We've got it

W elcome to the 2020 Window Ware product catalogue.

Since the last issue, we've added no less than 714 individual new items and as many as 30 new ranges to our repertoire. Constantly expanding our product offering is all part of our continuing mission to bring fabricators and installers more choice than any other UK hardware distributor to simplify their supply chain, meet market trends and fulfil their emerging wish-lists. We've worked particularly hard on bringing in products that are PAS 24 compliant and SBD certified, so that we're able to support fabricators in meeting not just Approved Document Q security regulations for new builds, but also the high expectations of increasingly security-conscious customers. You'll find all of these recent arrivals included in this latest issue of our jam-packed giant catalogue – an essential look-up tool for anyone in the trade.

It's worth noting that while we do our best to ensure all the details in this catalogue are correct at time of print, naturally things change as new products arrive and old ones

become obsolete. For the most current, dynamic information, please visit our website www.windowware.co.uk. Make sure you log in to your account to view discounted trade-only prices. Why not keep an eye out for our dedicated hardware newsletter called On Point. This filled-to-the-brim bulletin comes out twice a year and is a great way to stay in the loop with what's hot and happening at Window Ware.

Don't forget, each and every product we sell is accompanied by our award-winning customer service, our reliable delivery credentials that promise 97% of orders arrive spot-on the very next working day, not forgetting well-founded product knowledge and sound technical advice that leaves no question unanswered and no hardware requirement unmet!

Happy hardware hunting!

Regards,
Your Window Ware team

Supporting fabricators from start to finish

Securistyle Defender Restricted Friction Hinge

10
YEAR GUARANTEE

BBA
Approved

- Built-in child-resistant mechanism limits opening to a maximum of 100mm in the restricted position
- Tested to BS 6375 to withstand a force of 600N when opened to its restricted position
- Built in quick release levers allow window to be fully opened for easy cleaning, total ventilation or emergency escape
- Restrictor mechanism automatically relocates and resets as the window is closed
- On side hung applications, only the bottom restrictor hinge needs fitting to satisfy the requirements of BS 6375 Part 2
- 18mm track width
- 10 year mechanical guarantee

SINIDEX SECURITY ESPAGNOLETTE BARS

**Sinidex Security
Window Lock**

10
YEAR GUARANTEE

PAS 24
PASSED

Now fabricators can quickly, easily and cost-effectively upgrade their product offering to provide their customers with high-security SBD-approved window hardware as standard thanks to this competitively-priced security window lock from Cotswold Architectural Products. Clever floating mushroom technology and self-locating keeps help to maintain trouble-free operation, as well as ensure optimal security- and weather-sealing performance even if the sash drops. That means fewer call backs and happier homeowners!

Key features

- Floating mushroom technology delivers increased tolerances to reduce gearbox wear and cope with sash drop up to 6.5mm
- Self-locating keeps guide the mushroom cams into perfect position every time for effortless operation and a secure seal
- Fully compression adjustable security cams
- Simple routing preparation – the Sinidex lock fits a standard espag rout
- Ever expanding range of profile-related handed security keeps with night vent facility
- Rods are ready marked to aid keep alignment during fabrication
- Suitable for PVCu windows

Specifications:

- 16mm plated mild steel faceplate
- 20 or 22mm back sets
- 7.7 or 9mm mushroom cams
- Compression adjustment ± 1 mm
- Available in various sizes from 280 to 1150mm

Guarantees & Certifications

- Secured By Design accredited to protect homes against crime
- PAS 24 accredited security performance
- Tested to over 30,000 cycles with a 10-year mechanical guarantee for long service life
- Corrosion resistant to EN1670: Grade 4

Nemesis Twin Cam Espagnolette Bar

BS EN 1670:2007

This multi-point window lock from Kenrick fulfils fabricator demand for a high-quality locking system capable of delivering the superior performance and proven reliability fit for increasingly popular high-end aluminium windows. PAS 24:2016 and SBD accredited, the crime preventing credentials of this security window lock are second to none. It's fitter-friendly too, with a fast-fix design and adjustable mushroom cams to +/-1mm, ensuring even compression and an optimum seal.

Key Features

- Multi-point locking system with a robust offset gearbox suitable for aluminium profiles
- High-security bi-directional twin cam
- U-Rail faceplate which also works within a eurogroove
- Available with 5 or 7mm cam heights
- Made from durable high-grade 304 austenitic stainless steel

Guarantees & Certificates

- Security tested to PAS 24: 2016 & Secured by Design certified
- Tested to 100,000 cycles with 10-year mechanical guarantee
- Corrosion resistant to BE EN 1670: 2007 Grade 4 240 hours salt spray

Yale Flush Sash Casement Gearing

This new high-security locking hardware from Yale has been specifically designed to fit modern flush sash systems, so homeowners can achieve the elegant, traditional looks they're after with the peace of mind, performance and convenience you'd expect from the world's most trusted lock manufacturer. Made in the UK to the highest specifications and covered by Yale's Lifetime Security Guarantee, this new lock features an extra cam which allows the window to be safely and securely partially opened on a 'night vent' position for improved ventilation.

Key features and benefits:

- Suitable for most flush window systems
- Features an extra mushroom cam to **enable night vent position**
- Works with both the fast-fit and croppable gearboxes from Yale for ultimate flexibility
- Available with 7.7 or 9mm easily adjustable mushroom cams for **enhanced security and tight weather sealing**
- 20 and 22mm backsets
- Wide choice of keeps covers most profiles for **flexible usage**
- 4 crop-to-fit shootbolt sizes to achieve sash sizes 326 to 1420mm
- 7 non-croppable rod sizes to achieve sash sizes 522 to 1510mm

Specifications:

- **Excellent corrosion resistance** to EN 1670:2007 Grade 4
- Tested to a minimum of 50,000 cycles with a 10-year mechanical guarantee for assured long-life
- **Keeps families & properties safe** - Secured By Design accredited & PAS 24:2016 compliant
- **Quality assured** with BBA certification
- Made in Britain

MK1 Shootbolt

- High security fast-fit casement shootbolt system with a minimum amount of components
- Profile specific striker plates with a nightvent position
- Adjustable length on shootbolt throw
- Mushroom and shootbolt striker plates interlock for maximum security
- Passive shootbolt for security purposes only
- Compression is achieved by adjustable mushroom bolt on sash rebate sizes over 400mm
- Tested to 7.4kN (more than double the current requirements of BS 7950:1997)
- Endurance tested to over 40,000 operations
- Manufactured to ISO9001/2
- 7.7mm and 9mm mushroom cam heights available (320-400mm extension arms come without mushroom cams)
- BBA approved - 1469

Mushroom

Shootbolt

Shootbolt Technology
Setting a new one-size-fits-all
standard!

With MKV from MACO, you can finally have it all! An ultra-versatile shootbolt system that works with virtually any window type, material and style, as well as delivers market-leading security and performance, all carefully engineered for a fast, trouble-free fit!

Keeping things solid and simple for fabricators

- 21mm Universal back set as standard
- Ultimate adaptability - 1 size fits all profile systems (20, 21 & 21mm)
- Reduced stock holding – no need to carry stock of multiple lock variants
- Lock case is both smaller and stronger than traditional lock cases
- Smaller lock case means less routing prep and maximum sash strength

Achieving a perfect fit, faster and fuss-free

- Stronger mushroom cams
- Make even minute tweaks easily with the new Torx adjustment system
- Fewer screws located on the front plate streamline and simplify manufacturer
- Unique Eurogroove twist locks support simple size setting

Making the grade

- Tested to exceed PAS 24 security requirements
- Unique spindle follower reduces handle operating forces for smooth operation
- Class-leading weather performance and draught proofing
- Top-level corrosion resistance with MACO Class 5 silver finish as standard
- 10-year mechanical guarantee

MACO FLUSH SASH CASEMENT GEARING

Flush Sash Casement Gearing

Flush Sash Extensions for MSPAG Telescopic and MACH II Shootbolt Espagnolettes

These new extensions from MACO have been specifically developed to accommodate increasingly popular flush casements for clean, square lines that look great on traditional and contemporary properties alike. **Unlike traditional flush sash systems, these new extensions have a second double mushroom cam on the faceplate which allows an aerating night vent position.** They work with MACO MACH II Shootbolt Espagnolettes or MACO Telescopic Shootbolt Espagnolettes, come with a 10-year mechanical guarantee and are PAS 24: 2016 compliant.

Key features and benefits:

- Second double mushroom cam delivers **night vent facility** - a big improvement from single night vent products
- Available with 7.7 or 9.0mm mushroom cams
- All screw fixings are located on one face for **simpler, faster fabrication** - saving you valuable time
- PAS 24: 2016 certified for **enhanced security performance**
- Adjustable throw shootbolts - giving you increased flexibility
- Adjustable mushroom cam in the locked position
- **Durable** - endurance tested to Grade 5, 25,000 cycles EN 13126 Part 4
- **Long-lasting corrosion-resistant** silver-look finish tested to 480 hours Class 5 EN 1670
- 10-year mechanical guarantee for **trouble-free operation**

Wrap-around Gearing For Large Top Hung Casements

- These MK2 extensions allow large top hung windows to benefit from an additional locking point on the side of the sash between the hinge and the shootbolt
- The range consists of 2 shootbolt extensions covering a sash rebate width of between 500mm and 1100mm and 3 sizes of centre locks for fitting to the hinge side
- Due to the different geometry of the locking mechanism on the bottom and side of the casement, the nightvent function is not available
- The MK2 standard gearbox should be used with the wrap-around gearing not the MK2 short gearbox

SASH SEAL ENHANCEMENT

WINDOW PRODUCTS LIMITED

Bow-Constrictor Sash Seal Enhancement

Alternative to wrap-around gearing

This clever spring device can be used to improve the seal of a sash at the vertical side of large top-hung windows. It can also provide a cost-effective, more tolerant alternative to the wrap-around gearing commonly used on oversized casements.

- Recommended for use on windows over 1200mm tall
- Bow-Constrictors should be fitted just after the end of the friction stay
- Allows use of the night-vent locking position when required
- Packers and keeps included for every profile
- Quality manufactured in the UK
- White in stock. Also available to order in brown and tan

SPRING SIZE 10mm	BOX QTY.

...The Strength of Hardware Design

Stallion 2 Shootbolt

- Quick-fit telescopic shootbolt for eurogroove systems
- Unique 'clip-in' positioning in eurogroove
- 22mm backset with small gearbox suitable for most 20mm systems
- Automatic self-setting action always finds the required length
- Rising locking cams to maximise engagement and frame clearance
- Has been assessed under report BBA 2275
- Secured By Design licensed locking system

HINGE PROTECTORS

Hinge Protectors

SAC Bolts

- For use with both 13 and 17mm friction stays
- Pressed steel with clear zinc passivate finish
- Will assist in passing BS 7950 when used in conjunction with a side hung hinge
- Will outperform a diecast equivalent
- Can be retrofitted to add additional security

- SAC bolt hinge protectors for casement windows
- Interlocking mechanism designed to lock-out and become stronger when a window is under attack by intruders
- Ensures a window returns each time to the prescribed position, thus extending the life of friction stays and windows as a whole

13mm	17mm	BOX QTY.
HIN99100	HIN99101	50 Sets of 4

Friction Hinge Packer

- Packer designed to suit standard friction hinges with an 18mm track width
- Packer will allow any 13mm stack hinge to become a 17mm stack
- 3 packers are needed per hinge so a total of 6 are required for a pair of hinges
- Only available in white, but when the window is closed it will be concealed

PART CODE	BOX QTY.
HIN023199	50

Stay-Guard Window Hinge Protector

Stay-Guard provides a simple and effective way to enhance window security. This hinge-protection device can be fitted to PVCu windows to defend all types of stays against attack, including standard, egress and easy-clean window hinges. The Stay-Guard goes beyond meeting PAS 24 requirements to give you the ultimate security performance.

- Achieves hook engagement twice that of rival products for greater protection
- Made from high-tensile steel in the UK
- 240 hours salt spray
- Stay-Guard should be fitted into reinforcement no less than 10mm from the edge of the sash to achieve the best performance
- Available in various sizes to suit different stack heights

- Suitable for use on wood, aluminium, PVCu and steel window frames
- Cable length: 200mm
- Allows maximum 89mm opening to comply with child safety function of BS EN 13126-5:2011
- Independently tested to withstand a breaking force of 1971N
- (RST90000) CLS1 and (RST91000) CLS3 combi restrictors are both secured with a standard key mechanism
- (RST92000) CLB1 restrictor has a captive key disc lock mechanism, so the key won't get lost when open
- The sash fixing point for the CLS3 combi Cubelock fits behind the window handle and the locking mechanism fits directly below on the frame
- Includes tamper-proof screws to reduce the likelihood of abuse

CLS3

CLB1

TYPE		LOCK MECHANISM	FINISH	BOX QTY.	PART CODE
	<p>CLS1 Supplied with key, tamper proof screws, and sash & frame parts</p>	Standard Key	White	10	RST90000

Concealed Restrictors

- Spring-loaded releasable arm
- Manufactured from stainless steel
- Complies to BS 6375 : Part 2 : 1987
- Ideal for retrofitting
- Different restrictor stud heights available for different profile stack heights

NB: studs are ordered separately. See below for details

LEFT HAND	RIGHT HAND	BOX QTY.
RST42011	RST42012	50

Releasable Stay

- Locking friction arm mechanism is released using the key
- This allows the vent to open to its full opening potential, facilitating the cleaning of the exterior glass from inside the property, before being re-engaged to retain the restricted opening
- For use in a 16mm cavity
- Manufactured in austenitic steel
- Non-handed product
- Easy to fit, no routing required
- Can be used on windows without reinforcement

SIZE	DIM A	DIM B	DIM C	PART CODE	BOX QTY.
6 inch	49.5	140.5	101.6	CRS21060	25 Pairs
8 inch	199.5	182.0	152.0	CRS21080	25 Pairs
KEY	-	-	-	CRS21999	250

Concealed Restrictor Studs

- Restrictor stud for use with the Kore by Window Ware concealed restrictors
- Profile stud heights related to friction hinge stack height i.e. 13mm stack = 9.5mm and 17mm stack = 14.5mm stud heights

9.5mm	11.5mm	14.5mm	BOX QTY.
RST10095	RST10115	RST10145	50

Res-Lok Concealed Restrictor

- Designed to suit side hung or top hung applications
- Auto-locking
- Key releasable
- Suitable for PVCu, aluminium & timber
- Eurogroove or surface mounted
- Can be retrofitted
- Restricts sash to 100mm
- Conforms to BS 6375 Part 2:1987
- Constructed from stainless steel & zinc alloy

NB: screws & studs sold separately

LEFT HAND	RIGHT HAND	BOX QTY.
RST50001	RST50002	50

STUDS	BOX QTY.

Sash-Seal Prevents Sash Bow and Leaks

This highly-effective spring device serves two purposes; to improve the seal of a sash on the hinged side of a window and prevent the sash from bowing. Whenever the window is closed, the sash spring pushes against the frame wedge to ensure a firmer seal. Sash-Seal can help to reduce the likelihood of leaking casements on PVCu, timber and aluminium frames, as well as improve their performance and lifespan for reduced call-outs and satisfied customers.

- Helps keep windows weathertight and reduces risk of bowing
- Fits in the middle of the window
- 1 set required per sash
- Universal fitting – versions available for all 13mm and 17mm stack height systems
- Quality manufactured in the UK
- White and black in stock. Grey, brown and tan also available to order.

COLOUR	WHITE	BLACK
13mm	GTS10013	GTS10513
17mm	GTS10017	GTS10517
BOX QTY	200	200

Sash Locating Wedges

- Ensures positive closure of casement windows
- Helps prevent sashes from bowing
- Improves weather-sealing
- Compatible with any system which incorporates full depth euro groove and takes a 17mm stack friction stay

NB: Please contact our sales office to confirm profile suitability

WHITE	BROWN	BOX QTY.
WED300111	WED300112	100

Sash Locating Wedges

TYPE		INFORMATION		
BS EN 1670:2006		Corrosion resistance to BS EN 1670: 2006 Grade 3 is the recommended minimum requirement for most hardware components. However in particularly corrosive environments such as coastal regions or industrial areas, a higher grade 4 or 5 corrosion resistance may be required to prolong service life. Remember that any door and window hardware will last longer and perform better with regular maintenance as specified by manufacturer guidelines.		
GRADE	CORROSION RESISTANCE	TEST EXPOSURE TIME	SERVICE CONDITIONS	
0	No defined	-	No specific service conditions where a defined corrosion resistance is not relevant.	
1	Low	24hrs	Service indoors in warm dry atmospheres.	
2	Moderate	48hrs	Service indoors where condensation may occur	
3	High	96hrs	Service outdoors where occasional or frequent wetting by rain or dew may occur	
4	Very high	240hrs	Service outdoors in very severe conditions	
5	Exceptionally high	480hrs	Service outdoors in exceptionally severe conditions where longterm protection of the product is required.

ProLinea Smart Spindle™ Locking Espagnolette Handle

The Mila smart spindle espagnolette window handle lets you mix and match components to suit your specific hardware requirements while keeping your stock holding to a minimum. First pick your preferred finish, then choose from interchangeable spindles in 5 lengths ranging from 9-55mm to effectively give a one-size-fits-all espag handle. It's a flexible, fail-safe repair hardware solution designed to suit most common UK PVCu profile systems.

Highlights

- Suitable for PVCu, aluminium and timber windows
- Supplied with a 9mm spindle as standard
- Spindle lengths sold separately: 15, 30, 43, 55mm
- Easy-fit spindles can't be inserted the wrong way into the handle thanks to one-way rosette
- Positive stop rosette gives audible click when lever is rotated through 90°
- Edge-to-edge cover caps achieve clean aesthetics
- Ergonomic button and finger grips on the lever give user comfort and control
- Made from strong, durable zinc alloy
- Additional cover caps and keys available

Guarantees and certifications

- Security tested to PAS 24: 2016
- Durability tested to 50,000 cycles with a 10-year mechanical guarantee
- Corrosion resistance:
 - Plated finish salt spray tested to 240 hours with 5-year guarantee
 - Painted finish salt spray tested to 480 hours with 10-year guarantee

HERO ESPAGNOLETTE HANDLES

Hero Locking Espagnolette Handle

These hero espag window handles from Mila are a great choice for exacting fabricators who want crisp, modern styling to work with most profiles, plus industry-standard quality and guaranteed performance - all wrapped up with a competitive price tag and intelligent packaging that reduces their waste, keeps costs low, optimises deliveries and maximises their stock holding.

Key features

- Push to open, key lockable window handle
- Modern, uncluttered stylish design that compliments the rest of the hero range
- Rounded lever grip contoured for comfort
- Smooth-functioning ergonomic locking button which is colour-coordinated on white and black handles, black finish on gold and chrome handles.
- The patented easy-slide colour-matched screw cover cap is less fiddly to fit and less likely to get lost
- 2 spindle lengths to suit most profiles – 30 & 40mm
- 5 popular finishes – white, black, polished chrome, satin silver or gold
- Spare screw covers available
- Box quantity: 10
- Outer carton quantity: 50 (white & black finish) 40 (chrome & gold finish)
- Pallet quantity: 2800 (white & black finish) 2520 (chrome & gold finish)

Guarantees & accreditations

- Independently tested to 50,000 cycles with a 10-year mechanical guarantee to ensure trouble-free service
- Corrosion tested to 240 hours salt spray with a 10-year painted surface finish guarantee and 5-year plated surface guaranteed for assured weather resistance
- Strength tested to 50kg

Regal Monkey Tail Espag Handle

Inject distinctive character and timeless elegance into virtually any type of window with this monkey tail window handle from Regal Hardware. For any fabricator who needs to source period casement fasteners for UPVC windows and flush sash systems, this traditional casement fastener provides a cost-effective, off-the-shelf solution. The key-locking design offers enhanced aesthetics and modern convenience over other heritage-style handles which use Allen keys to secure them shut. The slim backplate fits the narrow sightlines typical of flush sash windows perfectly, ensuring the handle won't catch on the frame or overlap the bead line. Matching monkey tail window stays are also available, along with working or dummy pegs to suit any application.

