other conditions nor to waive any of the Conditions by failing to object to provisions contained in any purchase order or other communication from the Buyer.

2.3 No representative, agent or salesman who is not a director of the Seller has any authority to amend or waive any of the Conditions or other provisions of the Contract.

2.4 Quotations shall only be valid for a maximum period of 30 days from date of issue and may be withdrawn by the Seller by written or oral notice to the Buyer at any time prior to the Contract being formed. The Contract will only be formed when the Seller has accepted the Buyer’s order, whereupon a valid Contract shall be formed between the Buyer and the Seller.

2.5 Prices are quoted by the Seller on the basis of the limitations of liability set out in these Conditions.

2.6 The Buyer agrees that the entry into any Contract(s) by the Seller is not intended to and shall not, unless expressly agreed otherwise by the Buyer in writing, create any course of dealings between the parties or any overarching obligation upon the Seller to enter into any future contract to supply goods or services to the Buyer.

3. SPECIFICATIONS

3.1 Any advice or recommendation given by the Seller or its employees or agents as to the storage, application or use of the Goods which is not confirmed in writing by the Seller is followed or acted upon entirely at the Buyer’s own risk, and accordingly the Seller shall not be liable for any such advice or recommendation which is not so confirmed. Such advice or recommendation shall not form part of the Contract or Conditions.

3.2 All descriptions, specifications, drawings, weights, dimensions, capacities, prices, performance ratings and other data quoted or submitted by the Seller or included in any sales literature, quotation, price list, acknowledgement of order, invoice or other document or information issued by the Seller are to be deemed approximate only (except where stated in writing to be exact or expressly made part of the essence) and subject thereto none of such items or any part thereof shall form part of the Contract.

3.3 Any typographical, clerical or other error or omission in any sales literature, quotation, price list, acknowledgement of order, invoice or other document or information issued by the Seller shall be subject to correction without any liability on the part of the Seller.

3.4 The Seller reserves the right to make any changes without notice in the specification of the Goods which are required to conform with any applicable safety or other legal requirements or which do not materially affect their quality or performance.

3.5 Where the Buyer supplies or specifies materials to be used in the Contract the Seller will not be liable for any defect in the Goods or the Service or errors in delivery or performance caused by defects in or unsuitability of materials so supplied or specified.

4. ORDERS

No order which has been accepted by the Seller may be cancelled by the Buyer except with the agreement in writing of the Seller and on terms that the Buyer shall indemnify the Seller in full against all loss (including loss of profit), costs (including the cost of all labour and materials used), damages, charges and expenses incurred by the Seller as a result of cancellation.

5. PRICES

5.1 Unless otherwise agreed in writing or stated on the Seller’s acknowledgement of order the price for the Goods and/or the Service shall be the Seller’s list price at date of the Seller’s acceptance of the Buyer’s order. The Seller reserves the right to amend the price list at any time, such amendment to be effective immediately upon notification to the Buyer in writing in relation to all contracts after such notification.

5.2 Prices are subject to fluctuation in the event of any increase in the cost of labour or in the cost of materials or overheads affecting the cost of supplying the goods whether as a result of a change in law or otherwise. Any increase in such costs will be added to the price. The Seller also reserves the right to make an additional charge to cover any increase in transport costs occurring before the date of delivery.

5.3 After an order has become binding on the Seller, all prices will have VAT added at the appropriate rate and are subject to increase to reflect any increases in costs to the Seller (including without limitation costs of materials, labour, transport and services, and fluctuations in currency exchange rates and any tax, duty, fee or

charge imposed by any government or other authority) prior to delivery, any change in delivery dates, quantities or specifications for the Goods or the Service which is requested by the Buyer, or any delay caused by any instructions of the Buyer or failure of the Buyer to give the Seller adequate information or instructions.

5.4 Unless otherwise agreed in writing or stated on the Seller’s acknowledgement of order, packaging, delivery and transport charges and insurance are not included in the price and will be charged at extra at the Seller’s then current rates for the same.

5.5 From time to time, prices for items advertised on the Seller’s website may differ from prices shown in the then current catalogue or on the Seller’s trade counter. In these circumstances the Seller is not obliged to honour any website price (except on orders placed through the website).

5.6 “While Stocks Last” and similar pricing promotions may be withdrawn by the Seller at any time without prior notice. The Seller is not obliged to honour any orders placed where promotional stock has been exhausted, even where this is due to an error or omission on the part of the Seller.