Key features:

- Traditional monkey tail window handle
- Key-lockable design conveniently secures window
- Extensive choice of eye-catching finishes: electro gold, antique bronze, white, chrome, satin, graphite, pewter patina, black and bronze red tint
- Left- or right-handed variants available
- Fits both flush sash and 70mm systems
- Spindles available in 3 sizes (35mm, 40mm, 55mm) and come ready-marked at 5mm intervals to make cutting to size simpler
- Can be purchased with extra keys if preferred
- Spare keys available separately
- Screw to screw dimensions 42mm

Specifications:

- 10-year mechanical guarantee on all hardware
- **White, chrome, black, gold and graphite product guarantees:**
10-year surface finish warranty against peeling, cracking or discoloration
Corrosion tested to BS EN 1670 Grade 5
Salt spray tested for 480 hours
- **Pewter, antique bronze and bronze red tint product guarantees:**
1-year surface finish warranty against peeling, cracking or discoloration
Corrosion tested to BS EN 1670 Grade 3
Salt spray tested for 96 hours

Regal Pear Drop Espag Handle

Inject a heritage design into almost any type of window with this pear drop window handle from Regal Hardware. Suitable for UPVC windows and flush sash systems, this traditional casement fastener provides high quality at a great price point. Secure key locking, and a slim backplate ensures the handles fit on the narrow sightlines typical of flush sash window perfectly, so there's no overlapping the bead line or catching on the frame. Matching pear drop window stays are also available, along with working or dummy pegs to suit any application.

Key features:

- Traditional pear drop window handle
- Key-lockable design conveniently secures window
- Extensive choice of eye-catching finishes: electro gold, antique bronze, white, chrome, satin, graphite, pewter patina, black and bronze red tint
- Left- or right-handed variants available
- Fits both flush sash and 70mm systems
- Spindles available in 3 sizes (35mm, 40mm, 55mm) and come ready-marked at 5mm intervals to make cutting to size simpler
- Can be purchased with extra keys if preferred
- Spare keys available separately
- Screw to screw dimensions 42mm

Specifications:

- 10-year mechanical guarantee on all hardware

Regal Hardware 10 inch Monkey Tail Window Stay

for Flush Sash & 70mm Profiles

Designed to coordinate perfectly with the Regal Hardware monkey tail window handles, these monkey tail window stays really do look the part on both on modern and period properties alike. Designed to fit flush sash and 70mm window systems, this sleek heritage-style monkey tail casement stay can deliver ornamental or full-functioning capability when combined with either dummy or working window pegs. Thanks to Regal Hardware, there's never been a more cost-effective, easier way for fabricators to add period style window furniture to their product portfolio.

Key features:

- Traditional monkey tail window stay
- Coordinates perfectly with monkey tail locking window handle from Regal Hardware
- Extensive choice of eye-catching finishes
- Fits both flush sash and 70mm systems
- Combine with dummy or working window pegs to suit preferred application

Specifications:

- 10-year mechanical guarantee on all hardware
- **White, chrome, black, gold and graphite product guarantees:**
10-year surface finish warranty against peeling, cracking or discoloration
Corrosion tested to BS EN 1670 Grade 5
Salt spray tested for 480 hours
- **Pewter, antique bronze and bronze red tint product guarantees:**
1-year surface finish warranty against peeling, cracking or discoloration
Corrosion tested to BS EN 1670 Grade 3
Salt spray tested for 96 hours

Regal Hardware 10 inch Pear Drop Window Stay

Part of the coordinating Regal Hardware range, these high-quality pear drop window stays will inject heritage charm into almost any type of window. Suitable for flush sash and 70mm window systems, our traditional-style pear drop casement stays suite perfectly with the pear drop window handle and will provide a truly authentic look. Whether the stay needs to be fully functional or purely for decoration, simply pair with the correct dummy or working window pegs. respectively.

Key features:

- Traditional pear drop window stay
- Coordinates perfectly with Regal Hardware's pear drop key locking window handle
- Extensive choice of eye-catching finishes: electro gold, antique bronze, white, chrome, satin, graphite, pewter patina, black and bronze red tint.
- Fits both flush sash and 70mm systems
- Combine with dummy or working window pegs to suit ornamental or full-functioning applications

Specifications:

Regal Hardware Dummy & Working Window Peg Stays (pack of 2)

for Flush Sash & 70mm Profiles

These pegs work with the key-lockable heritage-style monkey tail and pear drop window handles and stays from Regal Hardware. The result is a coordinated collection of beautiful window furniture that works with both flush sash and 70mm systems to retain character in period houses, as well as inject traditional charm with a modern twist into contemporary properties. Choose from dummy or working window pegs to achieve ornamental or fully functional capability. Thanks to Regal Hardware, there's never been a more cost-effective, easier way for fabricators to add period style window furniture to their product portfolio.

Key features:

- Traditional heritage-style window pegs
- Coordinate perfectly with Regal Hardware's key locking window handles and stays
- Extensive choice of eye-catching finishes: electro gold, antique bronze, white, chrome, satin, graphite, pewter patina, black and bronze red tint
- Fits both flush sash and 70mm systems
- Dummy or working window pegs to suit ornamental or full-functioning applications
- 2 x pegs per pack

Specifications:

Xpert

Caldwell folding openers provide a safe, hard-wearing, simple-to-use and cost-effective way to achieve restricted opening on casement windows in public or commercial buildings like schools, hotels, hospitals and offices. They are gravity dependant and therefore best suited to top-hung windows, although they may also be fitted to bottom-hung, fully reversible and pivot windows. The wide range of fixing brackets available on folding openers mean they are suitable for use on aluminium, PVCu, timber, steel and composite windows.

When it comes to building a best-fit folding opener system, product selection depends, in the first instance, upon the position of the window i.e. is pole operation required? This dictates the

type of folding opener used. The next key consideration is the step size and screw centre. These measurements vary according to the casement profile and are critical to achieving a robust, full-functioning system.

Key Features:

- Configurations to suit virtually any profile
- Standard folding openers give a sash movement of 150mm, shorter openers are available on request.
- Resilient anodised satin silver finish
- Quality manufactured to BS EN ISO 9001: 2008
- Corrosion resistant to BS 7412: 2007
- Open/close cycle tested in excess of 100,000 cycles

Hand operated system shown

Pole operated systems

Wherever windows are high up or hard-to-reach due to obstructions, pole-operated folding openers provide a more durable and economical manual way to control windows remotely compared to electronic systems. The recommended high-level configuration usually comprises of 110/111 series or 'pork chop' folding openers, a pre-drilled tandem bar and a 263 tandem eye which can be operated easily and effectively by a boss pole.

110 Type High-level Folding Opener

PVCu Fitting

Aluminium Fitting

Timber Fitting

Hand operated systems

On low-level or easily accessible windows that can be safely operated by hand, the type 112 opener is the recommended choice. These openers can be linked by an undrilled tandem bar as there is no need for a tandem eye.

112 Type Low-level Folding Opener

Call sales on **01234 242724** to request your printed copy of our Fabricators Manual or download a PDF now at windowware.co.uk/caldwell/literature/fabricators-manual-for-caldwell-folding-openers.pdf

Flush & Stepped DuoFlex Folding Openers

Stepped DuoFlex folding openers

These great-looking, curvy folding openers achieve the perfect balance of form and functionality! Modern aesthetics combine with flexible design features to produce an adaptable folding opener system that gives secure restricted opening and can easily accommodate a range of step sizes from 0-26mm with simple adjustment and no need for packers. That makes DuoFlex stepped openers ideally suited to most types of top-hung or centre-pivot outward opening PVCu windows.

- Suitable for use on PVCu window frames
- Contemporary, sleek styling
- Easy-fitting and completely adjustable without packers to accommodate 0-26mm step sizes

- Distance between fixing centres: 48mm
- Minimum sash height: 250mm on windows with butt hinges. 400mm where friction hinges are used.
- Gives 150mm throw when opening and closing sash
- Over centre design gives secure locking when the window is closed
- Cycle tested to over 100,000 operations
- Available in silver grey and white finish. Other RAL colours available on request
- Made in UK
- Materials: Aluminium alloy with plastic washers or bushes fitted to all moving joints

Tip: We recommend you use a single opener on sash width up to 500mm, two openers plus link bar on sash widths 600 to 900mm and three openers plus link bar for sash widths 900 to 1500mm.

Pole operated system shown

Flush DuoFlex folding openers

With flexible, fully-adjustable, packer-free fitting, this DuoFlex window opener can ably achieve safe, secure restricted opening on a range of open-out, flush-style window frames made from timber, aluminium or steel. Cycle tested to beyond 100,000 operations and constructed from strong, corrosion-resistant aluminium, these openers promise enduring, trouble-free service and superior pristine aesthetics.

- Fits most timber, aluminium or steel window frames
- Suitable for open-out top hung and centre pivot sashes
- Attractive and stylish design
- Fitter-friendly and easy to adjust to suit 0-10mm sash step sizes

- No need for packers
- Distance between fixing centres: 29mm
- Minimum sash height: 250mm on windows with butt hinges. 400mm where friction hinges are used.
- 150mm throw when opening and closing sash
- Over centre design gives a secure lock when the window is closed
- Cycle tested to over 100,000 operations
- Available in silver grey and white finish. Other RAL colours available on request
- Made in UK
- Materials: Aluminium alloy with plastic washers or bushes fitted to all moving joints

Tip: We advise that you use a single opener on sash width up to 500mm, two openers plus link bar on sash widths 600 to 900mm and three openers plus link bar for sash widths 900 to 1500mm.

Minimum window height for full 250mm travel of T100 - 500mm

Chain openers fitted on windows less than recommended height must have opening restricted to 30% of the vent height using the T700 spring stop or T720 brass stop to shorten the cable run.

For safety reasons we recommend fitting side support stays to all bottom hung, open-in windows. For bottom hung applications you must fit the THL8200/0/1/5 fixing kit (see page 72) (sold separately).

Maximum Control Run

OPERATOR	MAXIMUM CONTROL RUN
T200	30 metres
T250	18 metres
T300	18 metres

Spent Travel Conduit

To allow for the forward/backward movement of the inner cable, a length of "spent travel" conduit must be fitted at either end of the control path i.e. past the last chain/screw jack and below the operator (except the T250 midi operator (see page 73) which has an integral "spent travel" tube).

TYPE OF OPERATOR	SPENT TRAVEL CONDUIT
SJ138600 Screw Jack	2.5m (for full 380mm travel)
T100 Chain Opener	0.3m

Call sales on **01234 242724** to request your printed copy of our Highline Brochure & Order Form, or download PDF versions now at windowware.co.uk/highline/literature/highline-window-controls-brochure

Number Of Openers Per Vent

Type Of Operation

LOAD = No. of chain openers + No. of bends in conduit

The above figures are based on a single bend in the conduit path. For each additional bend deduct 1 metre from the Vented Length total.

The figures used in these charts are based on windows with 4mm double glazed units fitted to butt hinges or free pivots, not friction stays. Please refer to our sales or technical department for advice if friction stays are fitted.

Installation Examples

HIGHLINE® T100 Chain Openers WINDOW CONTROLS

This compact window opener is one of the most popular choices in the range. It's neat, discreet and can be fitted to most top, bottom, and side hung windows to give a generous 250mm opening stroke for excellent natural ventilation.

- 250mm travel length
- Made to last from substantial zinc castings and aluminium extrusion
- Can be fitted on its own or linked with multiple T100 openers and controlled from a single T250, T200 or T300 mini operator
- Fixing plates and bracket fixing kits available to suit most window profiles
- Available in white, grey and black

HIGHLINE® T175 Locking Manual Openers Bottom Hung Open-In

This opener is ideally suited to bottom-hung windows fitted with butt hinges or 'Hopper'- style casements that open inwards. It's small enough to fit snugly where space is limited between the reveal and moving frame. Because the moving sash is opened by the strength of the cable alone without the support of any conduit, this opener is better suited to small vents only.

- Works with the helical steel cable (THL41000)
- Used with the T250 or T300 operator on bottom-hung windows
- Maximum opening stroke 250mm
- Supplied with mounting brackets
- Available in white, grey and black

TIP: Operate multiple vents by linking locking openers using a rotary junction box.

Roof Vent Horizontal Pivot

SJ138600 Screw Jack Opener

This strong and rigid screw jack actuator gives great opening power, perfectly suited to single or multi-operation of banks of medium-sized (>500mm) and heavier casements. It's particularly useful for controlling the opening pitch of roof lights, as well as operating top-hung windows and horizontal pivoting windows. One thing to bear in mind is that, depending on the application, there can be a lot of spent travel to accommodate (see page 70). This will need taking into consideration with the positioning of the system.

- Sill-mounted screw jack used with T200 maxi handle
- High-powered opener strong enough for use on heavy casements
- Maximum opening stroke: 380mm
- Available in white

T250 Manual Midi Operator with Handle

This midi window winder is a popular choice to operate manual window opening systems. Any spent travel (see page 70) is neatly and safely enclosed inside the casing, well away from prying fingers, making it ideal for use in schools and hospitals.

- Can only be used with the T100 and T175 manual openers due to restrictions on the amount of spent travel the casing can accommodate. This allows for a maximum opening of 250mm
- Includes T275 handle, T410 spent travel tube and T720 brass stop
- Remember to allow room for the handle to rotate through 360° (diameter of atleast 220mm)
- Use the brass stop included to set the opening size anywhere from 0-250mm
- Available in white, grey and black

Want a window opening wider than 250mm?

HIGHLINE MANUAL WINDOW CONTROLS

HIGHLINE® T200 Maxi Operators inc. Handles

If you need to control multiple windows or vents with linked cable runs from a single window winder, or you need to work heavier casements, then this capable, robust manual operator is your best choice thanks to its powerful gearing and heavy-duty construction.

- Capable of operating multiple windows
- Heavy-duty metal case
- Compatible with the T100 chain opener and T175 locking manual opener
- Includes T275 handle and fixings
- Remember to allow room for the handle to rotate through 360° (diameter of at least 220mm)
- Available in white, grey and black

TIP: Operating multiple windows within Schools if the conduit is covered.

Conduit End Cap

HIGHLINE
WINDOW CONTROLS

Works with the Highline manual window controls range. This moulded plastic conduit plug seals off the end of the conduit run which houses spent travel for a neat, fully enclosed finish. Available in white, grey and black finish.

COLOUR	PART CODE	BOX QTY
White RAL9010	THL83000	100
Grey RAL9006	THL83001	100
Black RAL9005	THL83005	100

HIGHLINE® Window Control Cable

WINDOW CONTROLS

This dry-lubricated helical cable runs inside the conduit to drive the window opener from the winder operator handle. Available in 1-metre lengths.

Remember to allow enough cable for spent travel

To allow for the forward/backward movement of the inner cable, a length of "spent travel" conduit must be fitted at either end of the control path i.e. past the last chain/screw jack and below the operator (except the T250 midi operator (see page 73) which has an integral "spent travel" tube).

TYPE OF OPERATOR	SPENT TRAVEL CONDUIT
SJ138600 Screw Jack	2.5m (for full 380mm travel)
T100 Chain Opener	0.3m

DESCRIPTION	SIZE	PART CODE	BOX QTY
Inner Cable	1m	THL41000	50m

HIGHLINE® 3-Piece Conduit Saddle Bracket

WINDOW CONTROLS

Part of the Highline manual window controls range. This neat, 3-piece saddle bracket can be fitted to non-masonry surfaces such as window frames to hold the conduit for winding gear firmly in position. This helps to create a professional, tidy finish. Available in white, grey and black.

COLOUR	PART CODE	BOX QTY
White RAL9010	THL80000	100
Grey RAL9006	THL80001	100
Black RAL9005	THL80005	1

HIGHLINE® Plastic Conduit Saddle Bracket

WINDOW CONTROLS

Part of the Highline manual window controls range. This moulded plastic saddle bracket is quick and easy to fit straight to the window frame to secure the conduit for winding gear in place. Available in white, grey and black.

COLOUR	PART CODE	BOX QTY
White RAL9010	THL80010	10
Grey RAL9006	THL80011	10
Black RAL9005	THL80015	10

Cable Conduit Connector **HIGHLINE** WINDOW CONTROLS

This three-part metal connector is part of the Highline window controls range and is used to connect two lengths of conduit together to create a longer run of conduit. Each connector consists of a two-part metal sleeve and a plastic collar for a secure fit. Available in white, grey and black.

COLOUR	PART CODE	BOX QTY
White RAL9010	THL50000	10
Grey RAL9006	THL50001	10
Black RAL9005	THL50005	10

Swage Tool

HIGHLINE
WINDOW CONTROLS

This swage or conduit tool is an essential piece of kit for Highline window control systems. It's used to form the groove in the end of the conduit so it can be securely located into the ridges on the collar of the operator or opener.

DESCRIPTION	PART CODE	BOX QTY
Swage Tool	THL99999	10

Conduit Bend Former

HIGHLINE
WINDOW CONTROLS

If you're installing Highline manual window controls, you'll need this bend forming tool to create the ideal curve in your conduit with a radius of 90mm for smooth, unhindered cable travel.

Product Information

The Highline electric window controls range offers reliable, flexible and cost-effective systems to automate the opening of vents and high-level windows for natural ventilation. Natural ventilation improves the air quality of inside spaces by allowing clean, fresh air to enter the building while letting stale air out.

Our range of motorised single chain actuators are controllable from either a simple switch or a digital control panel with temperature, wind or rain activation. The 230V AC actuators featured in this brochure all run off standard mains electricity and are available from stock. 24V models for use in bathrooms and kitchens are also available by special order only.

Highlights of the range include the ever-popular ACK4 chain actuator (sometimes referred to as the MAC) with its 7 opening positions ranging between 100mm to 400mm and fitting brackets for most applications. Then there's the newer Micro EVO Actuator. Versatile enough to adapt to any application, it incorporates a synchronisation feature which lets you easily link several actuators together on the same window – perfect for operating wider casements.

We also have access to lots of other actuators and controls not shown in this brochure, so if you need something you can't see here, why not give our technical team a call on 01234 242724 to discuss your specific requirements.

Call sales on **01234 242724** to request your printed copy of our Highline Brochure & Order Form, or download PDF versions now at windowware.co.uk/highline/literature/highline-window-controls-brochure

ACK4 Chain Actuators 300N

If you want complete control over how far your vents open, then the ACK4 electric chain actuator gives no less than 7 different stroke positions from 100mm up to 400mm, so you can achieve your desired level of ventilation. With a strong die-cast aluminium casing, a robust double-link stainless steel chain and a maximum thrust force of 300N, the ACK4 actuator is a hard-working, reliable choice for your window control system.

- Suitable for use on most windows and lightweight roof vents and domes
- Adjustable opening stroke with 7 positions from 100-400mm
- Strong die-cast aluminium casing
- Robust double-link stainless steel chain
- High protection class IP 55 rated
- All electrical parts are double insulated
- Audible alarm sounds when installed incorrectly
- Supplied with 1.5m cable
- Brackets and fixings available to most applications (all sold separately)
- Available in white

HIGHLINE ELECTRICAL WINDOW CONTROLS

HIGHLINE® C30 Chain Actuators 330N

This single-chain actuator comes as standard with a selection of different brackets making it suitable for mounting onto top and bottom hung windows. It delivers a maximum push/pull thrust force of 300N which is sufficient to operate most windows, lightweight roof vents and domes. The opening stroke can quickly and easily be adjusted at 200mm or 380mm simply by turning a knob on the outside of the casing.

- Single chain actuator with 2 travel positions (200mm or 380mm)
- Strong composite casing
- All electrical parts are double insulated
- High protection class IP 30 rated
- Features a robust centrally positioned double-link stainless steel chain with a buzzer alarm that sounds in the event of incorrect installation
- Supplied with 1.5m cable
- Comes complete with C30/SB standard bracket and C30/BHB bottom hung bracket
- Available in white

Micro EVO Acuator 230v

If you need high-level electric window controls for a wide casement, then the Micro EVO actuator is just the job. Its integrated synchronisation function means you can easily link up as many as 4 actuators to work together on single window on site and straight out of the box - no need for a separate sync module.

- 4 selectable opening strokes (100-400mm)
- Suitable for most window types and roof vents
- Soft-stop closing for reduced wear on the window frame and actuator
- All electrical parts are double-insulated - Class II AC version – Class III DC version.
- Aluminium casing
- High protection class IP 32 rated
- Double-link chain with anti-corrosion treatment
- Can be easily synced on site to work as a group of up to 4 actuators on wider casements
- Supplied with standard and bottom hung quick-release fixing brackets

HIGHLINE® Control Unit For Natural Ventilation Window Controls WINDOW CONTROLS

This compact window control unit is a great way to automatically achieve natural ventilation and ensure a more comfortable environment in stuffy rooms or stifling conservatories. With the digital display, it's quick and easy to program the system to automatically open and close windows or roof vents to achieve a specific room temperature, as well as ensure windows are shut and watertight whenever it rains.

- Control unit for 230V AC Window actuators (max output 8 Amp)
- Automatically opens windows if room gets too hot and closes them according to temperature or when it rains.
- Rain sensor and temperature sensor included
- Digital display for simple programming of the desired room temperature
- High protection class IP 4X rated
- Open and close buttons on front of control panel for direct control

Handle of excellence.