5.7 In the event of an obvious pricing error, where the goods are incorrectly priced, the Seller is not obliged to supply the Goods at the incorrect price.

5.8 Where orders are placed through the website, acceptance will only be when the Goods are despatched. Notwithstanding this, we may send an email confirming receipt of your order. This is not acceptance and we will not be bound until the Goods are despatched.

6. PAYMENT

6.1 Unless otherwise agreed in writing or stated on the Seller’s acknowledgement of order, payment shall be due and payable by the end of the month following the calendar month in which the invoice is dated or (if earlier) upon the occurrence of any circumstances whereunder, pursuant to the Contract or these Conditions, payment falls immediately due and shall be made without any set-off, counterclaim or deduction whatsoever. Time of payment shall be of the essence of the Contract.

6.2 The Seller reserves the right at any time before proceeding further with an order to demand full or partial payment of monies due and payable under the Contract and under any other contract between the Seller and the Buyer.

6.3 If the Buyer defaults in any payment the Seller may in addition to exercising the right contained in Condition 6.2 be entitled, without prejudice to any other right or remedy, to do all or any of the following:

6.3.1 to suspend any or all further deliveries under the contract and under any other contract or contracts between the Seller and the Buyer then current, without notice;

6.3.2 to charge interest on any amount outstanding at the rate of 8% per annum above the base rate of the Bank of England, such interest being charged as a separate, continuing obligation not merging with any judgment together with any statutory debt recovery costs;

6.3.3 to serve notice on the Buyer requiring immediate payment for all goods supplied by the Seller under this and all other contracts with the Buyer whether or not payment is otherwise due;

6.3.4 to require upfront payment for any or all future supply of goods under this Contract or any other contract; and

6.3.5 to sue for the price of the goods even though title may not have passed to the Buyer.

6.4 The Seller shall have a lien on all undelivered Goods which the Buyer agrees to purchase from the Seller for all monies due from the Buyer to the Seller under any contract between them and the Buyer shall have no right of set-off in respect of such monies.

6.5 All rights and remedies afforded in these Conditions for non-payment shall be in addition and without prejudice to all other rights and remedies available to the Seller under the Contract or at law.

6.6 Notwithstanding any other provision of these Conditions, the Seller reserves the right to refuse shipment of the goods if the total amount owing by the Buyer to the Seller under any contract made between them exceeds any credit limit agreed by the Seller from time to time.

7. DELIVERY

7.1 Time of delivery is not of the essence of the Contract and any time or date specified by the Seller as the time at which or the date on which the Goods will be delivered or the Service will be performed is given and intended as an estimate only and the Seller shall not be liable for any loss, damage or expense howsoever arising from delay in delivery.

7.2 The Seller reserves the right to make delivery by instalments unless otherwise expressly agreed in writing. The period during which delivery by instalments may be made and the quantity of Goods delivered in each instalment shall be at the Seller’s discretion.

7.3 Where Goods are delivered in instalments, each delivery shall constitute a separate contract (in which these Conditions apply). (mutatis mutandis) and failure by the Seller to deliver any one or more of the instalments or any claim by the Buyer in respect of any one or more instalments shall not entitle the Buyer to treat the Contract as repudiated.

7.4 If the Buyer fails to take delivery of Goods or to give the Seller adequate delivery instructions at the time stated for delivery (otherwise than by reason of any cause beyond the Buyer’s reasonable control or the Seller’s fault) then, without prejudice to any other right or remedy available to the Seller (including its right to payment) the Seller may:

7.4.2 store the Goods until actual delivery and charge the Buyer for the reasonable costs (including insurance) of transportation and storage; and

7.4.3 sell the Goods at the best price readily obtainable and (after deducting all reasonable storage, transport and selling expenses) account to the Buyer for the excess over the price under the Contract or charge the Buyer for any shortfall below price under the Contract; and the Buyer shall indemnify the Seller in full against all losses, damages, charges and expenses incurred by the Seller as a result of the Buyer’s said failure to take delivery or give adequate delivery instructions to the extent that the Seller’s said losses, damages, charges and expenses are not covered by any payments made or monies obtained under 7.4.1 to 7.4.3.