Atlanta TBT Handle

✓ Tilt-Safe mechanism

- Range of tilt and turn handles designed to suite with the Atlanta door handle sets
- Positive engagement at 90° intervals
- Built in Tilt-Safe* mechanism controlled by the key
- Available in white, silver, chrome, black, polished brass, and gold finishes

Tilt-Safe

- The Tilt Safe facility allows the window to enter tilt mode when the handle is locked
- The handle will not go past the tilt position without the key
- This gives the handle a child-safe feature whilst allowing airflow through the window

GU UNI-JET Tilt & Turn Hardware Range

GU UNI-JET tilt & turn gearing works hard for fabricators, fitters and users alike. This flexible, universal system is suitable for most window frame materials and applications and supports both manual and machine-based manufacturing processes.

Renowned German engineering combined with intelligent design and compact packaging means your tilt & turn hardware takes up less space in your stock room, plus it's simple to fit and fine-tune. What's more, ultra-smooth operation, excellent tolerances and advanced corrosion resistance all adds up to fewer call-backs too!

Universal and fitter-friendly

- Options for PVCu, aluminium and timber windows
- Precision-engineered - suitable for manual or automated fabrication
- Single universal central locking system can be adapted to suit all applications
- High-security version available by special order
- Fewer components results in faster fabrication and reduced stock-holding
- 'Cleverle' mushroom cam automatically compensates for clearance tolerances and is easily adjusted with a Torx key
- Smart, space-saving packaging
- Choose from face-fix (**GU UNI-JET D**) or fully concealed (**GU-UNI-JET SC**) systems

Enduring practicality

- Super-smooth operation even on large or reinforced windows
- Sash lifter reduces component wear and abuse while ensuring an effortless close action
- Integrated anti-slam device keeps sash in tilt position even in windy conditions
- GU FerGuard silver finish: high-grade corrosion protection salt spray tested to 576 hours
- 10-year mechanical guarantee

Contact sales on 01234 242724 to find out more and build your system

TILT BEFORE TURN - MULTI-MATIC - FACE FIX

MULTI-MATIC - Face Fix Tilt Before Turn

- Fast fitting, fabricator friendly, tilt before turn system
- Zero projection top and bottom and only 20mm lateral projection on hinges stops them interfering with brickwork and plaster lines
- Sash lifter as standard on windows 651mm high and above, ensures a smooth location time after time
- Anti-mishandling device and anti-slam as standard
- Sash weight up to 120KG (80KG as standard)
- Manufactured to EN ISO 9001:2008
- Classification code in accordance with EN 13126-8
- High security (PAS 24), concealed and arched & angled versions available to special order
- Tilt restrictor available
- Part of the MACO Secure Plus guarantee scheme

Maximum sash weight 80kg.
Minimum sash size: 220mm Wide x 470mm High.
Maximum sash size: 1630mm Wide x 2250mm High.

TILT BEFORE TURN - MULTI-POWER - CONCEALED

**MULTI-POWER -
Concealed Tilt Before Turn**

- Concealed (Invisible) - for flush and rebated window systems
- Can be used with the existing MACO MULTI TREND and MACO MULTI-MATIC central locking systems
- Increased burglar resistant security in the hinge area
- Prevents thermal bridges. Perfect impermeability
- No cover caps necessary
- Lateral adjustment of stay hinges and pivot posts without loosening screws
- Three-dimensional adjustments of the pivot post
- Integrated adjustment of the opening angle (90° or 95°)
- Designed for 9mm and 13mm fittings Axis (Eurogroove)
- High security (PAS 24) also available to special order
- Part of the MACO Secure Plus guarantee scheme

Maximum sash weight 130kg.
Minimum sash sizes: 370wmm Wide x 470mm High.
Maximum sash sizes: 1630mm Wide x 2250mm High.

MAC12069	20

Turn Restrictor

- Can be fitted to existing tilt and turn gearing and is generally fitted to the top corner element
- When you operate the handle to move the tilted window into the turn position, the restrictor will block the locking cams, thereby stopping the window from entering the turn position

PART CODE	BOX QTY.
MAC357081	200

System 1

Background Ventilators and Intermittent Extract Fans

The Approach:

- Traditional 'room based' ventilation
- Extract fans located in all wet rooms including bathroom, kitchen, utility & WC
- Background ventilators located in all rooms

What's new for ADF 2010?

Background Ventilation

Whilst the mechanical intermittent extract rates per room remain unchanged, background ventilation rates have been increased by up to 40% for the default infiltration design criteria (< 5ach @ 50Pa)

Key increase mm²	5000
Increases from the requirements of ADF 2006	10000
	15000
	20000

Table 5.2a

Total equivalent ventilator area ^a (mm ²) for dwellings with any design air permeability leakier than (<) 5m ³ /(h.m ²)@50Pa					
Total floor area (m ²)	Number of bedrooms ^b				
	1	2	3	4	5
<50	35000	40000	50000	60000	65000
51-60	35000	40000	50000	60000	65000
61-70	45000	45000	50000	60000	65000
71-80	50000	50000	50000	60000	65000
81-90	55000	60000	60000	60000	65000
91-100	65000	65000	65000	65000	65000
>100	Add 7000 mm ² for every additional 10 m ² floor area				

Notes:

- The equivalent area of a background ventilator should be determined at 1 Pa pressure difference, using the appropriate test method given in Table 5.3.
- This is based on two occupants in the main bedroom and a single occupant in all other bedrooms. For a greater level of occupancy, assume a greater number of bedrooms (i.e. assume an extra bedroom per additional person). For more than five bedrooms, add an additional 10000mm² per bedroom.

What's the impact?

In both apartments and houses, the increased background ventilation rates may result in this ventilation system being unable to be installed effectively. This is especially relevant to apartments with single façades that require background ventilators at both the top and bottom of the window to ensure cross ventilation.

Refer to ADF 2010 for full details.

Example 1:

2 Bedroom Apartment 65m²

- Dual façade with total of 3 windows
- 45000mm² equivalent area = 15,000mm² per window

This is a high performance to achieve over a small number of windows. Based on the ventilators available in the market, there are likely to be 3 vents per window to be installed and therefore may not be achievable within the window sizes. Remember: Single façade also requires ventilation at BOTH top and bottom of the window. The requirement for the dwelling would increase to 90000mm² (30,000mm² per window).

Example 2:

4 Bedroom Property 95m²

- Total of 9 windows
- 65,000mm² equivalent area = 7222mm² per window

With a higher number of windows, the background ventilation requirements may easily be met, however may still result in 2 or 3 vents per window needing to be installed.

51 dB
2500 vent when closed

38 dB
2500 vent when open

High Air Flow
2500mm² EQA
2512mm² Free Area

Link Vents Mk2

- Compact, low-visibility design - canopy extends just 25mm from the window
- Wide choice of solid colours. RAL colour matching and woodgrain finishes also available
- Optimised airflow means the 2500 vent achieves the performance of a vent twice its size
- Small 204mm x 13mm slot reduces routing time and keeps noise levels to a minimum - just 51dB for the 2500 vent in the closed position
- LABC approved guarantees compliance with building regulations
- Can be either screw- or clip fixed for a quick, easy fit
- Robust, sturdy design - no end caps to lose or break
- High thermal performance and excellent colourfastness
- Improved airflow means the vent is smaller and can be fitted in sashes

GREENWOOD ACOUSTIC VENTS

2500EA / 5000EA Acoustic Window Ventilator

The best of both worlds... achieves Building Regulations' EA requirements along with fantastic acoustic performances up to 45dB(A)

- Smallest acoustic window vents (on the market) providing 2500mm² or 5000mm² equivalent area ventilation
- Achieves the best acoustic performance for window ventilators available within the UK – up to 45dB(A)
- A simple, yet adaptable solution to meet required specification/ Building Regulation requirements, incorporating both high levels of equivalent area ventilation and acoustic noise reduction
- Modularity of acoustic sets provides flexibility for installation and acoustic performance
- Excellent airtightness performance with upward air deflection to reduce the risk of draughts
- May require add on section in some window installations

Sets comprise of:

- 1 EA vent + 1 external acoustic module – providing noise reduction with discreet internal aesthetics.
- 1 EA vent + 2 acoustic modules (for internal and external install) – providing maximum noise reduction.

Solid F30/24Z

Solid F30/28Z

These high-quality aluminium window louvres are custom-made to your exact specifications to fit aluminium, timber & PVCu window frames of any size or finish. DucoGrilles provide intensive ventilation ideally suited to all kinds of industrial and commercial buildings. They let in plenty of fresh air to create a healthy, comfortable environment without compromising security. The unique stackable 'Z' shaped blades in the DucoGrille Solid deliver excellent burglar-resistant, weather-proof strength and durability.

- Available in 24mm or 28mm glazing thickness
- P1 Integrated fly screen as standard. P2 Stainless steel bird mesh or NP non-punched mesh (100% screening louvre) also available
- P2 Bird blade with additional 6mm galvanised mesh meets current gas regulations
- Free area: 34% (with fly screen) or 48% (with bird mesh)
- Blades and frame manufactured from extruded aluminium for strength and precision
- Unique clip-free design ensures blades are held fast by the outer frame and won't rattle in exposed areas or extreme conditions
- Independently tested by the BSRIA for water tightness
- Certified for burglar resistance to European Classification Class2
- Quality manufactured to BS EN ISO 9001
- RAL polyester powder coated 60-80 microns with a 10-year finish guarantee
- Recessed (with or without flange) and surface mounted wall louvres also available

Vent-A-Matic Rotary In-glass Fitting Window Ventilator - model 106 DGS

The RW Simon Vent-A-Matic controllable rotary vent is designed to be fitted by the fabricator directly into the glass of double glazed units to provide continuous ventilation to kitchens, bathrooms bedrooms and more.

- Designed to deliver continuous ventilation and conform with Gas Board recommendations
- Cord controlled non-electric fan
- Fits sealed double glazed units 12-32mm thick
- Designed for use on hermetically sealed units so MUST be fitted by the glazing manufacturer unless it's a replacement unit
- Integrated storm guard to help reduce drafts
- Fits a 162mm diameter sized hole
- Achieves airflow performance 6,997mm² EA
- Manufactured from UV stabilised translucent polystyrene to resist yellowing
- Quickly and easily fitted in just two parts into the glass aperture
- For extra weather tightness and security, apply some clear sealant to the external glazing ring
- Produced under ISO 9001 quality systems

Vent-A-Matic Rotary In-glass Window Ventilator - model 106 for single glazed units

Looking for a durable, controllable clear vent to install into the pane of a single glazed window? The RW Simon Vent-A-Matic 106 fits the bill perfectly. Made from tough UV resistance polystyrene, this window vent won't discolour in sunlight to provide a continuous airflow without encroaching on your view.

- Cord controlled non-electric fan
- Fits single glazed units 4-6mm thick
- Delivers constant airflow in line with Gas Board recommendations
- Achieves airflow performance 5897mm² EA
- Suits a 162mm diameter hole
- Manufactured from UV stabilised translucent polystyrene to resist discolouration
- Quickly and easily fitted in two parts into the glass aperture
- An SG6 storm guard is recommended with this model particularly in exposed locations or harsh conditions
- Produced under ISO 9001 quality systems

Vent-A-Matic Static In-glass Fitting Window Ventilator - model DGS/JG

This RW Simon clear and robust Vent-A-Matic static in-glass ventilator fits into double glazed units to provide a discrete and effective way of ensuring a steady and persistent flow of fresh air to any room.

- Provides continuous ventilation and conforms with Gas Board recommendations
- Fits double glazing units 12-32mm thick
- Designed for hermetically sealed units so MUST be fitted by the glazing manufacturer unless this is intended as a replacement unit
- Square louvred internal plate
- Comes with integrated storm guard to reduce drafts even in exposed settings
- Fits a 162mm diameter sized hole
- Achieves airflow performance 7796mm² EA
- Ensure extra weather sealing and security by applying a little clear sealant to the external glazing ring
- Quickly and easily fitted in two parts into the glass aperture
- Manufactured from UV stabilised translucent polystyrene to resist yellowing
- Produced under ISO 9001 quality systems

Vent-A-Matic Static In-glass Fitting Window Ventilator - model DGS/PBS

This RW Simon Vent-A-Matic static ventilator meets Gas Board recommendations to provide a continuous ventilation solution for rooms with open fires, wood burners, boilers and central heating where an ample supply of fresh air is essential to fuel the combustion process efficiently and eliminate the build-up of harmful gases.

- Achieves continuous ventilation in line with Gas Board guidelines BS 5440-2:2000
- Circular outer louvre design
- Fits double glazed units 12-32mm thick
- Designed for use on hermetically sealed units so MUST be fitted by the glazing manufacturer unless it's been bought as a replacement unit
- Comes with integral storm guard as standard to reduce drafts
- Fits a 159mm diameter sized hole
- Achieves airflow performance 9,896mm² EA
- Just two parts to assemble for a fast, simple fit into the glass hole
- Manufactured from UV stabilised translucent polystyrene to resist yellowing
- The unit is secured with a central brass bolt on the inside which can't be removed from the outside
- Produced under ISO 9001 quality systems

VENT TYPE	DGS/PBS
Dim A	5.5mm
Dim B	36mm
Dim C	200mm dia

Airstrip 19000 'Glazed-in' Ventilator

RW Simon leads the way with this top-performing Airstrip 19000 ventilator, which offers built-in updraught facility and variable operating modes that deliver increased airflow capable of meeting Document F 2010 of building regulations. The Airstrip 19000 is installed between the head of the window profile and held in place by the glazing system. This product is also available as a gas vent, delivering a continuous supply of fresh air in line with Gas Board recommendations. Every ventilator is made to measure to suit your specific application. Please use our custom order form to ensure we have all the relevant information needed to provide you with an accurate quote.

Highlights:

- External hood as standard
- Thermally broken / thermally insulated
- Fitted with storm seal in internal flap. Storm locks available if required
- Flap control offers two opening positions between fully open and fully shut
- Permanent trickle (gas), knob, rod and cord operation available
- Suitable for double glazing thicknesses 20, 24, 28 and 32mm
- Glass height reduction 64mm
- Four standard colour options: Black (RAL9005 matt), White (RAL9910 Hicpa satin), Dark Brown Mahogany (RAL8019 matt) & Grey (RAL7016 matt)
- Special colours and dual colours also available

Performance:

- Tested to BS EN 13141-1:2004 achieves 12,931mm² equivalent area
- 5000mm² EA achieved on a length of just 386mm
- 2500mm² EA achieved on a length of just 193mm
- BS 5440-2:2000 compliant
- Water tightness limit of 600pa
- Acoustically tested to BS EN 20140-10:1992, ISO 140-10:1991

Components:

Two aluminium bodies assembled with thermal break, flap with knob controls at both ends (cord/rod control as optional), pair of end caps, 4 x screws, standard fly screen or gas fly screen, glass and ventilator gasket.

Airstrip 400 'Glazed-in' Ventilator

Not only is the Airstrip 400 easy to assemble and simple to install, it's also versatile and achieves superior thermal performance. That's all down to its unique twin shutter system, external hood and thermally broken all-aluminium design, which lets fabricators mix and match the internal/external faces to achieve the exactly the look they're after. The Airstrip 400 is installed between the head of the window profile and held in position by the glazing unit. Every ventilator is custom made to suit your requirements. Please use our special order form to ensure we have all the relevant information needed to provide you with an accurate quote.

Highlights:

- Includes external hood
- Thermally broken / thermally insulated design
- Optional internal updraught deflector
- Twin open and close shutters
- Knob and cord operation available
- Trickle ventilation as standard
- Suitable for double glazing thicknesses 20, 24 and 28mm
- Glass height reduction 45mm
- Four standard colour options: Black (RAL9005 matt), White (RAL9910 Hicpa satin), Dark Brown Mahogany (RAL8019 matt) & Grey (RAL7016 matt)
- Special RAL colours and dual colours also available

Performance:

- Tested to BS EN 13141-1:2004 achieves 4,103mm² equivalent area
- 5000mm² EA achieved on a length of 1,218mm
- 2500mm² EA achieved on a length of 609mm
- BS 5440-2:2000 compliant
- Water tightness limit of 400pa
- Acoustically tested to BS EN 20140-10:1992, ISO 140-10:1991
- Weather performance tested to BS EN 1026:2016 & BS EN 1027:2016

Components:

Supplied assembled. Aluminium body with thermal break and 2 PVCu shutter strips. External hood and fixing screws. Optional internal updraught deflector and fixing screws. Knob or cord control mechanism. Pair of 16mm, 20mm or 24mm end caps. Trickle ventilation baffle plate. 4 x screws. Fly screen and glazing gasket.

To order either the Airstrip 400 or 19000, please contact our sales team on 01234 242724

MULTIPOINT DOOR LOCK BRAND DIRECTORY

Yale®

LOCKMASTER®

- Britain's best selling multipoint locking system
- Wide range of variants suitable for PVCu, aluminium and composite doors
- Available with 92mm single spindle or 92/62mm dual split spindle follower
- 35 & 45mm backsets
- 10 year guarantee

We offer more lockmaster variants than any other distributor, see pages 110, 117-128, 154, 156 & 162-177

Yale®

LOCKMASTER 21

The Yale Lockmaster 21 is the newest iteration of Britain's best-selling multipoint door lock, so called because it comes 21 years after the very first Lockmaster was released. This latest offering delivers the same reliability, ease of use and long service life you've come to expect from Lockmaster, coupled with the usual high levels of security and superior performance, but with some great new features added in:

- Lockmaster's renowned hook and pin unit and precompression rollers are cleverly positioned within 100mm of each other
- Coming soon – The push-in latch snib feature has been specifically designed to prevent accidental lock-outs
- Lockmaster 21 now comes with a secure centre hook as standard
- New hardened screw-in plastic tidy boxes last longer and give a neat, streamlined finish.
- There's a new selection of profile-related packers to choose from.
- A new 13mm axis one-piece keep can withstand greater loads during security testing to create the strongest Lockmaster yet!

Find new Lockmaster 21 products featured on pages 110 & 112-115

LOCKMASTER 21
Still the lock you know and trust, only even better!

Yale®

- YS170 multipoint locking system
- Available for PVCu and composite doors
- DDL ready -- will fit with the Yale Keyfree door lock

LOCKMASTER®

Secure from the second the door is shut – that’s what Yale’s Lockmaster AutoEngage multi-point door lock offers thanks to two security latches which automatically engage instantly from independent trigger points every time the door closes. Simply turn the key to engage the centre dead-bolt deadlock all locking points and fully secure the closed door. The gearbox is located midway down the door making it equally suitable for key or lever operated contemporary doors

- Key retractable auto engaging locking mechanism
- Available in 45mm backset
- 16mm Yale-branded faceplate
- Centre deadbolt operates independently and achieves 20mm secure engagement
- Security latches deliver 20mm full engagement automatically as the door is closed
- Non-handed for minimal stock holding
- Flexible gearbox facilitates key or lever operation
- Suitable for timber and composite doors

YALE SLAM MULTIPOINT DOOR LOCKS

LOCKMASTER®

Lockmaster YAS1-4503-19
Slam Lock, AutoEngage
Heritage with 16mm
Square Faceplate

Achieve greater security from the get-go with the Yale Lockmaster AutoEngage. Every time the door is shut, three separate latch bolts are triggered independently with 20mm of latch engagement each. A centre deadbolt provides the fourth and final locking point. Simply turn the key, to engage the centre deadbolt, deadlock all the locking points and fully secure the closed door. This heritage option features a raised gearbox, making it perfectly suited to more traditional non-lever door styles commonly found on town houses and period properties. An extra security latch ensures even seal compression to prevent leaks or bowing.

- Key retractable auto engaging locking mechanism
- Available in 45mm backset
- 16mm Yale-branded faceplate
- Independently-operated centre deadbolt gives 20mm secure engagement
- Security latches engage by 20mm automatically every time the door is closed
- Non-handed for minimal stock holding
- Flexible gearbox enables key or lever operation
- Fits timber and composite doors

**650 Series Door Lock,
2 Hook, 2 Roller,
Extendable**

The Avantis 650 door lock has been rigorously tested to ensure unbeatable weatherproofing worthy of meeting current British Standard EN 1375, as well as superior security performance that's earned both the Secured by Design stamp of approval and PAS 24 compliance. Designed to last and backed by a 10-year mechanical guarantee, this proven lock provides robust, trouble-free operation perfectly suited to residential properties.

Features:

- 16mm faceplate, 35mm back set
- PZ92/62mm dual follower centre case
- Sash rebates: min. 1852mm (1688mm with reduced handle height). Max. 2200mm
- Class-leading compression: 25mm direct drive centre bolt & optional roller cams
- Accredited protection: large, strong security hooks and exclusive cylinder guard
- Profile-specific fully adjustable one-piece keeps for simple installation
- Suitable for PVCu doors

Guarantees and certifications:

- Tested to PAS 24 & BS 6375
- Secured by Design accredited
- Corrosion-resistant to EN 1670: grade 4
- Tested over 50,000 cycles with a 10-year mechanical guarantee

750 Series Door Lock 2 Hookbolt, Composite or Timber

This high-security locking system for timber and composite doors is armed with an impressive array of defences as standard. Every lock comes with Avantis' unique twin fix cylinder guard, which achieves anti-pick, anti-bump, anti-snap and anti-drill cylinder protection. In addition, the large hook and bolt system is capable of defeating even the most aggressive and determined attack, as well as ensure the door is pulled in top and bottom for a firm, even seal that prevents bowing.

Features:

- 16mm and 20mm faceplates, square and radius cut
- 35mm and 45mm back sets available
- PZ92/62mm dual follower centre case
- Sash rebates: min. 1852mm (1688mm with reduced handle height). Max. 2200mm

C-TS Slave Door Lock 16 x 1500mm Faceplate	No Locking Points	92mm	35mm	Single	MAC24351
C-TS Slave Door Lock 16 x 1500mm Faceplate	No Locking Points	92mm	45mm	Single	MAC243653

Z-TA Slam Lock 2 Hook with 20mm Faceplate

- The Z-TA door lock automatically throws the hook bolts once the door is shut
- Even gasket compression and security over the entire door height
- Additional security can be achieved by turning the key to block the lock mechanism
- 45mm backset with 20mm faceplate and radiused ends for composite/timber applications
- Key will retract all locking points upon turn

NB: Using a standard lever/lever handle allows access from both sides of the door even if the hook bolts have thrown - unless the key has been used to fully lock the door. We recommend that an external fixed pad handle is used with this door lock or that a lever fixing kit is supplied to stop the external handle from operating the door lock from outside

Electric Striker with Key Wind Up Door Lock Setup

How this set up works:

- The wind up door lock allows for a basic security option to secure premises (Ideally suited for a set up where this is the second door into a building and the first door has a higher security level), the first person to enter the building will have to fully wind back the locking points. Once this is done the lock will be held on the latch which can only be released by use of a key or by the electric striker
- The electric striker can be wired into a button in an office or to a keypad set up (Not sold through Window Ware)
- The lever fixing kit allows for the external handle to be fixed into a permanent positioning meaning only people with keys or people let in through the intercom to enter. On the internal handle the spindle should be cut down and put into the lock spindle hole to allow for an unobstructed exit. It is also recommended that a thumb turn cylinder is fitted

CL500 Mechanical Keypad Exterior

- Heavy duty codelock for high access use
- Stainless steel PVD weather resistant, low maintenance finish
- Easy code change as often as required with 2047 codes to choose from
- Code free option available
- Vandal resistant, with stainless steel buttons and clutch protection if the outside handle is forced
- Inside handle always retracts latch for exit
- Reversible handle
- Complete with key code, tweezers, allen keys, escutcheon plates, spare code tumblers & screws
- Designed for timber applications out of the box. For PVCu applications you must take the DKP11001 spindle pack
- PVCu applications must also use a key wind-up bolt

Rhino, 2 Hook Bolt Stable Door Lock

- The GU Rhino Bolt is designed to be cropped and used as a stable door bolt
- Top leaf is operated by a normal door handle and is secured by the lock case with latch and deadbolt and top claw
- Bottom leaf is operated by an internal only tilt and turn handle and is secured by a claw and a roller cam
- The two leaves always operate independently but the door can open as one unit when a snapper catch is used
- The system can work as either an "open-in" or an "open-out" door

Lockmaster Bi-fold Short with 24mm U-channel or AluK profile

Yale's hugely popular multipoint locking system now comes in a slim 28mm backset gearbox specifically designed to secure aluminium bi-fold doors. This 24mm u-channel variant suits the AluK profile to give fabricators and installers a high-security, top-quality, user-friendly bi-fold locking solution that's backed by one of the best-known brands in the business for added confidence and peace of mind.

Key features

- 24mm Yale-branded u-channel variant to suit the AluK profile
- Lockmaster renowned twin hook and anti-lift bolts for enhanced security, strength & usability.
- Deadbolt centre with an easily reversible latch to minimise stock holding
- 28mm backset with PZ92mm centre case
- Slave mechanism for French doors also available
- 2 lock lengths for flexibility to fit a range of door heights
- Quality manufactured in Britain
- Box quantity – 5 locks

Guarantee & certifications:

- Secure - PAS 24: 2016 compliant
- Long service - Tested to 100,000 cycles with a 10-year mechanical guarantee
- Trusted - Yale Lifetime Security Guarantee
- Durable – Anti-corrosion performance tested to BS EN 1670:2007 Grade 4 with a 10-year surface finish guarantee

Material Specifications

- Lock Case: Galvanised Mild Steel
- Faceplate : Mild Steel, BZP and Clear Trivalent
- U-channel: Mild Steel CS4 – ST2473
- Deadbolt and Latchbolt: Zinc Alloy Casting
- Keeps : Mild Steel, BZP and Clear Trivalent

Caldwell Bi-fold Hardware

Hardware to suit all folding door configurations and materials

Features:

- Complete range of hinges, handles, rollers and more
- High-quality components
- Strong and durable
- Smooth slide and open mechanism
- Fully tested to PAS 24

For further details please see pages 337 to 339 or contact our sales office on 01234 242724

Supporting fabricators with essential product information and fitting advice

When you choose fold and slide hardware from Caldwell, you get quality assured products that deliver class-leading mechanical and security performance as standard. All parts are...

- ✓ Security tested to PAS 24
- ✓ Rigorously tested and quality manufactured according to BS EN ISO 9001:2015
- ✓ Designed and built for strength and durability
- ✓ Suitable for door panels up to 100kg and 1200mm wide
- ✓ Covered by a 10-year manufacturer's warranty
- ✓ Ready-to-go with all fittings, fasteners and clamp plates included where required
- ✓ Supplied in boxes of 10 (excl. shootbolt rods, end guides and cones)
- ✓ Available in 4 standard finishes: Black RAL9005, HIPCA White, polished chrome and brushed steel
- ✓ Versatile to suit most door materials and configurations

Want to know more? Our fabricators bi-fold manual has all the answers!

Call sales on **01234 242724** to request your copy or download a PDF now at www.windowware.co.uk/caldwell-literature

This highly-detailed 28-page document is available to download or request free of charge and contains comprehensive information designed to help fabricators with product selection, system build and correct fitting. Inside, you'll find:

Features:

- Example PAS 24 layouts
- Product dimension and technical drawings
- Step-by-step fitting instructions
- Routing details for the Caldwell bi-fold shootbolt gearbox
- Recommended install order for an example layout
- Bi-fold door toe and heel guidance
- Manufacture warranty information
- Width to height ratios to prevent overload

Cobra 2 Hook with FA Double Dead Lock Feature

- Tested in accordance with DIN 18103 (burglar resistant doors) and approved by major UK insurance companies
- 25mm throw solid brass hooks
- 92mm centres
- 35mm backsets available
- Complete with FA double deadlock (BS 10621 functionality compliant FA housing). The FA double dead lock offers two locking cylinders. When a dwelling is unoccupied, both of the cylinders can be locked with the same key. This prevents intruders leaving through the front door by use of the bottom thumb turn barrel.

Set-for-Smart Kubu Door Lock

Think smart locks are too costly or complicated to offer as standard? Think again! The new Kubu smart-equipped lock from Avantis Hardware is bringing smart hardware to the masses – simply and affordably – even for door manufacturers who build hundreds of doors per week! A competitive price point keeps your profit margins intact while clever engineering means Kubu integrates effortlessly into your current production line with no additional work or disruption on the factory floor, and no support burden for the fabricator or installer.

How does Kubu work?

From the moment a door is fitted with a Kubu lock at the factory, it is effectively 'primed for smart'. The homeowner then chooses at any time to purchase the Kubu starter kit and App and switch on smart capability themselves. Set-up is a cinch and takes just 15 minutes, after which they can check lock status remotely, track access and receive real-time notifications anywhere via their smart phone.

It's a no-sweat smart hardware solution

- ✓ **Future-ready and affordable** – easy, low-risk way for fabricators and fitters to offer smart hardware as standard and in volume to capitalize on the Smart Home Revolution.
- ✓ **Fuss-free fitting** – Kubu-equipped door locks are very easy to fit via a standard machine-routed prep, and because the electronic smart module is battery-powered and long life, there's no hardwiring required!
- ✓ **Stand out from the crowd** – This home tech solution adds real value for the homeowner, which all helps to give you the edge over your competitors and drive sales.
- ✓ **No extra work involved** – Fabricators and installers fit the Kubu equipped door lock and leave the homeowner to activate smart capability simply by purchasing a starter kit and installing the module and home hub themselves. You won't have to answer technical queries from consumers either, as there's a dedicated support team to take care of all that.
- ✓ **Free marketing support** – You'll have access to a wide range of free marketing materials to help you explain the benefits, win over customers and grow your business.

Conexis™ L1 Smart Door Lock

Yale has launched the brand new Conexis™ L1 Smart Door Lock, putting homeowners in full control of their home security. The new lock allows users to configure, control and unlock their door all from their smartphone via the new Bluetooth low energy app.

Please note it is suitable for majority of 92mm Centre Locks!

- Operating temperature -15°C to 55°C
- IP55 weather resistant
- PAS 24 compliant
- Low power consumption - batteries last up to 1 year
- 4 x AA batteries
- 2 year guarantee with UK Customer Support

YALE KEYLESS DIGITAL LOCK

Keyless Digital Lock

- Touch screen keypad
- Wireless & battery operated
- Retrofits with most 60mm nightlatches (not included)
- Simple to programme & change your 4 -12 digit PIN code
- User codes and settings remain if batteries are replaced
- Fake PIN feature keeps your PIN code secret and safe
- Temporary PIN code for visitors so no need to reveal your family PIN code
- 3 minute lock out if the code is entered incorrectly 5 times
- Low battery warning with emergency battery connection
- This lock should be fitted in conjunction with a maximum security BS 3621
- Mortice lock to be insurance approved

Specification

- Front body measures 64mm W x 153mm H x 51mm D
- Operating temperature -15°C to 55°C
- IP55 weather resistant
- Cycle tested to 120,000 cycles
- Low power consumption - unlocks up to 10,000 times with one set of 4 x AA batteries
- Blue backlit keypad for night time entry

CHROME	BOX QTY.
YDL11002A	1

Touch the screen with the palm of your hand or fingers to activate.

Enter a PIN code followed by Q button.

Turn knob to open door.

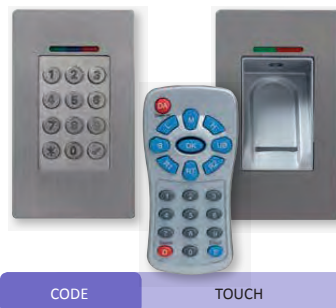

openDoor - Keyless Door Opening

Forget your house keys!

The MACO openDoor access control system gives you the ability to unlock an entrance door without the need for a key. It can be added to the Z-TA Comfort motor-driven door lock. openDoor is available in three doorleaf-integrated versions: TOUCH, CODE and TRANSPONDER-PLUS.

The value of all three system versions can be summarised in a single formula:
Easy operation + security = convenience.

The benefits at a glance: MACO PROTECT Z-TA Comfort door lock + MACO openDoor access control system

- 1 In combination with the 3-latch Z-TA Comfort door lock: Extremely high security thanks to automatic locking of the steel hooks and the central dead bolt
- 2 Standardised installation thanks to the same dimensions with all openDoor solutions
- 3 Pre-assembled plug-in cable: Eliminates the possibility of incorrect connection
- 4 Tamper-proof: Control unit protected against unauthorised access
- 5 Maximum home comfort thanks to a low-noise door lock motor
- 6 Easy hanging and removal of the door via plug-in cable transition

Easy to install thanks to the small number of system components.

To order please contact our technical department on 01234 242738

Measuring a Profile Cylinder

Anti-snap element this should only be on the external side

Please Note: Most cylinders can be reversed, but if they include an anti-snap part this should always be on the external side. See the image on the left of the Yale TS 007 3 Star Platinum Profile cylinder

the internal measurement is the 1st number, the external measurement is the 2nd number, ie. 40/50 = 40 internal / 50 external

All dimensions are in mm

Yale TS 007 1 Star Superior Kitemarked Profile Cylinder

Superior has achieved the following BS EN 1030:2005 8 digit classification: 16000C62 TS 007 is a new standard introduced to try to combat the problem of lock snapping. When trying to replace or upgrade the security to TS 007 you must ensure that you reach the 3 star maximum rating. This can be achieved by using the relevant hardware that carries a star rating and can be used in any combination together to create a 3 star rating. The Hoppe Secured By Design handle has a 2 star rating, you can get a 3 star rating by using this cylinder which is a 1 star anti-bump, anti-snap cylinder.

- Sacrificial cut
- Resistance to bumping
- Resistance to picking
- Resistance to drilling
- 12 Telescopic pin tumbler system
- 3 keys as standard
- 4 anti-pick pins per side
- Patented anti-snap & anti-bump features
- Tested to the highest grade of BS EN 1303:2005 standard
- Fully approved by BSI and Kitemarked
- Available in polished chrome and brass

TS 007 3 STAR PROFILE CYLINDERS

Yale TS 007 3 Star Platinum Kitemarked Profile Cylinder

BS EN 1303:2005

The Yale Platinum 3 star euro profile cylinder has been independently tested by The British Standards Institution and awarded the BSI Kitemark TS 007:2014 3 star accreditation. That makes this cylinder the perfect choice for professionals in need of a proven, high-security solution capable of providing maximum defence against common methods of cylinder attack.

- Anti-snap, sacrificial front section
- Anti-pick, anti-bump, anti-screw, anti-pull and anti-drill
- Superior strength with cylinder stability system for superior protection
- Horizontal keyway
- Flat reversible dimple key with new stylish nylon key bow
- Key card for easy code identification and key duplication
- Available in standard key/key, thumb turn and keyed-alike in pairs. Brass and Nickel finishes
- TS 007:2014 3 star approved
- BS EN 1303:2005 approved
- KM 559658

Anti-Bump

Specialised side pins provide bump resistance.

Anti-Snap

A small section of the cylinder is sacrificed under attack, leaving the remainder of the cylinder intact and your door safely locked.

Anti-Pick

Unique multi shear-line technology designed to resist lock picking and bumping.

Horizontal Keyway

With reversible flat key for easy key entry.

Inner Strength

The dedicated central bridge delivers unparalleled inner strength to the cylinder providing protection even if the cylinder is attacked from the outside.

Anti-Drill

Hardened steel protection incorporated within the cylinder provides undeniable resistance against drill attacks.

Certified

Approved to TS 007:2014 3 star - the highest current certified level. BSI accredited to KM 559658 Tested to BS EN 1303:2005

TS 007:2014

TS 007 is a standard developed in response to concerns over cylinder attacks. The standard is characterised by a 3 star rating system and can be achieved by combining a 1 star cylinder with 2 star security door furniture or by using a standalone 3 star cylinder. The Platinum series cylinder is approved to TS 007 3 stars and does not require any additional security furniture.

Maintenance and care of your Yale cylinder

Yale recommend regular lubrication of your Yale cylinder locks to ensure continuous trouble-free performance and operation.

For this we recommend using a PTFE-based lubricant. A small amount of lubricant should be applied to the key and then inserted into the cylinder. Rotate the key a couple of times in line with the normal locking function. Remove the key from the cylinder and wipe away any remaining lubricant to ensure it isn't transferred onto other objects.

CYLINDER PULL & ESCUTCHEONS

High Security Cylinder Pull

- TS 007 2 star accredited
- Sacrificial break point defends against common attack methods
- Compatible with Yale's Lockmaster KeyTurn multipoint door lock
- 10 year guarantee
- 500 hours corrosion tested to BS EN 1670 Grade 5
- Document Q approved when used as part of a PAS 24 door set

Supa™ Stainless Steel Escutcheon & Pull Escutcheon

Boasting the same superior surface finish guarantees as the rest of the Supa™ range, these ultra-corrosion resistant stainless-steel escutcheons are most definitely made to last. The Supa™ Secure, Supa™ Secure pull and Supa™ pull variants are made from resilient grade 304 stainless steel, while the Supa™ standard version is even tougher in marine grade 316. That guarantees these escutcheons will be looking great for years to come, whether they're fitted on doors in the heart of the city or right by the sea!

- Three escutcheon designs available
- Suitable for PVCu, composite, aluminium and timber doors
- Clever design features such as clip-on covers conceal screw fixings for a neat finish
- The security versions are Secured by Design accredited, BSI Kitemarked and CE marked to visually deter burglars and resist forced entry
- Security escutcheons also have chamfered anti-grip shoulders, so burglars can't get leverage and an anti-drill design to protect the cylinder from attack

Yale LOCKMASTER 21

Still the lock you know and trust, only even better!

The Yale Lockmaster 21 is the newest iteration of Britain's best-selling multipoint door lock, so called because it comes 21 years after the very first Lockmaster was released.

This latest offering delivers the same reliability, ease of use and long service life you've come to expect from Lockmaster, coupled with the usual high levels of security and superior performance, but with some great new features added in:

Lockmaster's renowned hook and pin unit and pre-compression rollers are cleverly positioned within 100mm of each other to assist with PAS 24 testing.

The push-in latch snib feature has been specifically designed to prevent accidental lock-outs.

Lockcase now comes with secure centre hook as standard.

New hardened screw-in plastic tidy boxes last longer and give a neat, streamlined finish.

There's a new selection of profile-related packers to choose from.

A new 13mm axis one-piece keep can withstand greater loads during security testing to create the strongest Lockmaster yet!

For more info please see pages 112-115 or ask our sales office.

Hero 231mm Sprung Door Handles

- Lever/lever or lever/pad combinations available
- Supplied with two spindles, fixing screws and spring cassettes to ensure lever always goes back to 90°
- Modern styling and clean lines to suit contemporary properties
- Compliments the rest of the hero range
- User-friendly rounded lever designed to fit comfortably in the hand during use
- 5 popular finishes – white, black, polished chrome, satin silver or gold
- Box quantity: 10
- Outer carton quantity: 20
- Pallet quantity: 640 (white & black finish) 540 (chrome & gold finish)

Dimensions

- Backplate: 231 x 28mm
- Screws: 211mm
- Centres: 92mm or 92/62mm

Guarantees & accreditations

- Independently tested to 100,000 cycles with a 10-year mechanical guarantee to ensure long service life
- Corrosion tested to 480 hours salt spray with a 10-year painted surface finish guarantee and 5-year plated surface guaranteed for assured weather resistance
- Strength tested to 100kg

Athena Butt Door Hinge

...The Strength of Hardware Design

The Trojan Athena door hinge is PAS 24 compatible and is designed to fit all standard eurogroove systems, with no unsightly gaps visible after making 3D adjustments. It features a double knuckle for increased load bearing and is designed to be fitter and installer-friendly thanks to a lift on, lift off design.

Product Materials:

- Zinc alloy
- Stainless steel – grade 430
- Plastic – GF nylon, UV stabilised ABS and acetal

Testing:

- Corrosion tested to BS EN 1670
- Painted finishes grade 5, plated finishes Grade 4
- Conforms to EN1191 – tested to 100,000 cycles
- Can achieve PAS 24 as part of a door assembly

Adjustments:

- Height: +/- 4mm
- Compression: +/- 2.00mm
- Lateral: +/- 4mm
- Weight Capacity:

- 3 hinges carry 100kg

MILA DOOR HINGES

These high-security door hinges from Mila might take less than a minute to fit right out of the box, but they'll be looking great and working perfectly for years to come! Independent tests prove the ProSecure door hinge is not only one of the fastest-fitting door hinges on the market, but it also delivers advanced SBD-approved security performance to PAS 24: 2012, exceptional corrosion resistance to BE EN 1670: 2007 Grade 5 and ultra-reliable operation achieving BE EN 1935:2012 grade 12 to give 200,000 cycles bearing 100kg load. It's an impressive proposition in a fitter-friendly format!

Features

- One-piece hinge ready to fit out of the box in less than 58 seconds
- Load capacity for 2 hinges: 100kg
- Two quick-fit installation methods: slide-on to the frame in one piece or remove the pin and front-fit on low reveals
- Quick and fuss-free 3D adjustment (+/- 5mm lateral, + 5mm vertical and +/- 1mm compression adjustment)
- Only 2 holes to pre-drill
- Captive hinge lid means fixing screws are easy to access for a faster, straightforward fit
- Rubber tongue keeps hinge lid open until installation is finished
- Static-cling TechTape provides scratch-protection during transit, fitting and installation
- Includes optional loose fixing lugs for a solid fix on any profile
- 10 different finishes available

Guarantees & certifications

- Security tested to PAS 24: 2012
- Secured by Design SBD approved
- Highly corrosion resistant to BS EN 1670:2007 Grade 5
- Ultra-long life assured – tested to BS EN 1670:2007 achieving 200,00 cycles under 100kg load

NB: If you require a hinge jig, please order MDH19999

Delta Security Door Hinge

DELTA

This high quality door hinge is supplied in 5 parts to allow for quick and easy installation. The innovative design means the hinge will hold the door firmly in place once compression and adjustments have been made, to minimising the likelihood of dropping occurring.