7.5 Without prejudice to any other right or remedy of the Seller whether under these Conditions or otherwise, if the Buyer is to pay the Seller for the Goods on delivery of the Goods and fails to do so the Seller reserves the right not to deliver the

...continued overleaf

TERMS & CONDITIONS

goods and to charge the Buyer for such attempted delivery and any later delivery of the Goods at the Seller's then current rates for the same.

7.6 The Buyer shall be solely responsible for the proper unloading of the Goods. If, to assist the Buyer remove the Goods from point of delivery, the Seller or any sub-contractor does any loading or unloading of goods free of charge, no liability whatsoever shall thereby be incurred by the Seller or sub-contractor and the Buyer shall indemnify the Seller in respect thereof.

7.7 Unless agreed otherwise by the Seller the Goods will be delivered to the Buyer's premises stated on the Seller's acknowledgement of order, subject to Condition 5.4 of these Conditions.

8. BUYER'S OBLIGATIONS AND CLAIMS ON DELIVERY & RETURNS POLICY

8.1 The Buyer will:

8.1.1 sign for any damages or lost packages at time of delivery; and

8.1.2 notify the Seller in writing within five days of delivery or before manufacturing with the Goods, whichever is the earlier, of any error in quantity, weight or description of Goods delivered.

8.2 Failure to make any notification in accordance with paragraph Condition 8.1 above could mean that the Buyer is unable to make a claim.

8.3 Goods can only be returned in accordance with the following:

8.3.1 returns will be at the sole discretion of the Seller and Goods may only be returned upon receiving written consent from the Seller. The Seller's returns policy, a copy of which is available on request, must be followed so that Goods can be clearly identified upon receipt and credited by the Seller in a timely manner;

8.3.2 goods should not have been used or damaged by the Buyer in any way. Returns should be sent back to the Seller in a re-saleable condition in the original packaging unless signed for as damaged, or were defective at point of receipt by the Buyer; and

8.3.3 unless Goods are defective, or have been sent by the Seller in error, returned items will be subject to cost of collection and a restocking charge which will be notified to the Buyer in advance. When a collection date has been agreed by the Buyer and the Seller, but the carrier notifies the Seller there was nothing to collect, the Seller will pass on these fees to the Buyer.

9. PACKAGING

9.1 Packaging supplied by the Seller, unless otherwise expressly agreed in writing, is intended to provide adequate protection in normal conditions of transit of expected duration. Where the Seller indicates that such packaging is to be redeemed to the Seller, the Buyer shall be responsible for returning such packaging as soon as reasonably practicable, carriage paid and in good condition.

10. EXPORT TERMS

10.1 Unless otherwise agreed in writing the prices for export sales outside of the United Kingdom are quoted on a FOB (designated UK mainland address) basis.

10.2 The Buyer shall be responsible for obtaining and complying with any necessary import/export licences, permits and contracts for the supply and delivery of the goods. It is the Buyer's responsibility to ensure that the goods comply with all legal and customary requirements in all jurisdictions into which the goods may be shipped or resold (and it shall indemnify the Seller and keep the Seller indemnified against any losses, claims, damages or expenses suffered or incurred by the Seller as a result of the Buyer failing to do this).

11. RISK AND TITLE TO GOODS

11.1 All goods are supplied to the Buyer by the Seller on the following terms:

11.1.1 risk shall pass to the Buyer (so that the Buyer is then responsible for all loss or deterioration of the goods or for any damage occurring) if the Seller is responsible for delivering or arranging for delivery of the goods, at the time when the goods arrive at the place for delivery (whether or not delivery is possible), or in all other circumstances, at the time when the goods leave the premises of the Seller.

11.1.2 the goods shall remain the sole and absolute property of the Seller as legal and equitable owner until such time as all sums (including any default interest) due to the Seller from the Buyer, (a) under this Contract and under all other contracts between the Seller and the Buyer (including any sums due under contracts made after this Contract) whether or not the same are immediately payable and (b) under all contracts between the Seller and any associate or subsidiary company of the Buyer or any company under the ultimate control of the same parent company as has ultimate control of the Buyer, have been paid in full;

11.1.3 until such payment the Buyer shall be in possession of the goods solely as bailee for the Seller and shall store the goods separately in such a way as to enable them to be identified as the property of the Seller and maintain the Goods in satisfactory condition. The Buyer shall not remove, deface or obscure any identifying mark or packaging on or relating to the goods;

11.1.4 the Seller reserves the immediate right at any time of re-possession of any goods to which it has retained title and thereafter to re-sell the same and for this purpose the Buyer hereby grants an irrevocable right and licence to the Seller's employees and agents to enter at any time upon all or any of its premises with or without vehicles during normal business hours. This right shall continue to subsist notwithstanding the termination of the contract for any reason and is without prejudice to any accrued rights of the Seller hereunder or otherwise;

11.1.5 as a separate and independent condition, the Buyer shall be at liberty and may in the ordinary course of its business and prior to title passing, sell and deliver the goods to any third party but such right shall immediately cease should any of the events in Condition 14 and 15.1 apply to the Buyer; and

11.1.6 whilst the goods remain the property of the Seller, the Buyer shall insure the goods against all usual risks for an amount equal to or greater than the purchase price and hold the proceeds of such insurance on trust for the Seller.

12. WARRANTIES AND LIABILITY

12.1 The Seller takes reasonable steps to ensure that the goods shall be free from major defects for a period of one year following delivery (subject to fair wear and tear). The Seller does not guarantee the decorative finish of the goods. The Seller is not liable for defects arising from faults caused by incorrect or poor installation or fitting.

12.2 Any claim by the Buyer which is based on any shortage or any defect in

the quality or condition of the goods or their failure to correspond with specification which are visible on inspection shall (whether or not delivery is refused by the Buyer) be notified to the Seller within three working days from the date of delivery. If delivery is not refused, and the Buyer does not notify the Seller accordingly, the Buyer shall not (subject to condition 12.3) be entitled to reject the goods and the Seller shall have no liability for such defect or failure, and the Buyer shall be bound to pay the price as if the goods had been delivered in accordance with the contract.

12.3 Any claim relating to defects in materials, mechanical effectiveness or workmanship that were not visible on delivery shall only be valid if such claim is made within one year following delivery of the goods (or if longer the guarantee period stated in the Seller's brochure at the time the contract was made) and in any event within seven days of discovery of the defect. All warranties are subject to the conditions stated in the brochure from time to time. Where fitting and aftercare instructions are provided with the goods, the Buyer shall be required to prove that these have been complied with in order to support any claim. The Seller shall have no liability for any claims made following the expiry of such period.

12.4 Where any valid claim in respect of any of the goods which is based on any defect in the quality or condition of the goods or their failure to meet specification is notified to the Seller in accordance with

12.2 or 12.3 above, the Seller shall be entitled to repair or replace the goods (or the part in question) free of charge or, at the Seller's sole discretion, refund to the Buyer the price of the goods (or a proportionate part of the price), but the Seller shall have no further liability to the Buyer whatsoever.

12.5 In the case of goods supplied by the Seller to the Buyer that are not branded or otherwise identified as the Seller's goods ("Third Party Goods"):

12.5.1 the Seller gives no assurance or guarantee that the sale or use of the goods will not infringe the patent, copyright or other industrial property rights of any other person, firm or company; and

12.5.2 the obligations of the Seller relating to defects in such goods are limited to the guarantee (if any) which the Seller receives from the manufacturer or third party supplier or such goods.

12.6 For the avoidance of doubt, the remedies set out in Conditions 12.4 and 12.5 above represent the Seller's entire liability in respect of any defective goods and without limitation to the generality of the foregoing:

12.6.1 the Seller shall be under no liability in respect of any defect in the goods arising from any drawing, design or specification supplied by the Buyer;

12.6.2 the Seller shall be under no liability in respect of any defect arising from fair wear and tear, wilful damage, negligence, abnormal working conditions, failure to follow the Seller's instructions (whether oral or in writing), misuse or alteration or repair of the goods without the Seller's approval; and

12.6.3 in no event shall the Buyer be entitled to reject the goods on the basis of any defect or failure which is so slight that it would be unreasonable for him to reject them.

12.7 Subject as expressly provided in these Conditions, and except where the goods are sold to a person dealing as a Consumer, all warranties, conditions or other terms implied by statute or common law are excluded to the fullest extent permitted by law. Except as expressly provided in these Conditions, the Seller shall have no liability to the Buyer (whether arising under contract, tort (including negligence), breach of statutory duty or otherwise) in excess of the price of the goods and shall have no liability for any loss of profit, loss opportunity, loss of sales or loss of goodwill, costs, expenses (in each case whether direct or indirect) or for any indirect, special or consequential loss or damage or other claims for compensation whatsoever which arise out of or in connection with the supply of goods or their use or resale by the Buyer.