- Can meet the requirements of PAS 24
- Adjustment guide
- Protective cover on front of hinge
- Die cast cover caps to give perfect colour match
- 4mm Hex or Allen Key provided to fit vertical, horizontal & compression adjustment screws
- Suits with Kore window and door hardware
- Hinge pin security screw is only accessible when the door is open
- Sash cover is a slide fit, held securely whilst cover fixing screws are installed
- Conveniently packed in trays made of recycled material containing 3 hinges
- Tested to 100,000 cycles
- Load performance: tested to 100kg with 3 hinges
- 500hrs corrosion resistance

Conveniently packed in trays containing 3 hinges

QUAD-GUARD PVCu Door Hinge Protector

Quad-Guard is a revolutionary new product designed to simply and effectively enhance the security of PVCu doors. It does the job of a traditional door dog bolt, with two different versions that work for all PVCu profiles to give a flexible security solution. What's more, the Quad-Guard is face-fixed, so it's quick and easy to fit – no routing required!

- Face-fitted, non-rout hinge protection (simple, speedy fabrication)
- Fully tested to PAS 24
- Retrofittable
- Manufactured in the UK from high-tensile steel
- 240 hours salt spray
- Load tested up to 9Kn
- Quad-Guard should be fitted directly in line with the door hinges.
- Fits most PVCu profiles, please check before ordering.

Tip: We recommend you fit the Quad-Guard using carbon steel zinc coated dome head screws with either a 4.8mm or 4.2mm thread (not included). This will give the required screw retention for a firm fit and optimum performance.

Athena Composite Door Hinge

Despite its subtle, slimline appearance, the Trojan Athena door hinge boasts impressive strength making it the ideal hinge when working to achieve PAS 24 or meet the requirements of approved Doc Q. What's more, the hinge has impressive load bearing capabilities perfectly suited to heavy duty applications such as large or triple-glazed doors.

- Supplied pre-assembled and ready to fit
- No unsightly gaps visible following adjustment
- Double knuckle gives increased load bearing (3 hinges carry 100KG)
- Full float technology facilitates simple and accurate 3D adjustment with door closed
- Lift on, lift off design makes life easy when fitting
- Can achieve PAS 24 as part of door assembly
- 10-year mechanical guarantee

Product Materials:

- Zinc alloy
- Stainless steel – grade 430
- Plastic – GF nylon, UV stabilised ABS and acetal

Testing:

- Corrosion tested to BS EN 1670
- Painted finishes Grade 5, plated finishes Grade 4
- Conforms to EN1191 – tested to 100,000 cycles
- Can achieve PAS 24:2016 as part of a door assembly

Adjustments:

- Height: +/- 4mm
- Lateral: +/- 4mm
- Weight capacity: 3 hinges carry 100kg

Yale Postmaster Professional TS 008 Letterplate

The patented Postmaster Professional TS 008 Letterplate is designed to meet the exacting requirements of TS 008. It's suitable for doorsets that need to be Document Q or PAS 24:2016 compliant. Manufactured from 304 Stainless Steel for ultimate corrosion resistance, its simple but elegant styling will complement any doorface.

- TS 008 accredited
- Conforms to PAS 24:2016 and approved Document Q
- Suitable for both composite doors and PVCu doors (range from 40mm to 75mm)
- Inner protective housing has unique concealed hinge mechanism to prevent attack
- Inner flap has a positive stop feature for maximum protection from 'fishing'
- Will fit any door to meet TS 008 accreditation without the need to retest
- Available in white, PVD gold, chrome and satin stainless steel, external finishes from stock. Other finishes available to order including brushed stainless steel and black.
- Guarantee 25 years anti-corrosion available on all Stainless Steel product finishes
- Guarantee 10 years mechanical
- Overall letterplate size:

External: 300.5 x 96mm

Internal: 300.5 x 98.4 x 52mm

Yale Postmaster Professional TS 008 Letterplate

Product materials:

- External flap is manufactured from 304 stainless steel
For ultimate corrosion resistance (galvanised mild steel
For painted finishes)
- Internal flap manufactured from die-cast zinc

Testing:

- Corrosion tested to BS EN 1670 Grade 5
- Cycle test – opening and closing action tested to 20,000 cycles
- PAS 24:2016 compliant and approved Document Q
- TS 008:2015 compliant

Adjustments:

- For composite doors 0793-2001
(4 Screws m4 x 30mm csk pozi zn)
- For PVCu doors 0793-2002
(4 Screws m4 x 60mm csk pozi zn)

Yale LOCKMASTER 21

Still the lock you know and trust, only even better!

The Yale Lockmaster 21 is the newest iteration of Britain's best-selling multipoint door lock, so called because it comes 21 years after the very first Lockmaster was released.

This latest offering delivers the same reliability, ease of use and long service life you've come to expect from Lockmaster, coupled with the usual high levels of security and superior performance, but with some great new features added in:

Lockmaster's renowned hook and pin unit and pre-compression rollers are cleverly positioned within 100mm of each other to assist with PAS 24 testing.

Coming soon

The push-in latch snib feature has been specifically designed to prevent accidental lock-outs.

Lockcase now comes with secure centre hook as standard.

New hardened screw-in plastic tidy boxes last longer and give a neat, streamlined finish.

There's a new selection of profile-related packers to choose from.

A new 13mm axis one-piece keep can withstand greater loads during security testing to create the strongest Lockmaster yet!

For more info please see pages 112-115 or ask our sales office.

Proline AM3-70 Inward Opening Low Threshold

- Designed for door set manufacturers - can be installed as the fourth side of the door frame or retrofitted
- Complies with Part M of the building regulations when used in conjunction with the low threshold rear ramps
- Thermally broken to meet thermal bridging and insulation requirements
- Can be used with many different frame and door materials, e.g. wood, PVCu, fibreglass, aluminium, steel and carbon fibre
- Ideal for use with carpeted floors. Optional clip-in internal transition ramps also allow use with tiled or wooden floors
- Non-slip surfaces ensure a safe grip in wet conditions

Proline AM3EX-78 Inward Opening Low Threshold

- Designed for door set manufacturers - can be installed as the fourth side of the door frame or retrofitted
- Complies with Part M of the building regulations when used in conjunction with the low threshold rear ramps
- Thermally broken to meet thermal bridging and insulation requirements
- Can be used with many different frame and door materials, e.g. wood, PVCu, fibreglass, aluminium, steel and carbon fibre
- Ideal for use with carpeted floors. Optional clip-in internal transition ramps also allow use with tiled or wooden floors
- Non-slip surfaces ensure a safe grip in wet conditions
- 8mm wider than AM3-70

4-Way Locking Microchip Cat Flap

PET MATE®

5

This cat flap from Pet Mate gives your feline friend VIP access to your home, ensuring they're free to come and go as they please while keeping other cats out. This cat door will only permit access when it detects your pet's implanted microchip or unique I.D. disc. You can register up to 30 cats and programming is simple at the touch of a button. The generous entrance way will comfortably accommodate small to medium sized cats, while the clear flap lets them look out and satisfy their curious nature.

- Keeps stray pets out - entry controlled by your cat's unique microchip or Cat Mate I.D. Disc (available separately)
- Easy to program at the push of a button. The LED indicator flashes when your cat's microchip or I.D. disc is successfully registered. Suitable for up to 30 cats
- Compatible with all common microchips (15 digit ISO)†
- Takes 4 x AA batteries (not included) to give approximately 12-months operation
- Self-lining to 85mm (3 3/8") thick – ideal for all doors including metal.*
- Easily fitted to glass panels with adapter kit.*
- Cat-friendly transparent flap made from durable polymer
- Draft and weatherproof fully brush sealed flap with magnetic closure
- Easy to use, rotary 4-way lock.
- 3-year guarantee

Cut Out Size: W 173mm x H 198mm
Overall Size: W 197mm x H 246mm

WHITE	BOX QTY.
CAF24000	1

† Please note: microchips with 10 digits and lettered characters are not currently compatible with this cat flap.

* Glass panels or metal panels over 35mm (1 3/8") thick require an adapter kit (available separately see page 283)

PET MATE® 2-Way Locking Cat Flap

6

- Door liners: make fitting easy by neatly covering the cut hole
- Silent action: will not frighten your pet or disturb you
- Draught and weatherproof brush-sealed flap with magnetic closure
- Top quality design and materials throughout. The robust construction enables Petmate to confidently offer a 3 year limited guarantee

NB: The complete range fits into door panels up to 30mm thick.

Overall Size: W 192mm x H 200mm
Cut Out Size: W 165mm x H 174mm

SECURISTYLE FRICTION HINGES

Securistyle Defender Slimline Friction Hinge

10
YEAR GUARANTEE

This Securistyle slimline friction hinge provides a reliable and accurate closure of the window, as well as effective weather and draught proofing.

Features:

- Smooth operation
- World's best selling domestic friction hinge
- 15mm track width

Variations:

- Defender highline variants for deeper profiles with cavities between 16mm and 18.5mm
- Defender slimline, engineered for narrow profile channels

KENRICK ESPAGNOLETTE BAR

BS EN 1670:2007

This multi-point window lock from Kenrick fulfils fabricator demand for a high-quality locking system capable of delivering the superior performance and proven reliability fit for increasingly popular high-end aluminium windows. PAS 24:2016 and SBD accredited, the crime preventing credentials of this security window lock are second to none. It's fitter-friendly too, with a fast-fix design and adjustable mushroom cams to +/- 1mm, ensuring even compression and an optimum seal.

Key Features

- Multi-point locking system with a robust offset gearbox suitable for aluminium profiles
- High-security bi-directional twin cam
- U-Rail faceplate which also works within a eurogroove
- Available with 5 or 7mm cam heights
- Made from durable high-grade 304 austenitic stainless steel

Guarantees & Certificates

- Security tested to PAS 24: 2016 & Secured by Design certified
- Tested to 100,000 cycles with 10-year mechanical guarantee
- Corrosion resistant to BS EN 1670: 2007 Grade 4 240 hours salt spray

See pages 30-31 for further technical drawings

Cotswold Architectural Products

Releasable Stay

- Locking friction arm mechanism is released using the key
- This allows the vent to open to its full opening potential, facilitating the cleaning of the exterior glass from inside the property, before being re-engaged to retain the restricted opening
- For use in a 16mm cavity
- Manufactured in austenitic steel
- Non-handed product
- Easy to fit, no routing required
- Can be used on windows without reinforcement

BS EN 13126-5:2011

1971N

Window Restrictors

CLS1

- Suitable for use on wood, aluminium, PVCu and steel window frames
- Cable length: 200mm
- Allows maximum 89mm opening to comply with child safety function of BS EN 13126-5:2011
- Independently tested to withstand a breaking force of 1971N
- (RST90000) CLS1 and (RST91000) CLS3 combi restrictors are both secured with a standard key mechanism
- (RST92000) CLB1 restrictor has a captive key disc lock mechanism, so the key won't get lost when open
- The sash fixing point for the CLS3 combi Cubelock fits behind the window handle and the locking mechanism fits directly below on the frame
- Includes tamper-proof screws to reduce the likelihood of abuse

Caldwell folding openers provide a safe, hard-wearing, simple-to-use and cost-effective way to achieve restricted opening on casement windows in public or commercial buildings like schools, hotels, hospitals and offices. They are gravity dependant and therefore best suited to top hung windows, although they may also be fitted to bottom hung, fully reversible and pivot windows. The wide range of fixing brackets available on folding openers mean they are suitable for use on aluminium, PVCu, timber, steel and composite windows.

When it comes to building a best-fit folding opener system, product selection depends, in the first instance, upon the position of the window i.e. is pole operation required? This dictates the type of folding opener used. The next key consideration is the

step size and screw centre. These measurements vary according to the casement profile and are critical to achieving a robust, full-functioning system.

Key Features:

- Configurations to suit virtually any profile
- Standard folding openers give a sash movement of 150mm, shorter openers are available on request
- Resilient anodised satin silver finish
- Quality manufactured to **BS EN ISO 9001: 2008**
- Corrosion resistant to **BS 7412: 2007**
- Open/close cycle tested in excess of 100,000 cycles

Hand operated system shown

Pole operated systems

Wherever windows are high up or hard-to-reach due to obstructions, pole-operated folding openers provide a more durable and economical manual way to control windows remotely compared to electronic systems. The recommended high-level configuration usually comprises of 110/111 series or 'pork chop' folding openers, a pre-drilled tandem bar and a 263 tandem eye which can be operated easily and effectively by a boss pole.

110 Type High-level Folding Opener

Hand operated systems

On low-level or easily accessible windows that can be safely operated by hand, the type 112 opener is the recommended choice. These openers can be linked by an undrilled tandem bar as there is no need for a tandem eye.

112 Type Low-level Folding Opener

Call sales on **01234 242724** to request your printed copy of our Fabricators Manual or download a PDF now at windowware.co.uk/caldwell/literature/fabricators-manual-for-caldwell-folding-openers.pdf

Flush & Stepped DuoFlex Folding Openers

Flush DuoFlex folding openers

With flexible, fully-adjustable, packer-free fitting, this DuoFlex window opener can ably achieve safe, secure restricted opening on a range of open-out, flush-style window frames made from timber, aluminium or steel. Cycle tested to beyond 100,000 operations and constructed from strong, corrosion-resistant aluminium, these openers promise enduring, trouble-free service and superior pristine aesthetics.

- Fits most timber, aluminium or steel window frames
- Suitable for open-out top hung and centre pivot sashes
- Attractive and stylish design
- Fitter-friendly and easy to adjust to suit 0-10mm sash step sizes

- No need for packers
- Distance between fixing centres: 29mm
- Minimum sash height: 250mm on windows with butt hinges. 400mm where friction hinges are used.
- 150mm throw when opening and closing sash
- Over centre design gives a secure lock when the window is closed
- Cycle tested to over 100,000 operations
- Available in silver grey and white finish. Other RAL colours available on request
- Made in UK
- Materials: Aluminium alloy with plastic washers or bushes fitted to all moving joints

Tip: We advise that you use a single opener on sash width up to 500mm, two openers plus link bar on sash widths 600 to 900mm and three openers plus link bar for sash widths 900mm to 1500mm.

Pole operated system shown

Stepped DuoFlex folding openers

These great-looking, curvy folding openers achieve the perfect balance of form and functionality! Modern aesthetics combine with flexible design features to produce an adaptable folding opener system that gives secure restricted opening and can easily accommodate a range of step sizes from 0-26mm with simple adjustment and no need for packers. That makes DuoFlex stepped openers ideally suited to most types of top-hung or centre-pivot outward opening PVC-u windows.

- Suitable for use on PVCu window frames
- Contemporary, sleek styling
- Easy-fitting and completely adjustable without packers to accommodate 0-26mm step sizes

- Distance between fixing centres: 48mm
- Minimum sash height: 250mm on windows with butt hinges. 400mm where friction hinges are used.
- Gives 150mm throw when opening and closing sash
- Over centre design gives secure locking when the window is closed
- Cycle tested to over 100,000 operations
- Available in silver grey and white finish. Other RAL colours available on request
- Made in UK
- Materials: Aluminium alloy with plastic washers or bushes fitted to all moving joints

Tip: We recommend you use a single opener on sash width up to 500mm, two openers plus link bar on sash widths 600 to 900mm and three openers plus link bar for sash widths 900 to 1500mm.

Technical Data

Minimum window height for full 250mm travel of T100 - 500mm

Chain openers fitted on windows less than recommended height must have opening restricted to 30% of the vent height using the T700 spring stop or T720 brass stop to shorten the cable run.

For safety reasons we recommend fitting side support stays to all bottom hung, open-in windows. For bottom hung applications you must fit the THL8200/0/1/5 fixing kit (see page 316) (sold separately).

Maximum Control Run

OPERATOR	MAXIMUM CONTROL RUN
T200	30 metres
T250	18 metres
T300	18 metres

Spent Travel Conduit

To allow for the forward/backward movement of the inner cable, a length of "spent travel" conduit must be fitted at either end of the control path i.e. past the last chain/screw jack and below the operator (except the T250 midi operator (see page 317) which has an integral "spent travel" tube).

TYPE OF OPERATOR	SPENT TRAVEL CONDUIT
SJ138600 Screw Jack	2.5m (for full 380mm travel)
T100 Chain Opener	0.3m

Call sales on **01234 242724** to request your printed copy of our Highline Brochure & Order Form, or download PDF versions now at windowware.co.uk/highline/literature/highline-window-controls-brochure

Number Of Openers Per Vent

Type Of Operation

LOAD = No. of chain openers + No. of bends in conduit

The above figures are based on a single bend in the conduit path. For each additional bend deduct 1 metre from the Vented Length total.

The figures used in these charts are based on windows with 4mm double glazed units fitted to butt hinges or free pivots, not friction stays. Please refer to our sales or technical department for advice if friction stays are fitted.

Installation Examples

HIGHLINE MANUAL WINDOW CONTROLS

HIGHLINE® T100 Chain Openers WINDOW CONTROLS

This compact window opener is one of the most popular choices in the range. It's neat, discreet and can be fitted to most top, bottom, and side hung windows to give a generous 250mm opening stroke for excellent natural ventilation.

- 250mm travel length (also available in 380mm)
- Made to last from substantial zinc castings and aluminium extrusion
- Can be fitted on its own or linked with multiple T100 openers and controlled from a single T250, T200 or T300 mini operator
- Fixing plates and bracket fixing kits available to suit most window profiles
- Available in white, grey and black

HIGHLINE® T175 Locking Manual Openers Bottom Hung Open-In WINDOW CONTROLS

This opener is ideally suited to bottom-hung windows fitted with butt hinges or 'Hopper-style casements that open inwards. It's small enough to fit snugly where space is limited between the reveal and moving frame. Because the moving sash is opened by the strength of the cable alone without the support of any conduit, this opener is better suited to small vents only.

- Works with the helical steel cable (THL41000)
- Used with the T250 or T300 operator on bottom hung windows
- Maximum opening stroke 250mm
- Supplied with mounting brackets
- Available in white, grey and black

TIP: Operate multiple vents by linking locking openers using a rotary junction box.

Roof Vent Horizontal Pivot

SJ138600 Screw Jack Opener

This strong and rigid screw jack actuator gives great opening power, perfectly suited to single or multi-operation of banks of medium-sized (>500mm) and heavier casements. It's particularly useful for controlling the opening pitch of roof lights, as well as operating top-hung windows and horizontal pivoting windows. One thing to bear in mind is that, depending on the application, there can be a lot of spent travel to accommodate (see page 314). This will need taking into consideration with the positioning of the system.

- Sill-mounted screw jack used with T200 maxi handle
- High-powered opener strong enough for use on heavy casements
- Maximum opening stroke: 380mm
- Available in white

Compatible With

Maxi Handle Operator

Top Hung Bottom Hung Side Hung

T250 Manual Midi Operator with Handle

This midi window winder is a popular choice to operate manual window opening systems. Any spent travel (see page 314) is neatly and safely enclosed inside the casing, well away from prying fingers, making it ideal for use in schools and hospitals.

- Can only be used with the T100 and T175 manual openers due to restrictions on the amount of spent travel the casing can accommodate. This allows for a maximum opening of 250mm
- Includes T275 handle, T410 spent travel tube and T720 brass stop
- Remember to allow room for the handle to rotate through 360° (diameter of at least 220mm)
- Use the brass stop included to set the opening size anywhere from 0-250mm
- Available in white, grey and black

Want a window opening wider than 250mm?
See either the Maxi or the Mini on page 318.

HIGHLINE MANUAL WINDOW CONTROLS

HIGHLINE® T200 Maxi Operators inc. Handles

If you need to control multiple windows or vents with linked cable runs from a single window winder, or you need to work heavier casements, then this capable, robust manual operator is your best choice thanks to its powerful gearing and heavy-duty construction.

- Capable of operating multiple windows
- Heavy-duty metal case
- Compatible with the T100 chain opener and T175 locking manual opener
- Includes T275 handle and fixings
- Remember to allow room for the handle to rotate through 360° (diameter of at least 220mm)
- Available in white, grey and black

TIP: Operating multiple windows within Schools if the conduit is covered.