12.8 Nothing in these Conditions shall limit or exclude the Seller's liability for death or personal injury, any fraud or for any other liability which it is not permitted to limit or exclude by operation of law.

12.9 The parties agree that in all the circumstances of the Contract that the limitations of liability in this Condition 12 are fair and reasonable taking into account the price payable by the Buyer and the relative abilities of the parties to insure against the potential losses that may arise.

13. TRADEMARKS, PATENTS AND OTHER INDUSTRIAL RIGHTS

13.1 If any claim is made against the Buyer alleging that the Goods or the Service infringe any patent rights, registered designs, copyright or other industrial property rights of another then: (i) the Buyer shall forthwith notify the Seller with full particulars; and (ii) the Seller or its suppliers or licensors (as the case may be) shall be at liberty at their expense to conduct all negotiations and/or litigation in respect thereof and (if necessary) in the name of the Buyer; and (iii) except pursuant to a final award, the Buyer shall not pay or accept any such claim or compromise any proceedings without the consent of the Seller (which shall not be unreasonably withheld or delayed); and if as a result of such negotiations or litigation the Buyer shall be unable to use the goods substantially for the purpose for which they were bought the Seller shall take them back and refund the price thereof and such refund shall be in full satisfaction of all claims by the Buyer against the Seller.

13.2 The Buyer shall indemnify the Seller against all actions, costs (including cost of defending legal proceedings), claims, proceedings and demands in respect of any infringement or alleged infringement by the Seller of patent rights, registered design, copyright, design rights or other industrial rights attributed to the Seller complying with any special instructions from or requirements of the Buyer relating to the Goods or the Service.

13.3 The Buyer shall not represent to its customers that it sells products manufactured by the Seller after the Buyer shall have ceased to purchase such products on a regular basis from the Seller and in such event the Buyer shall return to the Seller all sales literature relating to products manufactured by the Seller.

14. TERMINATION

14.1 The Seller shall be entitled to terminate any Contract with immediate effect:

14.1.1 should the Buyer materially breach any provision of the Contract;

14.1.2 should the Buyer be late in making any payment due under the Contract; or

14.1.3 for convenience at any time prior to the delivery of the Goods to the customer, in which instance the Seller shall as its only obligation or liability following such termination, refund to the Buyer any advance sums paid with respect to the relevant Goods that were the subject of the Contract.

15. INSOLVENCY

15.1 The Seller shall be entitled to cancel the contract in whole or in part by giving written notice to the Buyer, without prejudice to any other right or remedy available to the Seller if the Buyer is subject to any of the following:

15.1.1 if any encumbrancer takes possession of or a receiver, administrative receiver or similar officer is appointed over any of the property or assets of the other party; or

15.1.2 if the other party makes any voluntary arrangement, composition, compromise or arrangement with its creditors; or

15.1.3 if the other party enters into any restructuring plan, composition, compromise or other arrangement with its creditors or members the purpose of which is to eliminate, reduce, prevent or mitigate the effect of any financial difficulties; or

15.1.4 if the other party has an administrator, liquidator, nominee, supervisor, monitor or similar officer appointed; or

15.1.5 has an order made or resolution passed for its winding-up, dissolution, administration or reorganisation (except for the purpose of amalgamation or reconstruction not involving insolvency where the resulting entity agrees to be bound by or assumes the obligations imposed on the other party); or

15.1.6 any document is filed at court initiating or applying for a moratorium or order is made for a moratorium to come into force; or

15.1.7 anything analogous to any of these events under the law of any jurisdiction occurs in relation to the other party; or

15.1.8 if the other party ceases or threatens to cease to carry on business.

15.2 The Buyer shall immediately notify the Seller in writing if:

15.2.1 there is any change in the ownership, management or control of the Buyer;

15.2.2 there is any sale or transfer of a material part of the Buyer's business or assets;

15.2.3 the Buyer, being a sole trader, entering into partnership with others; or

15.2.4 the Buyer, being a sole trader or a partnership, becomes incorporated or amalgamated with others.

15.3 If any of the events listed at Condition 15.1 occur any credit facilities granted by the Seller shall automatically terminate and the balance of such account shall become immediately payable in full. The Seller will consider at its discretion a renewal of or adjustment to the credit facility taking into account the legitimate commercial interests of the Buyer and Seller.