HIGHLINE® T300 Mini Operators inc. Handles

This compact metal-cased operator is capable of controlling single or several light windows. It's one of our most affordable options, although the spent cable is exposed, and this might be a consideration if the system is going to be installed in a school or public building.

- Compatible with the T100 chain opener and T175 locking manual opener
- Includes T275 handle and fixings
- Remember to allow room for the handle to rotate through 360° (diameter of at least 220mm)
- Available in white, grey and black

Rotary Junction Box

HIGHLINE
WINDOW CONTROLS

Part of the Highline manual window controls range. This junction box connects drivers for satellite openers to the main conduit control system allowing multiple openers to be operated from a single winder. Available white, grey and black.

COLOUR	PART CODE	BOX QTY
White RAL9010	THL51000	1
Grey RAL9006	THL51001	1
Black RAL9005	THL51005	1

Cable Conduit 3 Metre

HIGHLINE
WINDOW CONTROLS

Works with the Highline manual window controls range. This plastic-covered metal tube protects the control cable that connects a window operator to a chain opener. It features a nylon lining for smooth operation and longer life. Supplied in 3-metre lengths. Available in white, grey and black finish.

COLOUR	SIZE	PART CODE	BOX QTY

Conduit End Cap

HIGHLINE
WINDOW CONTROLS

Works with the Highline manual window controls range. This moulded plastic conduit plug seals off the end of the conduit run which houses spent travel for a neat, fully enclosed finish. Available in white, grey and black finish.

COLOUR	PART CODE	BOX QTY
White RAL9010	THL83000	100
Grey RAL9006	THL83001	100
Black RAL9005	THL83005	100

HIGHLINE® Window Control Cable

WINDOW CONTROLS

This dry-lubricated helical cable runs inside the conduit to drive the window opener from the winder operator handle. Available in 1-metre lengths.

Remember to allow enough cable for spent travel

To allow for the forward/backward movement of the inner cable, a length of "spent travel" conduit must be fitted at either end of the control path i.e. past the last chain/screw jack and below the operator (except the T250 midi operator (see page 317) which has an integral "spent travel" tube).

TYPE OF OPERATOR	SPENT TRAVEL CONDUIT
SJ138600 Screw Jack	2.5m (for full 380mm travel)
T100 Chain Opener	0.3m

DESCRIPTION	SIZE	PART CODE	BOX QTY
Inner Cable	1m	THL41000	50m

HIGHLINE® 3-Piece Conduit Saddle Bracket

WINDOW CONTROLS

Part of the Highline manual window controls range. This neat, 3-piece saddle bracket can be fitted to non-masonry surfaces such as window frames to hold the conduit for winding gear firmly in position. This helps to create a professional, tidy finish. Available in white, grey and black.

COLOUR	PART CODE	BOX QTY
White RAL9010	THL80000	100
Grey RAL9006	THL80001	100
Black RAL9005	THL80005	1

HIGHLINE® Plastic Conduit Saddle Bracket

WINDOW CONTROLS

Part of the Highline manual window controls range. This moulded plastic saddle bracket is quick and easy to fit straight to the window frame to secure the conduit for winding gear in place. Available in white, grey and black.

COLOUR	PART CODE	BOX QTY

Product Information

The Highline electric window controls range offers reliable, flexible and cost-effective systems to automate the opening of vents and high-level windows for natural ventilation. Natural ventilation improves the air quality of inside spaces by allowing clean, fresh air to enter the building while letting stale air out.

Our range of motorised single chain actuators are controllable from either a simple switch or a digital control panel with temperature, wind or rain activation. The 230V AC actuators featured in this brochure all run off standard mains electricity and are available from stock. 24V models for use in bathrooms and kitchens are also available by special order only.

Highlights of the range include the ever-popular ACK4 chain actuator (sometimes referred to as the MAC) with its 7 opening positions ranging between 100mm to 400mm and fitting brackets for most applications. Then there's the newer Micro EVO Actuator. Versatile enough to adapt to any application, it incorporates a synchronisation feature which lets you easily link several actuators together on the same window – perfect for operating wider casements.

We also have access to lots of other actuators and controls not shown in this brochure, so if you need something you can't see here, why not give our technical team a call on 01234 242724 to discuss your specific requirements.

Call sales on **01234 242724** to request your printed copy of our Highline Brochure & Order Form, or download PDF versions now at windowware.co.uk/highline/literature/highline-window-controls-brochure

ACK4 Chain Actuators 300N

If you want complete control over how far your vents open, then the ACK4 electric chain actuator gives no less than 7 different stroke positions from 100mm up to 400mm, so you can achieve your desired level of ventilation. With a strong die-cast aluminium casing, a robust double-link stainless steel chain and a maximum thrust force of 300N, the ACK4 actuator is a hard-working, reliable choice for your window control system.

- Suitable for use on most windows and lightweight roof vents and domes
- Adjustable opening stroke with 7 positions from 100-400mm
- Strong die-cast aluminium casing
- Robust double-link stainless steel chain
- High protection class IP 55 rated
- All electrical parts are double insulated
- Audible alarm sounds when installed incorrectly
- Supplied with 1.5m cable
- Brackets and fixings available to most applications (all sold separately)
- Available in white

HIGHLINE ELECTRICAL WINDOW CONTROLS

HIGHLINE® C30 Chain Actuators 330N

This single-chain actuator comes as standard with a selection of different brackets making it suitable for mounting onto top and bottom hung windows. It delivers a maximum push/pull thrust force of 300N which is sufficient to operate most windows, lightweight roof vents and domes. The opening stroke can quickly and easily be adjusted at 200mm or 380mm simply by turning a knob on the outside of the casing.

- Single chain actuator with 2 travel positions (200mm or 380mm)
- Strong composite casing
- All electrical parts are double insulated
- High protection class IP 30 rated
- Features a robust centrally positioned double-link stainless steel chain with a buzzer alarm that sounds in the event of incorrect installation
- Supplied with 1.5m cable
- Comes complete with C30/SB standard bracket and C30/BHB bottom hung bracket
- Available in white

Micro EVO Actuator 230v **HIGHLINE** WINDOW CONTROLS

If you need high-level electric window controls for a wide casement, then the Micro EVO actuator is just the job. Its integrated synchronisation function means you can easily link up as many as 4 actuators to work together on single window on site and straight out of the box - no need for a separate sync module.

- 4 selectable opening strokes (100-400mm)
- Suitable for most window types and roof vents
- Soft-stop closing for reduced wear on the window frame and actuator
- All electrical parts are double-insulated - Class II AC version – Class III DC version.
- Aluminium casing
- High protection class IP 32 rated
- Double-link chain with anti-corrosion treatment
- Can be easily synced on site to work as a group of up to 4 actuators on wider casements
- Supplied with standard and bottom hung quick-release fixing brackets

HIGHLINE® Control Unit For Natural Ventilation Window Controls WINDOW CONTROLS

This compact window control unit is a great way to automatically achieve natural ventilation and ensure a more comfortable environment in stuffy rooms or stifling conservatories. With the digital display, it's quick and easy to program the system to automatically open and close windows or roof vents to achieve a specific room temperature, as well as ensure windows are shut and watertight whenever it rains.

- Control unit for 230V AC Window actuators (max output 8 Amp)
- Automatically opens windows if room gets too hot and closes them according to temperature or when it rains.
- Rain sensor and temperature sensor included
- Digital display for simple programming of the desired room temperature
- High protection class IP 4X rated
- Open and close buttons on front of control panel for direct control

TTF Slimline Through-Frame Ventilator

- Suitable for PVCu, Aluminium and Timber Windows for **flexible application**
- Delivers 2500 EA to comply with Approved Document F 2006
- Available with easy-to-use manual or cord operation to suit most preferences
- Fully controllable and draught-free to **keep homeowners happy**
- Easy installation to **save fitting time and avoid hassle**
- Ideal for new builds and retro-fitting
- Available in 4 single or dual standard colours – HIPCA white (RAL9910), anthracite grey (RAL7016), anodised silver and black (RAL9005)
- Produced under ISO 9001 Quality Systems for **improved customer satisfaction**
- Ventilation performance tested to BS EN 13141-1:2004
- Acoustic performance tested to BS EN 20140-10:1992, ISO 140-10:1991.
- Water tightness tested to 400pa

Airstrip 19000
‘Glazed-in’ Ventilator

RW Simon Ltd leads the way with this top-performing Airstrip 19000 ventilator, which offers built-in updraught facility and variable operating modes that deliver increased airflow capable of meeting Document F 2010 of building regulations. The Airstrip 19000 is installed between the head of the window profile and held in place by the glazing system. This product is also available as a gas vent, delivering a continuous supply of fresh air in line with Gas Board recommendations. Every ventilator is made to measure to suit your specific application. Please use our custom order form to ensure we have all the relevant information needed to provide you with an accurate quote.

Highlights:

- External hood as standard
- Thermally broken / thermally insulated
- Fitted with storm seal in internal flap. Storm locks available if required
- Flap control offers two opening positions between fully open and fully shut
- Permanent trickle (gas), knob, rod and cord operation available
- Suitable for double glazing thicknesses 20, 24, 28 and 32mm
- Glass height reduction 64mm
- Four standard colour options: Black (RAL9005 matt), White (RAL9910 Hicpa satin), Dark Brown Mahogany (RAL8019 matt) & Grey (RAL7016 matt)
- Special colours and dual colours also available

Performance:

- Tested to BS EN 13141-1:2004 achieves 12,931mm² equivalent area
- 5000mm² EA achieved on a length of just 386mm
- 2500mm² EA achieved on a length of just 193mm
- BS 5440-2:2000 compliant
- Water tightness limit of 600pa
- Acoustically tested to BS EN 20140-10:1992, ISO 140-10:1991

Components:

Two aluminium bodies assembled with thermal break, flap with knob controls at both ends (cord/rod control as optional), pair of end caps, 4 x screws, standard fly screen or gas fly screen, glass and ventilator gasket.

Airstrip 400
‘Glazed-in’ Ventilator

Not only is the Airstrip 400 easy to assemble and simple to install, it's also versatile and achieves superior thermal performance. That's all down to its unique twin shutter system, external hood and thermally broken all-aluminium design, which lets fabricators mix and match the internal/external faces to achieve the exactly the look they're after. The Airstrip 400 is installed between the head of the window profile and held in position by the glazing unit. Every ventilator is custom made to suit your requirements. Please use our special order form to ensure we have all the relevant information needed to provide you with an accurate quote.

Highlights:

- Includes external hood
- Thermally broken / thermally insulated design
- Optional internal updraught deflector
- Twin open and close shutters
- Knob and cord operation available
- Trickle ventilation as standard
- Suitable for double glazing thicknesses 20, 24 and 28mm
- Glass height reduction 45mm
- Four standard colour options: Black (RAL9005 matt), White (RAL9910 Hicpa satin), Dark Brown Mahogany (RAL8019 matt) & Grey (RAL7016 matt)
- Special RAL colours and dual colours also available

Performance:

- Tested to BS EN 13141-1:2004 achieves 4,103mm² equivalent area
- 5000mm² EA achieved on a length of 1,218mm
- 2500mm² EA achieved on a length of 609mm
- BS 5440-2:2000 compliant
- Water tightness limit of 400pa
- Acoustically tested to BS EN 20140-10:1992, ISO 140-10:1991
- Weather performance tested to BS EN 1026:2016 & BS EN 1027:2016

Components:

Supplied assembled. Aluminium body with thermal break and 2 PVCu shutter strips. External hood and fixing screws. Optional internal updraught deflector and fixing screws. Knob or cord control mechanism. Pair of 16, 20 or 24mm end caps. Trickle ventilation baffle plate. 4 x screws. Fly screen and glazing gasket.

To order either the Airstrip 400 or 19000, please contact our sales team on 01234 242724

DUCO Grille Solid F30Z
 Ventilation & Sun Control Glazed-in
 Window Louvre

Q Quality
 BS EN ISO 9001

10 Year Finish
 Guarantee

 Vandal-proof

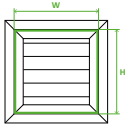

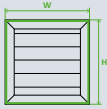

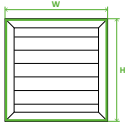

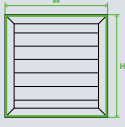

Solid F30/24Z

Solid F30/28Z

These high-quality aluminium window louvres are custom-made to your exact specifications to fit aluminium, timber & PVCu window frames of any size or finish. DucoGrilles provide intensive ventilation ideally suited to all kinds of industrial and commercial buildings. They let in plenty of fresh air to create a healthy, comfortable environment without compromising security. The unique stackable 'Z' shaped blades in the DucoGrille Solid deliver excellent burglar-resistant, weather-proof strength and durability.

- Available in 24mm or 28mm glazing thickness
- P1 Integrated fly screen as standard. P2 Stainless steel bird mesh or NP non-punched mesh (100% screening louvre) also available
- P2 Bird blade with additional 6mm galvanised mesh meets current gas regulations
- Free area: 34% (with fly screen) or 48% (with bird mesh)
- Blades and frame manufactured from extruded aluminium for strength and precision
- Unique clip-free design ensures blades are held fast by the outer frame and won't rattle in exposed areas or extreme conditions
- Independently tested by the BSRIA for water tightness
- Certified for burglar resistance to European Classification Class 2
- Quality manufactured to BS EN ISO 9001
- RAL polyester powder coated 60-80 microns with a 10-year finish guarantee
- Recessed (with or without flange) and surface mounted wall louvres also available

Adjustable Standard and High Lift Tandem Patio Rollers

Need to replace worn out or broken rollers on a sliding door?
 These replacement patio rollers / patio wheels are just the job and are suitable for use on most types of aluminium and PVCu patio doors.

- Maximum load per roller: 94Kg
- Height adjustment: **standard lift** 32-42mm
high lift 39-50mm
- 1¼ inch bearings
- Body size 88 x 28 x 19mm (LxHxW)
- Corrosion resistant body - available in passivated steel or premium stainless steel
- Quality manufactured according to BS EN ISO 9001: 2015
- Designed and engineered in the UK
- Suitable for aluminium and PVCu patio doors

Lockmaster Bi-fold Short with 24mm U-channel or AluK profile

Yale's hugely popular multipoint locking system now comes in a slim 28mm backset gearbox specifically designed to secure aluminium bi-fold doors. This 24mm u-channel variant suits the AluK profile to give fabricators and installers a high-security, top-quality, user-friendly bi-fold locking solution that's backed by one of the best-known brands in the business for added confidence and peace of mind.

Key features

- 24mm Yale-branded u-channel variant to suit the AluK profile
- Lockmaster renowned twin hook and anti-lift bolts for enhanced security, strength & usability.
- Deadbolt centre with an easily reversible latch to minimise stock holding
- 28mm backset with PZ92mm centre case
- Slave mechanism for French doors also available
- 2 lock lengths for flexibility to fit a range of door heights
- Quality manufactured in Britain
- Box quantity – 5 locks

Guarantee & certifications:

- Secure - PAS 24: 2016 compliant
- Long service - Tested to 100,000 cycles with a 10-year mechanical guarantee
- Trusted - Yale Lifetime Security Guarantee
- Durable – Anti-corrosion performance tested to BS EN 1670:2007 Grade 4 with a 10-year surface finish guarantee

Material Specifications

- Lock Case: Galvanised Mild Steel
- Faceplate : Mild Steel, BZP and Clear Trivalent
- U-channel: Mild Steel CS4 – ST2473
- Deadbolt and Latchbolt: Zinc Alloy Casting
- Keeps : Mild Steel, BZP and Clear Trivalent

Lockmaster Bi-fold - Long	Latch & Deadbolt	92mm	28mm	Twin	2	2	1	2	YBF00528

Lockmaster Bi-fold Short with 16mm Faceplate for Smarts & Exlabesa profiles

Yale's top-selling multipoint door lock now comes in a 28mm backset gearbox to fit modern narrow door sets and the slim sightline profiles of today's increasingly popular aluminium bi-fold doors. This 16mm euro groove version works with Smarts and Exlabesa profiles, to deliver industry-leading security, British quality, proven usability and long service life. For fabricators that already know and prefer the Lockmaster brand, this latest offering lets them suite across their entire door range.

Key features

- Standard Yale-branded 16mm faceplate to suit Smarts and Exlabesa profiles
- Lockmaster renowned twin hook and anti-lift bolts for enhanced security, strength & usability.
- Deadbolt centre with an easily reversible latch to minimise stock holding
- Pre-compression roller engagements cams achieve excellent weather-proofing
- 28mm backset with PZ92mm centre case
- Slave mechanism for French doors also available
- Quality manufactured in Britain
- Box quantity – 5 locks

CALDWELL BI-FOLD DOOR HARDWARE

Bi-fold Door Top Guide Assembly

This top guide assembly from Caldwell Hardware is used above the roller at the top of bi-fold door installations wherever two hinged door leaves sit in the running track. It works with the bi-fold roller to ably support moving door panels top and bottom and keep the whole system consistently tracking and operating smoothly.

- Security tested to PAS 24
- Quality manufactured to BS EN ISO 9001:2015
- All rollers, clamp plates and fittings supplied
- Suitable for door panels up to 100kg and 1200mm wide*
- Chrome-plated brass wheels & high-quality bearings achieve smooth sliding function
- Main body manufactured from corrosion-resistant die-cast ZP5 Zinc alloy
- Available in black RAL9005, HIPCA white, polished chrome and brushed steel
- 10-year manufacturer's warranty

* Please refer to the fabricators' manual for guidance on maximum panel size and glass thickness.

Standard Bi-fold Roller Assembly

These robust bi-fold rollers are used at the bottom of folding door installations wherever two hinged panels are sitting directly onto the track. Each roller assembly works with a top guide to support the moving door leaves top and bottom and keep your bi-fold door system consistently tracking smoothly.

- Security tested to PAS 24
- Quality manufactured to BS EN ISO 9001:2015
- All rollers, clamp plates and fittings supplied
- Suitable for door panels up to 100kg and 1200mm wide*
- Chrome-plated brass wheels & high-quality bearings mounted on 303 austenitic stainless-steel axles achieve smooth sliding function
- Main roller body manufactured from die-cast ZP5 Zinc alloy
- Available in black RAL9005, HIPCA white, polished chrome and brushed steel
- 10-year manufacturer's warranty

* Please refer to the fabricators' manual for guidance on maximum panel size and glass thickness.

Mullion Top Guide for Slave Bi-fold Door

Used when you have an uneven number of bi-fold door panels, the mullion top guide sits in the nylon track at the top corner of a single hinged door panel and works with the mullion roller at the bottom to ensure effortlessly smooth fold and slide operation.

- Security tested to PAS 24
- Quality manufactured to BS EN ISO 9001:2015
- Suitable for door panels up to 100kg and 1200mm wide*
- Chrome-plated brass wheels & high-quality bearings achieve smooth sliding function
- Main body manufactured from corrosion-resistant die-cast ZP5 Zinc alloy
- Mounted on austenitic stainless-steel spindles
- Available in black RAL9005 and HIPCA white
- 10-year manufacturer's warranty

* Please refer to the fabricators' manual for guidance on maximum panel size and glass thickness.

CALDWELL BI-FOLD DOOR HARDWARE

Bi-fold Door D-Handle with Hinge

This D-handle with hinge is used instead of a centre hinge on stack-out bi-fold door configurations where two hinged panels do not sit on the track, providing extra leverage to pull the panels shut. All Caldwell bi-fold hinges are designed to form a strong, flexible and secure joint between door leaves, as well as give a smooth, superior folding action.

- Security tested to PAS 24
- Quality manufactured to BS EN ISO 9001:2015
- All clamp plates and fittings supplied
- Suitable for door panels up to 100kg and 1200mm wide*
- Ergonomic D-handle made from die cast zinc
- Hinge made from extruded aluminium for greater toughness and accuracy with stainless steel pins for strength and durability
- Available in black RAL9005, HIPCA white, polished chrome and brushed steel
- 10-year manufacturer's warranty

* Please refer to the fabricators' manual for guidance on maximum panel size and glass thickness.

Bi-fold Door Hinge

These high-quality PAS 24 compliant hinges are part of the Caldwell range of folding door hardware. They're used to form a joint between two door panels or between the hinged door and frame to achieve a smooth, superior folding operation. And once the doors are shut, they'll ensure a flush, firm, secure seal to keep out moisture or drafts and deter burglars.

- Security tested to PAS 24
- Quality manufactured to BS EN ISO 9001:2015
- All clamp plates and fittings supplied
- Suitable for door panels up to 100kg and 1200mm wide*
- Hinge made from extruded aluminium for greater toughness and accuracy
- Hinge pins are stainless steel for strength and durability
- Available in black RAL9005, HIPCA white, polished chrome and brushed steel

CALDWELL BI-FOLD DOOR HARDWARE

Bi-fold Door Locking Shootbolt Gearbox

Caldwell's rugged locking mechanism for bi-fold doors can be fitted to secure folding door sets in the closed position. The gearbox drives a sturdy 10mm wide shootbolt from the traffic door so it can't be forced open. This delivers PAS 24 certified security performance that meets Document Q requirements for new builds and brings added peace of mind to homeowners.

- Security tested to PAS 24
- Quality manufactured to BS EN ISO 9001:2015
- Suitable for door panels up to 100kg and 1200mm wide*
- 10-year manufacturer's warranty

* Please refer to the fabricators' manual for guidance on maximum panel size and glass thickness.

Shootbolt Rods, Cones & Guides

Caldwell bi-fold door M10 threaded rod - This shootbolt rod works with the Caldwell bi-fold locking gearbox to secure the traffic door on folding door installations against forced entry.

- M10 x 1500mm long rods
- Security tested to PAS 24
- Designed to work on door panels up to 100kg and 1200mm wide*

Caldwell bi-fold door shootbolt rod end guide - Secured and mounted to the face of the sash, this end guide works with the rod end cone on a shootbolt rod to guide the locking mechanism into location and aid compression.

Caldwell bi-fold door shootbolt rod end cone - Screwed to the end of the M10 threaded shootbolt rod, this end cone works with the rod end guide to direct the locking mechanism into location and aid compression.

- Quality manufactured to BS EN ISO 9001:2015
- Suitable for door panels up to 100kg and 1200mm wide*
- 10-year manufacturer's warranty

* Please refer to the fabricators' manual for guidance on maximum panel size and glass thickness.

Anti-panic Modular Hardware

- CE approved panic hardware system conforming to EN 1125
- Precision engineered to open with minimum pressure
- Entirely surface mounted to maintain the integrity of door and frame
- Suits doors up to 2700mm high and 1100mm wide
- Available from stock in white or silver
- Full mounting instructions come with every kit
- Outside access available. Note this non key-retaining access handle allows removal of the key once unlocked. Access remains unlocked until the key is used to re-lock the outside access handle.

NB. To ensure compliance with current fire and building regulations we recommend consultation with local fire officers and building control inspectors prior to finalising specifications. All panic bars now sold in Europe must conform to the latest CE Regulations. Each panic bar kit comes complete with certificate of approval.

DESCRIPTION	WHITE	SILVER	BLACK	BOX QTY.

TROJAN DOOR HANDLES

...The Strength of Hardware Design

Sparta 212mm Sprung Door Handles Stainless Steel Version

- Designed to suite with Sparta espag handles (page 59), tilt/turn handles (page 84), hinges (pages 255, 258 & 261-262) and letterplates (pages 265-267)
- Backplate is 212 x 35mm internal & external
- Screw to screw measurement: 122mm
- Centre measurement: 92mm PZ
- Available in stainless steel combi (external stainless steel, internal standard)
- Stainless steel versions are manufactured in 304 stainless steel and come with an impressive 20+ year corrosion guarantee for the ultimate corrosion resistance
- Stainless steel versions cycle tested to 50,000 cycles PAS 24 compliant

TROJAN DOOR HANDLES

...The Strength of Hardware Design

TS 007 2 Star PAS24 220mm Door Handle Stainless Steel Version

The Trojan TS 007 2 star door handle is a high quality, cost-effective handle incorporates a patented spring cassette to eliminate 'drooping handle' effect. The handle can be used in conjunction with a 1 star cylinder to still achieve the requirements of Document Q.

- Manufactured from 304 stainless steel
- Tested to 50,000 cycles
- Conforms to BS 1906
- Corrosion tested in excess of 1,000 hours (based on BS EN 1670)
- TS 007 accredited
- Abusive load tested to BS6462

TYPE	WHITE	BLACK	PVD GOLD	CHROME	BOX QTY.

TS 007 1 STAR PROFILE CYLINDERS

Eurospec MPX6 1 Star Kitemarked Profile Cylinder

- Anti-bump/anti-snap kitemarked cylinder
- TS 007 1 star approved - TS 007:2012
- Supplied with 3 keys
- Available from stock in Key/Key and keyed alike pairs with master suiting available on special order basis
- Snap off (Sacrificial) front section, anti-snap one side on even split cylinders, both sides of unequal sized cylinders - Non-handed product.
- Suitable for use on fire doors to 60mins
- Tested to BS EN 1303:2005, EN 1634 Part 1:2000
- Anti-drill
- Anti-snap
- Anti-plug Pull
- Anti-pick
- Anti-bump
- For PAS 24 requirements this cylinder must be fitted with a PAS 24 door handle

Yale TS 007 1 Star Superior Kitemarked Profile Cylinder

Superior has achieved the following BS EN 1030:2005 8 digit classification: 16000C62 TS 007 is a new standard introduced to try to combat the problem of lock snapping. When trying to replace or upgrade the security to TS 007 you must ensure that you reach the 3 star maximum rating. This can be achieved by using the relevant hardware that carries a star rating and can be used in any combination together to create a 3 star rating. The Hoppe Secured By Design handle has a 2 star rating, you can get a 3 star rating by using this cylinder which is a 1 star anti-bump, anti-snap cylinder.

- Sacrificial cut
- Resistance to bumping
- Resistance to picking
- Resistance to drilling
- 12 telescopic pin tumbler system
- 3 keys as standard
- 4 anti-pick pins per side
- Patented anti-snap & anti-bump features
- Tested to the highest grade of BS EN 1303:2005 standard
- Fully approved by BSI and Kitemarked
- Available in polished chrome and brass

TS 007 3 STAR PROFILE CYLINDERS

Yale TS 007 3 Star Platinum Kitemarked Profile Cylinder

BS EN 1303:2005

The Yale Platinum 3 star euro profile cylinder has been independently tested by The British Standards Institution and awarded the BSI BSI Kitemark TS 007:2014 3 star accreditation. That makes this cylinder the perfect choice for professionals in need of a proven, high-security solution capable of providing maximum defence against common methods of cylinder attack.

- Anti-snap, sacrificial front section
- Anti-pick, anti-bump, anti-screw, anti-pull and anti-drill
- Superior strength with cylinder stability system for superior protection
- Horizontal keyway
- Flat reversible dimple key with new stylish nylon key bow
- Key card for easy code identification and key duplication
- Available in standard key/key, thumb turn and keyed-alike in pairs. Brass and Nickel finishes
- TS 007 2014 3 star approved
- BS EN 1303:2005 approved
- KM 559658

Anti-Bump

Specialised side pins provide bump resistance.

Anti-Snap

A small section of the cylinder is sacrificed under attack, leaving the remainder of the cylinder intact and your door safely locked.

Anti-Pick

Unique multi shear-line technology designed to resist lock picking and bumping.

Horizontal Keyway

With reversible flat key for easy key entry.

Inner Strength

The dedicated central bridge delivers unparalleled inner strength to the cylinder providing protection even if the cylinder is attacked from the outside.

Anti-Drill

Hardened steel protection incorporated within the cylinder provides undeniable resistance against drill attacks.

Certified

Approved to TS 007:2014 3 star - the highest current certified level.
BSI accredited to KM 559658
Tested to BS EN 1303:2005

TS 007:2014

TS 007 is a standard developed in response to concerns over cylinder attacks. The standard is characterised by a 3 star rating system and can be achieved by combining a 1 star cylinder with 2 star security door furniture or by using a standalone 3 star cylinder. The Platinum series cylinder is approved to TS 007 3 stars and does not require any additional security furniture.

Maintenance and care of your Yale cylinder

Yale recommend regular lubrication of your Yale cylinder locks to ensure continuous trouble-free performance and operation.

For this we recommend using a PTFE-based lubricant. A small amount of lubricant should be applied to the key and then inserted into the cylinder. Rotate the key a couple of times in line with the normal locking function. Remove the key from the cylinder and wipe away any remaining lubricant to ensure it isn't transferred onto other objects.

TS 008	TS 008 is a rating for the letter plate, or flap, covering the door aperture for receipt of postal items, together with a letter box on the inside of doors, walls or panels. This is a security requirement of PAS24 & document Q which deals with phishing through a letterplate.		

Trojan Unicorn 12'' Range Letterplate

- A unique and elegant design
- Letter flaps and torsion springs are made from stainless steel for ultimate corrosion resistance
- Flaps open to 180 degrees, eliminating any excess leverage on pivot points
- External flap has a complete peripheral seal that also forms a full thermal and acoustic barrier
- Cycle tested to 100,000 operations
- Available in a choice of finishes with or without colour coded end caps
- Detachable lugs enabling face fix on panel
- Telescopic sleeves for panel fitting 20 - 40mm and midrail fitting 40 - 80mm which suits doors up to 70mm thick
- Overall letterplate size 300 x 70mm

Yale Postmaster Professional TS 008 Letterplate

The patented Postmaster Professional TS 008 Letterplate is designed to meet the exacting requirements of TS 008. It's suitable for doorsets that need to be Document Q or PAS 24: 2016 compliant. Manufactured from 304 Stainless Steel for ultimate corrosion resistance, its simple but elegant styling will complement any doorface.

- TS 008 accredited
- Conforms to PAS 24: 2016 and approved Document Q
- Suitable for both composite doors and PVCu doors (range from 40mm to 75mm)
- Inner protective housing has unique concealed hinge mechanism to prevent attack
- Inner flap has a positive stop feature for maximum protection from 'fishing'
- Will fit any door to meet TS 008 accreditation without the need to retest
- Available in white, PVD gold, chrome and satin stainless steel, external finishes from stock. Other finishes available to order including brushed stainless steel and black.
- The internal letterplate can be colour coded to match the door colour
- Guarantee 25 years anti-corrosion available on all Stainless Steel product finishes
- Guarantee 10 years mechanical
- Overall letterplate size:

External: 300.5 x 96mm

Internal: 300.5 x 98.4 x 52mm

**Yale Postmaster
Professional TS 008
Letterplate**

Product materials:

- External flap is manufactured from 304 stainless steel
For ultimate corrosion resistance (galvanised mild steel
For painted finishes)
- Internal flap manufactured from die-cast zinc

Testing:

- Corrosion tested to BS EN 1670 Grade 5
- Cycle test – opening and closing action tested
To 20,000 cycles
- PAS 24: 2016 compliant and approved Document Q
- TS 008:2015 compliance

Adjustments:

- For composite doors 0793-2001
(4 Screws m4 x 30mm csk pozi zn)
- For PVCu doors 0793-2002
(4 Screws m4 x 60mm csk pozi zn)

**Teflon ET 22553 PTFE
Coated Glass Tape
For PVCu Weld Heads**

- Self-adhesive
- Easy to apply
- Burn-resistant
- Does not stick to weld material
- Available in 1m multiples
- Special rates available for a 30 metre roll

Application Information

It is recommended that the weld head be cleaned before applying a new sheet of Teflon. Weld heads can be cleaned with Stelmax Thinners Caution! Only change Teflon when weld head is cold.

Technical Specification

ET 22553 is manufactured from a 0.152mm standard grade PTFE impregnated fibreglass with 0.05mm of high temperature silicone pressure sensitive adhesive. This product is almost chemically inert. Only molten alkali metals and fluorine under elevated temperatures and pressure will attack the PTFE surface. The fibreglass provides dimensional stability and restricts PTFE cold flow. The PTFE surface provides a quick-release surface ideal for PVCu weld heads.

We've got it

Stelmax Filler 1961

This Stelmax Gap Filler is suitable for sealing and joining PVC and uPVC to itself and substrates such as brick work.

- Rapidly develops a protective skin to prevent unwanted debris setting within the sealant
- When set fully it is a water-resistant and colourfast seal

COLOUR	SIZE	PART CODE	BOX QTY.

Stelmax Thinners

Available in 500ml and 5 litre tins, this Stelmax solvent cleaner and thinner is fantastic at removing even stubborn dirt and marks from PVCu windows at the end of manufacture as well as after installation. Use in a well-ventilated area. Apply sparingly using a damp cloth and wipe the area clean with quick, smooth strokes – do not rub or risk prolonged contact with the plastic as this may damage the surface. Replace cap after each use.

- Solvent cleaner for PVC and PVC-coated products
- Tough on stubborn dirt, stains and marks
- Highly flammable

SIZE	PART CODE	BOX QTY.
½ litre	STX20001	20
5 litres	STX22221	4

For full information about how to handle and use this product safely, please refer to the safety datasheet.

Pinkgrip

- Pinkgrip can be used inside and outside, and adheres to just about every building substrate
- Amazing grab strength not only removes the need to pin under the workpiece to prevent slumping, but also eliminates the need for double stick methods

reXon 117 LMN Silicone

This low modulus neutral oxime curing multi-purpose silicone sticks firmly without primer to most surfaces including PVC, treated wood, aluminium, steel and glass*, making it ideal for sealing joints in construction and engineering applications. With the use of a primer, reXon 117 can also be used with confidence on alkali surfaces such as concrete and brick.

*reXon 117 silicone is not recommended for use on insulated glass (can affect the butyl sealing) or security glass (can affect the PVB film).

- For use outdoors and indoors in well-ventilation rooms
- High resistance to ageing, UV, weather conditions, low and high temperatures
- Not suitable for applications in continuous contact with water
- Permanent elasticity
- Neutral oxime curing system
- Application temperature: between 5°C & 40°C (do not apply when there is a risk of rain or frost)
- Skin forming time: 25-30 minutes at 23°C and 50% relative humidity
- Hardening rate: 2.5mm in 24 hours at 23°C and 50% relative humidity

reXon 111
Hi-grade Silicone

This high-quality neutral silicone stays elastic and water resistant, and achieves universal adhesion* without primer on metals, wood, stone and masonry, as well as synthetic materials such as plastic (PVC, polycarbonate and plexi). That makes it ideal for sealing joints and junctions in a multitude of construction projects in buildings, cars, boats and caravans.

*reXon 111 silicone does not stick to bitumen, polyethylene, PTFE or polypropylene.

- Easy to apply indoors and outdoors
- Water resistant
- Neutral, odourless and acid-free
- Excellent adhesion without primer
- Cannot be painted
- Permanent elasticity
- Retains original colour and is UV and weather resistant
- Withstands temperatures from -50°C to 150°C
- Meets ISO 11600 F in G2
- Application temperature: between 5°C & 40°C (do not apply when there is a risk of rain or frost)
- Skin forming time: 25 minutes (colours) or 10 minutes (clear) at 23°C and 50% relative humidity
- Hardening rate: 3mm in 24 hours at 23°C and 50% relative humidity

reXon 114 Sanitary Silicone

This high-quality neutral silicone sealant forms a flexible, water-resistant seal and is specifically designed for use in areas of high moisture such as baths, sinks and showers. It is neutral and odourless, mould resistant with a smooth consistency that's easy work and apply. ReXon 114 sanitary sealant can be used on acrylic, sensitive metals (eg stainless steel, aluminum), ceramic tiles, plastic, glass and all other materials commonly found in wet rooms and bathrooms.

- Water resistant
- Anti-mould
- Resistant to UV, chlorine and temperatures from -50°C to +150°C
- Very easy to work and smooth
- Does not stick to hands or form threads
- Permanent elasticity
- Acid free
- Excellent adhesion without primer
- Application temperature: between 5°C & 40°C
- Drying time: Film formed after 6 minutes at 23°C and 50% relative humidity
- Hardening: 2.5mm in 24 hours at 23°C and 50% relative humidity

reXon 121 Acrylic

12.5%
Expansion Rate

If you need to fill cracks and gaps in walls, plaster board and brick work, around door- and window frames and window sills, then reXon 121 acrylic silicone is the right product for the job. This high-quality caulk is very easy to work with and smooth to give a superior finish that can be painted once dry. It can be used indoors and outdoors but should not be used in areas that are constantly wet. 121 acrylic adheres to brick, concrete (cellular), masonry, plaster, wood, ceramic tile, metals and rigid PVCu.

- Can be painted perfectly
- Easy to work
- Excellent adhesion without primer
- Remains watertight after polymerisation complete
- Suitable for use indoors only
- Elastoplastic permanently (max 12.5% elasticity)
- Does not contain phthalates
- Application temperature: between 5°C & 40°C
- Drying time: Film formed after 70 minutes
- Completely dry after approx. 7 days

COLOUR	SIZE	PART CODE	BOX QTY.

7.5%
Expansion Rate

- Acrylic polymer based sealant and filler
- Solvent free and virtually odourless
- Very easy to apply
- Colourfast and waterproof after curing
- Can be painted after curing
- Very good adhesion on many porous surfaces
- For sealing of window sills, skirting boards, architraves, plasterboard, brickwork, etc
- Can be used for filling small cracks in plaster

COLOUR	SIZE	PART CODE	BOX QTY.
White	300ml	SIL59001	25

reXon 284
Adhesive

This high-quality white building mastic uses hybrid polymers to achieve flexible and durable adhesion of almost all building materials including stone, wood, PVC, aluminium, metal, concrete and more. Please note, reXon 284 adhesive will not stick to PA, PE, PP, Teflon® and bitumen.

- Elastic-bonding
- Air- water- and dust-tight
- Can be used in- and outdoors. Apply in temperature between 5°C & 40°C
- UV and weather resistant
- Can be painted with most water and solvent based paints.
- Film formed after approx. 30 min at 20°C and 65% relative air humidity
- Touch dry after 2 hours
- Hardening: 2.5mm in 24 hours at 20°C and 65% relative humidity
- Contains no solvents, isocyanates or phthalates
- 290ml tube

COLOUR	SIZE	PART CODE	BOX QTY.
White	290ml	TGLU20000	12

reXon 282
Adhesive

There's virtually no limit to the different materials reXon 282 multipurpose adhesive will stick to! This translucent MS polymer mastic forms a completely clear permanent bond between a huge range of smooth or porous surfaces, including traditional building substrates such as brick, plaster, stone, marble, granite, concrete and metal, as well as synthetic materials including polystyrene, polyurethane, chipboard and polycarbonate.

- Translucent - virtually invisible when gluing together layers of glass or acrylic
- Easy to apply
- Adheres to wet surfaces
- Good weather and UV resistance although there may be a small colour change over time
- Solvent free and virtually odourless
- Apply in temperature between 5°C & 40°C
- Film formed after approx. 25 min at 20°C and 65% relative air humidity
- Touch dry after approximately 2 hours
- Fast hardening: 2-3 mm in 24 hours at 20°C and 65% relative humidity
- Maximum adhesion obtained after 3 weeks
- Can be painted immediately with most water and solvent based paints.

COLOUR	SIZE	PART CODE	BOX QTY.
Clear	290ml	TGLU20006	12

Fix ALL® High Tack

- Fix ALL® High Tack is a high quality, single component joint sealant with high adhesive strength. It is based on MS-Polymers®
- High initial tack reducing the need for initial support
- Fast curing, quick build-up of end strength, high shear strength after full cure (no primer)
- Easy to apply and easy to tool and finish
- Remains elastic after curing
- No odour
- Does not contain isocyanates, silicones or solvents
- Paintable with all water based paints
- Good colour stability, weather and UV resistance
- Can be applied on wet surfaces, even under water

COLOUR	SIZE	PART CODE	BOX QTY.
White	290ml	TGLU40290HT	12

Fix ALL® Crystal

- A crystal clear, neutral, elastic, single component sealant/adhesive based on MS-Polymers®
- Completely transparent
- High performance mechanical properties
- Good extrudability even at low temperatures
- Ecological advantages – free of isocyanates, solvents, halogens and acids
- Minimal health and safety considerations
- Can be painted with water-based paints and a number of other systems (preliminary test required)
- Permanently elastic after full cure
- Invisible bonding of glass and other transparent materials

COLOUR	SIZE	PART CODE	BOX QTY.
Crystal	290ml	TGLU46290	12

Soudalead PB

- Low modulus, neutral cure silicone sealant and filler for use on lead and other metals
- Very easy to apply (no mixing) with primerless adhesion
- Permanent colour
- UV resistant
- Stays elastic after curing
- Compatible with all lead types
- Virtually odourless

COLOUR	SIZE	PART CODE	BOX QTY.

reXon 311
Handheld PU Foam

This high-performance polyurethane foam provides a quick and easy way to seal and insulate joints and cracks against heat loss, drafts and noise. ReXon 311 foam will adhere to many common building materials, such as wood, concrete, stone, masonry, plaster, metal, glass, polyester, polystyrene foam and PVC. Please note, this product does not stick to polyethylene film, silicone or PTFE.

- Suitable for use indoors and outdoors (protect against atmospheric influences)
- Good resistance to chemicals, aging and temperatures from -40°C to 90°C
- Good sealing capacity
- Should be applied in temperatures between 5°C and 30°C
- High volume production – gives 35-40 litres
- Minimum counter-blow (low expansion)
- Ozone-friendly - free of CFK and HCFK
- Hardens under the influence of the humidity in the air
- Touch dry after 16 minutes
- Hard enough to cut, saw, sand and paint after 40 minutes
- Excellent adhesion to many surfaces

SIZE	PART CODE	BOX QTY.
750ml	FIF20001	12

Soudafoam® Comfort B3
Hand Held Foam
Simply Genius!