15.4 Should the Buyer fail to notify the Seller of the occurrence of any of the events listed in Conditions

15.1.1 to 15.1.8 above the Buyer shall be jointly and severally liable to pay all sums due to the Seller in respect of goods and/or services supplied to the changed entity until the date that written notice is received by the Seller.

15.5 The Buyer shall be jointly and severally liable for all sums due to the Seller in respect of goods and/or services supplied to any individual, partnership or other legal entity that makes use of the customer's credit account facility.

15.6 The Seller may (without prejudice to its other rights or remedies) terminate or suspend the Seller's performance of the whole or any outstanding part of the Contract if the Buyer fails to take delivery of or to pay for the goods on the date required or breaches any other term of the Contract, or if the Buyer is late in payment or performance under or otherwise breaches any other contract for the sale and purchase of goods or services between the Buyer and the Seller. The Seller may also suspend deliveries while investigating any claim relating to prior deliveries (under any contract) of goods.

16. FORCE MAJEURE

The Seller shall be under no liability for any failure, delay or hindrance in the performance of any of its obligations under the contract if and to the extent that the failure is caused by a force majeure event. A force majeure event includes but is not limited to, an act of God, terrorism, war, riot, extreme adverse weather conditions, fires, governmental restriction, condition or control, epidemic, pandemic or by reason of any act done or not done pursuant to a trade dispute, shortages of labour or materials or breakdown of machinery or any other matter (whether or not similar to the foregoing) outside the control of the Seller.

17. SPECIALS AND FREE ISSUE MATERIALS

17.1 The Seller does not guarantee the suitability of materials or the design of goods made specially to the Buyer's requirements and differing from the Seller's standard specifications even if the purpose for which the goods are required is known to the Seller.

17.2 The Seller does not accept responsibility for the safe-keeping and condition of the Buyer's samples, drawings, tools and the like whilst they are in the Seller's possession whatever the circumstances may be in which they are lost, broken or damaged and the Buyer should make its own arrangements to insure these items.

18. ATTENDANCE ON SITE

If the Seller attends, or arranges for an attendance to be made, at the Buyer's premises or the premises of any third party for any reason connected with the contract, the Buyer shall indemnify the Seller in respect of all claims made or proceedings taken against the Seller (and associated legal costs incurred by the Seller) by any person, firm or company, including employees of the Seller, or of the Buyer or of any contractor employed by the Buyer (or their personal representatives), whether in respect of death, personal injury or damage to property arising directly or indirectly from the attendance at such premises.

19. AGE REQUIREMENTS FOR SPECIFIC GOODS

Where the Buyer places an order for age-restricted goods such as solvents or knives, the buyer confirms that they are over the age of 18 and that delivery will be received by a person over the age of 18.

20. DISPOSAL OF ELECTRICAL AND ELECTRONIC EQUIPMENT

The WEEE regulations exist to ensure that disposal of certain electrical and electronics items is carried out in a sound environmental manner. All Buyers agree that they will be responsible for collection and disposal of any electrical and electronic equipment procured from the Seller.

21. GENERAL

21.1 The Seller is a trading division of Heywood Williams Components Limited, itself a member of the group of companies whose holding company is Arran Isle Ltd., and accordingly the Seller may perform any of its obligations or exercise any of its rights by itself or through any other member of its group, provided that any act or omission of any such member shall be deemed to be the act or omission of the Seller.

21.2 Any notice given hereunder must be in writing and may be affected by personal delivery, facsimile transmission, email (to finance@windowware.co.uk) or by registered mail postage and (subject, in each case to proof that such notice was properly addressed and dispatched) if effected by facsimile transmission or email shall be deemed to be received on the day of sending and if effected by post shall be deemed to be received 48 hours after the date of posting.

21.3 The Contract shall be personal to the Buyer and shall not, nor shall any rights under it, be assigned by the Buyer without the written consent of the Seller. The Seller shall be entitled to sub-contract the whole or part of its obligations under the Contract and to assign its interest in the Contract.

21.4 No waiver by the Seller of any breach of the Contract by the Buyer shall be considered as a waiver of any subsequent breach of the same or any other provision.

21.5 A person who is not a party to the Contract (a "third party") shall have no rights pursuant to the Contracts (Rights of Third Parties) Act 1999 (the "Act") to enforce any of these Conditions. Any right or remedy of a third party which exists or is available apart from the Act is not affected.

21.6 The parties agree that any disputes arising or in any way connected with the subject matter of a Contract (or these Conditions) (whether of a contractual or tortious nature or otherwise) shall be subject to the laws of England and in the case of proceedings issued against the Seller shall be subject to the jurisdiction of the English courts only.

21.7 If any provision of the Contract (or these Conditions) is held by any competent authority to be invalid or unenforceable in whole or in part the validity of the other provisions of the Contract (or these Conditions) and the remainder of the provision in question shall not be affected thereby.

21.8 We will make a search and/or enquiry with credit reference agencies ("CRAs"), who will give us information about you, such as about your financial history, and who will keep a record of that search and will share that information with other businesses. We will do this to assess creditworthiness, check your identity, manage your account, trace and recover debts and prevent criminal activity. We will monitor and record information relating to your trade performance and will also continue to exchange information about you with CRAs on an ongoing basis, including about your settled accounts and any debts not fully repaid on time. CRAs will share this information with other organisations. For Credit Circle members, we will record information relating to your trade credit performance and such records will be made available to other organisations to access applications for credit.

21.9 To the extent any personal data is collected or processed under or in connection with these conditions, such personal data shall be collected or processed in accordance with applicable law and the Seller's privacy policy (and where applicable cookies policy) located at www.windowware.co.uk

22. TERMS APPLYING TO CONSUMERS ONLY

22.1 PLEASE NOTE THAT THIS SECTION ONLY APPLIES WHEN THE BUYER IS ENTERING THE CONTRACT AS A CONSUMER

22.2 Where the Buyer is a Consumer, the following Conditions shall not apply:

22.2.1 Conditions 3.1 - 3.3;

22.2.2 Condition 6.3;

22.2.3 Condition 6.4;

22.2.4 Condition 11.1.1 - 11.1.6

22.2.5 Condition 12;

22.2.6 Condition 13.3;

22.2.7 Conditions 15.2 - 15.5; and

22.2.8 any indemnities given by the Buyer under these Conditions.

22.3 The goods shall remain the sole and absolute property of the Seller as legal and equitable owner until such time as all sums due to the Seller from the Buyer, have been paid in full.

22.4 Should any defect occur in the Goods, other than one for which the Buyer is responsible, the Seller will at their option either, replace or repair the Goods (at no charge to the Buyer) as soon as is reasonably practicable.

22.5 Following receipt of the Goods, the Buyer can cancel their order by notifying the Seller within 14 days of the date on which the Goods were delivered. The Buyer can return the Goods for a refund. If the Buyer's purchase order comprises of more than one item, the Buyer can cancel and return any of the items individually or in combination.

22.6 Where the Buyer cancels their order after the Goods have been delivered or collected the Buyer agrees to return the Goods to the Seller by following the procedure set out below.

22.7 The Buyer agrees to return the Goods in full, in a resalable condition and securely packaged (properly repacked in their original packaging if they were removed from it) and unused. The Buyer is responsible for all costs of returning the Goods subject to the exceptions set out below.

22.8 Nothing within these Conditions affects the Buyer's rights under law, and in particular the Buyer will always be entitled to return products to the Seller for a full refund if they were misdescribed, or are not of satisfactory quality or reasonably fit for their purpose and the Seller cannot remedy the fault to the Buyer's reasonable satisfaction. Only in such circumstances and/or if the Seller provides the Buyer with substitute products which the Buyer does not want will the Seller refund the Buyer's reasonable costs to return the products to the Seller.

22.9 If the Goods are damaged whilst in the Buyer's care (including damage caused in assembling or disassembling the Goods), if the Buyer fails to return all parts of the Goods or otherwise if the Buyer's failure to take reasonable care of the Goods means that the Seller reasonably believes that a resale will not be possible, the Buyer agrees that the Seller may withhold payment of all or part of the refund in respect of the Goods as compensation for the Seller's loss on these Goods.

22.10 The Seller will make all refunds to the card used for payment.

22.11 The Seller shall not have liability to the Buyer for:

22.11.1 losses that were not foreseeable to either the Seller or the Buyer when the Contract was formed;

22.11.2 losses not caused by any breach of these Conditions by the Seller; or

22.11.3 any losses suffered by a non-Consumer.