Perfect use with one hand

Perfect control of extrudability of the foam

Possible to re-use up to 6 weeks after first use

- Regular users of hand held PU foam are often frustrated by inconvenient two-handed operation, difficulty of application and a limited shelf life after first use
- The GENIUS GUN® is different! This specially designed patented trigger mechanism ensures precise dosage and removes the need for an additional gun. Simply Genius!
- Soudafoam Comfort B3 Genius Gun is a one component, polyurethane expanding foam
- Excellent form stability; no shrink; no post expansion
- Excellent filling characteristics
- Excellent adhesion to all building materials (except PE, PP and PTFE)
- High insulation values, both thermal and acoustical

SIZE	PART CODE	BOX QTY.
600ml	FIF50800	12

reXon 341
Gun Grade Foam

This fast-curing thermal and acoustic insulating polyurethane foam can be used indoors and outdoors to fill holes, cracks and cavities in walls, ceilings and roofs, as well as to insulate pipes, tubes and electrical conduits. It will adhere to most building materials such as wood, concrete, stone, masonry, plaster, metal, glass and many synthetic materials such as polyester, polystyrene and PVC. Please note, reXon 341 will not stick to polyethylene sheets, silicones or PTFE.

- Should be applied with a standard NBS gun in temperatures between 5°C and 30°C
- Suitable for use indoors and outdoors (protect against atmospheric influences)
- Good resistance to chemicals, aging and temperatures from -40°C to 90°C
- Safety valve ensures no moisture intrusion
- High yield: 50-55 litres
- Minimal counter-blow: low expansion
- Ozone-friendly - free of CFK and HCFC
- Can be painted
- Excellent adhesion to many surfaces
- Good closing power
- Hardens under the influence of the humidity of the air
- Touch dry in 10-14 minutes. Hard enough to cut in 30-40 minutes

SIZE	341	BOX QTY.
750ml	FIF20000	12

reXon 342 Fire Resistant
Gun Grade Foam

This fire-resistant single-component expanding PU gun foam from reXon is ideal for sealing, insulating and filling bigger joints and cracks in fire-rated walls, ceilings or between the frames of fire-proof windows and doors. This foam has excellent adhesion, sticking to most common building materials including concrete, timber, stone, masonry, plaster and metal, as well as plastic, polystyrene, PU-foam and PVC etc.

- Foam is fire resistance rated to EN 1366-4 and will stop fire for up to 4 hours
- Ozone-friendly: CFC and HCFC free
- Foam can be cut and painted after less than 30 minutes curing time
- Achieves precise application with a standard NBS gun
- Safety valve shuts out moisture to ensure foam can't cure in the can
- Good filling capacity yields 40-45 litres from a 750ml can
- Recommended application in temperatures from +5°C - +30°C (Optimal at 20°C)
- Suitable for indoor and outdoor use – cured foam resists temperatures from -50°C - +90°C
- Foam relies on the moisture in the air (humidity) to cure
- Excellent adhesion to most surfaces

SIZE	342 FR	BOX QTY.
750ml	FIF20701	12

Soudafoam® Fire Rated
Gun Grade Foam

- One-component, ready-to-use, self-expanding polyurethane foam
- Fire retardant up to 240 minutes - tested to EN1366-4 & BS 476:Part 20
- Forms an efficient seal against smoke and gas
- Excellent adhesion on most surfaces (exempt Teflon, PE and PP)
- High thermal and acoustic insulation
- High bonding strength
- Very good filling characteristics
- Excellent stability: no shrink or post-expansion
- Can be painted after full cure
- Fitted with the Click&Fix system for easy and precise application with a foam gun

SIZE	PART CODE	BOX QTY.

Cement Repair

A convenient, simple way to repair cracks and fill holes in walls without having to go to the trouble and mess of mixing up a batch of mortar from scratch. Easy-to-use and ready-to-go, this high-quality plasto-elastic cement repair has a granular structure and comes in cement grey to make light work of repairing joints in masonry. reXon 127 cement repair is particularly useful for making good on crumbling cement around windows and window sills during fitting.

- Ready to use and easy to apply
- Suitable for indoor and outdoor use
- Excellent adhesion on all porous substrates such as plaster structure, stone, concrete and wood.
- Can be painted once dry
- Not suitable for joints that are continually exposed to water
- Application temperature: between 5°C & 40°C. (Do not apply when there is a risk of rain or frost)
- 310ml tube
- Drying time: Film formed after 20 minutes
- Hardening: 0.5mm in 24 hours at 23°C and 50% relative humidity
- Allows 5% joint movement

Soudafill Light

- Soudafill Light is an ultra lightweight ready to use filler for gaps and cracks in most porous building materials
- Easy to use and fast curing
- Smooth finish, no sanding required
- Sets hard on curing
- Does not sag or shrink
- Can be painted with alkyd & water based paints
- Suitable on most porous surfaces
- Can be sanded after curing

SIZE	PART CODE	BOX QTY.
900ml	FIL10000	6

Butyband Flashing

- Ready to use, self-adhesive, elastoplastic sealing tape based upon butyl rubber
- Fast and excellent adhesion to many substrates
- Waterproof
- Flexible - even when cold
- UV & weather resistant

SIZE	PART CODE	BOX QTY.
10m x 100mm	LFL10100	6

8 In 1 Multi Spray 400ml

- High quality universal spray with eightfold action:

1. Rust dissolver
2. Lubricant
3. Cleaner
4. Water repellent
5. Penetrating oil
6. Corrosion resistant
7. Contact spray
8. Shock spray

Trim Mounting Tape

- No curling, no mess, no waste
- Easy to use
- Adheres to almost all plastic surfaces
- Trim mounting tape is a double-sided foam tape especially developed for the permanent bonding of internal lightweight plastic finishing trims on to PVCu windows, doors, conservatory profiles and similar applications
- The product utilises a 100% closed cell polymeric foam coated with a high tack pressure-sensitive adhesive system

SIZE (W x T x L)	WHITE	BLACK	BOX QTY.
(9 x 1mm) x 50m	TAP510100	TAP510105	1

Security Glazing Tape

- Cost effective – replaces the internal gasket / reduces site glazing time
- High quality adhesive system for maximum performance
- 15 year guarantee on PVC-DSX tape
- Enables externally beaded windows to satisfy the glazing requirements of BS7950
- BBA certified product
- Glazing tape consists of a flexible, cellular foam carrier coated on both sides with a specialised high quality pressure sensitive adhesive system
- PCV-DSX – High density, substantially closed cell PVC foam for increased strength. Excellent intrusion resistance
- PE-DSP – 100% low density closed cell polyethylene (PE) foam, entry level grade with good intrusion resistance

U-Style Frame Packer

- Designed for use during the installation of the window frame into the window reveal
- Their function is to prevent the deflection of the frame during the installation
- Increase security around the fixing point
- The "U" shaped design allows for a packer to be installed around the fixing and supporting the fixing point

WIDTH	LENGTH	1mm GREEN	3mm BLACK	5mm WHITE	BOX QTY.
45mm	60mm	GBK45601	GBK45603	GBK45605	1000

Flexible Corner Glazing Wedges

- Supplied as mixed sets
- This combination set replaces 2 glazing packers and correctly locates them into the window corners
- With these parts they locate automatically and eliminate the need for silicone on the vertical (location block) to retain the packer during installation

SETS	PART CODE	BOX QTY.
40	GBK600282	100

Klip Frame Packers

- Designed for use during the installation of window frame into the reveal
- The KLIP exerts a lateral force between the frame packer and the fixing, to hold the frame packer in place and prevent it from rotating or falling out
- The additional tab makes positioning of the frame packer even easier, especially when working at height
- Once the window is in position, the tab is bent over and broken off

WIDTH	LENGTH	1mm GREY	3mm RED	5mm GREEN	BOX QTY.
60mm	50mm	GBK60501	GBK60503	GBK60505	100

WINDOW PRODUCTS LIMITED

SNAP-LOK Glass Retention Device

Snap-Loks work to keep the glass firmly in place on internally glazed window and doors. They fit between the sash and glass to retain the glass even if the beading is removed and prevent it from being pushed inwards and right out of the sash. Snap-Loks can help to enhance the security performance of door sets and window assemblies during PAS 24 testing (particular the part B and C manipulation tests) and increase their resistance to physical attack with tools.

- Made from strong high-tensile steel
- 240 hours salt spray
- Designed and manufactured in the UK
- GTS30005 fits 28mm glazed unit thickness for Eurocell, System 10, Rustique, Veka FS70 PVCu profile systems, for other profile systems, please contact our sales office.

Tip: Use the adhesive tape provided to bond the Snap-Lok to the glass and prevent it from falling down inside the frame. For best results, we recommend you fit two Snap-Lok devices at the top and bottom of the window, or in a diamond formation. On very large sashes, additional Snap-Loks may be required.

Installation Guidance

Key

For units up to 900mm width and 1200mm height fit a minimum of 4 GT Snap-Loks see figs 1 and 2

Fit glazing packers on the bottom rail shown marked *

For larger units then it is advisable to fit additional Snap-Loks as shown in fig 3

Predator Saw First Fix for wood 22" 7ppi

Calling on over 200 years of saw-making experience, Spear and Jackson has created this highly-efficient long-blade course-cutting wood saw, designed to make fast, efficient work of cuts along and across the grain of rough-sawn timber.

- Rigid 22" (559mm) hardened, tempered carbon steel blade reduces whip & vibration
- 7 PPI hardpoint teeth stay sharper for longer and deliver rapid, course-grade cutting
- High-impact polystyrene handle features a handy 45/90° angle guide
- Comfortable and ergonomic non-slip grip

22" 7PPI	BOX QTY.
SAW30003	10

Predator Saw Second Fix for Wood 22" 10ppi

- Length: 22", 10 teeth per inch
- Rigid 0.91 blade minimises whip and vibration
- Lasts 20% longer than the competition
- Accurate cutting, fine finish
- Comfort grip handle

22" 10PPI	BOX QTY.
SAW30000	1

Predator Saw Universal for Wood 22" 8ppi

Make short work of cuts along and across the grain in hard- or softwood timber, chipboard and MDF with the Predator 22" 8 PPI wood saw from renowned hand tool specialist, Spear and Jackson. The 8 PPI stay-sharp teeth make that first cut easier and achieve bi-directional cutting to tackle your sawing tasks in less time.

- Rigid 22" (559mm) hardened, tempered carbon steel blade reduces whip & vibration
- 8 ppi hardpoint teeth stay sharper for longer
- Efficient sawing - fleam tooth configuration cuts on both the forward and backwards stroke
- High-impact polystyrene handle features a handy 45/90° angle guide

22" 8PPI	BOX QTY.

Rapiertstar – More than superior fasteners and fixings.

For over twenty three years, Rapiertstar has led the market in the design development and supply of technically advanced fixings and building maintenance solutions.

All Rapiertstar products are designed and manufactured to exacting quality standards. This commitment to quality is further safeguarded within Rapiertstar's unique comprehensive in-house test facility.

Rapiertstar award winning specialist fixings include STARPVCU carbon steel and corrosion resistant stainless steel window screws – which are specified on many leading PVCu, aluminium and wooden window manufacturing systems, STARFIX plug-free masonry fixings, STARTURN universal timber screws, STARDECK specially developed exterior decking screws, STARPIN and STARNAIL stainless steel polymer headed pins and nails.

Many of the specialist wood and masonry screws feature the patented STARFORM thread, which lowers drive in torque and reduces assembly time – without pre-drilling. Fixings are further enhanced with specialist head styles and superior corrosion resistant materials and coatings.

Latest innovative products include PROSHIELD™, a water repellent environmentally friendly masonry treatment that is quick and easy to apply. It penetrates to provide breathable, invisible protection from damaging water ingress, maintaining masonry appearance whilst reducing maintenance costs.

PROSHIELD™ can improve the thermal efficiency of an exposed dwelling wall on average by 30%. – without expensive and feature changing additions, such as cladding and other intrusive insulation systems.

Other finishes available in yellow passivated and stainless steel. Please contact our sales office for more details.

CSR Range
Furniture and Hardware
to Reinforced PVCu Profiles

- Countersunk head, self-tapping thread with self-drilling into steel point
- Recess: Phillips No.2
- Typical application: keep to reinforced frame or butt hinge to door sash
- Zinc finish

The Snapper®

- Fixing device that enables you to install a fully glazed window in 5 minutes
- Fits between frame and masonry
- No drilling
- No plastering
- No de-glazing on site

What is a 'Snapper'?

- A stainless spring-steel fixing with angled serrated tongues, which is fixed to the frame itself during manufacture
- It can be used with PVCu, timber or aluminium frames
- Drilling through the frame into the masonry is not necessary, the window is installed fully glazed
- Snapper will bite into all building materials

How does a 'Snapper' work?

- Located on the frame, the serrated tongues allow the frame to be pushed into place while acting as a reversed anchor that resists movement in the opposite direction
- Fitting the window takes 5 minutes
- Seal in the normal way then move on to the next installation

What about expansion?

- The Snapper is a double spring and will allow expansion and contraction without releasing its grip on the surrounding material
- The Snapper will adjust for frame-to-masonry tolerances of 1mm to 15mm

How strong is 'Snapper'?

- Made of austenitic stainless spring steel to BS 5770 compression and hard rolled with a tensile strength of approx. 80 tonnes per sq. in.
- The Snapper will survive a lateral pull on a frame of over 5 tonnes

Universal Fixing Cleats

- Universal fixing cleat compatible with most PVC systems
- Manufactured from galvanised steel
- 1.2mm thick, no frame deduction required
- Twist fit for speed of installation with screw fix detail (202mm)
- One size works with 50, 75 and 100mm cavities
- Lip/claw height 5.2mm

Bow Canopies

- Manufactured in strong G.R.P.
- Suitable for openings between 1500mm and 3400mm
- Hollow or foam filled
- Finishes: 3 shades of white, chocolate brown, oak and rosewood
- Cuts fitting time to a minimum and can be completed by an installer, eliminating lead work and plaster ceilings etc.

BOW SIZE	DIMENSIONS (mm)							
	A	B	C	1D	2D	E	F	H

TERMS & CONDITIONS

WINDOW WARE – (“THE SELLER”) – GENERAL CONDITIONS OF SALE

1. DEFINITIONS AND INTERPRETATIONS

(1) In these conditions:- “Buyer” means the person who accepts a quotation of the Seller for the sale of the Goods or whose order for the Goods is accepted by the Seller. “Conditions” means these standard terms and conditions of sale. “Consumer” means a Buyer that is entering into the Contract not in the course of business. “Contract” means the contract for the sale and purchase of the Goods (in which these Conditions apply). “Goods” means the goods (including any instalment of the goods or any parts for them) which the Seller is to supply pursuant to or in connection with the Buyer’s purchase order and Contract. “Service” means the service if any which the Seller is to perform pursuant to or in connection with the Buyer’s purchase order and the Contract.

(2) Any reference in these Conditions to any provision of a statute shall be construed as a reference to that provision as amended, re-enacted or extended at the relevant time.

(3) If the Buyer is a Consumer then Clause 17 applies.

2. ACCEPTANCE AND AMENDMENT

(1) These Conditions shall (unless or except to the extent a director of the Seller otherwise agrees in writing) apply to all tenders, offers, quotations, acceptances, agreements and deliveries relating to the sale of Goods and/or the provision of the Service by the Seller and the Buyer shall be deemed to assent thereto.

(2) No other conditions or modifications of these Conditions shall be binding on the Seller unless agreed by a director of the Seller in writing and the Seller shall not be deemed to accept such other conditions nor to waive any of the Conditions by failing to object to provisions contained in any purchase order or other communication from the Buyer.

(3) No representative, agent or salesman who is not a director of the Seller has any authority to amend or waive any of the Conditions or other provisions of the Contract.

3. SPECIFICATIONS

(1) Any advice or recommendation given by the Seller or its employees or agents as to the storage, application or use of the Goods which is not confirmed in writing by the Seller is followed or acted upon entirely at the Buyer’s own risk, and accordingly the Seller shall not be liable for any such advice or recommendation which is not so confirmed. Such advice or recommendation shall not form part of the Contract or Conditions.

(2) All descriptions, specifications, drawings, weights, dimensions, capacities, prices, performance ratings and other data quoted or submitted by the Seller or included in any sales literature, quotation, price list, acknowledgement of order, invoice or other document or information issued by the Seller are to be deemed approximate only (except where stated in writing to be exact or expressly made of the essence) and subject thereto none of such items or any part thereof shall form part of the Contract.

(3) Any typographical, clerical or other error or omission in any sales literature, quotation, price list, acknowledgement of order, invoice or other document or information issued by the Seller shall be subject to correction without any liability on the part of the Seller.

(4) The Seller reserves the right to make any changes without notice in the specification of the Goods which are required to conform with any applicable safety or other legal requirements or which do not materially affect their quality or performance.

(5) Where the Buyer supplies or specifies materials to be used in the Contract the Seller will not be liable for any defect in the Goods or the Service or errors in delivery or performance caused by defects in or unsuitability of materials so supplied or specified.

4. ORDERS

No order which has been accepted by the Seller may be cancelled by the Buyer except with the agreement in writing of the Seller and on terms that the Buyer shall indemnify the Seller in full against all loss (including loss of profit), costs (including the cost of all labour and materials used), damages, charges and expenses incurred by the Seller as a result of cancellation.

5. PRICES

(1) Unless otherwise agreed in writing or stated on the Seller’s

acknowledgement of order the price for the Goods and/or the Service shall be the Seller’s list price at date of the Seller’s acceptance of the Buyer’s order.

(2) After an order has become binding on the Seller, all prices will have VAT added at the appropriate rate and are subject to increase to reflect any increases in costs to the Seller (including without limitation costs of materials, labour, transport and services, and fluctuations in currency exchange rates and any tax, duty, fee or charge imposed by any government or other authority) prior to delivery, any change in delivery dates, quantities or specifications for the Goods or the Service which is requested by the Buyer, or any delay caused by any instructions of the Buyer or failure of the Buyer to give the Seller adequate information or instructions.

(3) Unless otherwise agreed in writing or stated on the Seller’s acknowledgement of order, packaging, delivery and transport charges and insurance are not included in the price and will be charged at extra at the Seller’s then current rates for the same.

(4) From time to time, prices for items advertised on the Seller’s website may differ from prices shown in the then current catalogue or on the Seller’s trade counter. In these circumstances the Seller is not obliged to honour any website price (except on orders placed through the website).

(5) ‘While Stocks Last’ and similar pricing promotions may be withdrawn by the Seller at any time without prior notice. The Seller is not obliged to honour any orders placed where promotional stock has been exhausted, even where this is due to an error or omission on the part of the Seller.

(6) In the event of an obvious pricing error, where the goods are incorrectly priced, the Seller is not obliged to supply the Goods at the incorrect price.

(7) Where orders are placed through the website, acceptance will only be when the Goods are despatched. Notwithstanding this, we may send an email confirming receipt of your order. This is not acceptance and we will not be bound until the Goods are despatched.

6. PAYMENT

(1) Unless otherwise agreed in writing or stated on the Seller’s acknowledgement of order, the net invoice amount shall become due for payment by the Buyer 30 days after date of invoice or (if earlier) upon the occurrence of any circumstances whereunder, pursuant to the Contract or these Conditions, payment falls immediately due. Time of payment shall be of the essence of the Contract.

(2) The Seller reserves the right at any time before proceeding further with an order to demand full or partial payment of monies due and payable under the Contract and under any other contract between the Seller and the Buyer.

(3) If the Buyer defaults in any payment the Seller may in addition to exercising the right contained in Condition 6.2 above suspend work, delay or withhold delivery or performance or cancel the Contract or suspend, delay or withhold delivery or performance under or cancel any other contract between the Seller and the Buyer and retain any progress payments on account already received under the Contract or under any other contract between the Seller and the Buyer.

(4) Interest at annual rate of 3 per cent above the base rate from time to time of Barclays Bank plc is payable on all overdue monies.

(5) The Seller shall have a lien on all undelivered Goods which the Buyer agrees to purchase from the Seller for all monies due from the Buyer to the Seller under any contract between them and the Buyer shall have no right of set-off in respect of such monies.

(6) All rights and remedies afforded in these Conditions for non-payment shall be in addition and without prejudice to all other rights and remedies available to the Seller under the Contract or at law.

7. DELIVERY

(1) Time of delivery is not of the essence of the Contract and any time or date specified by the Seller as the time at which or the date on which the Goods will be delivered or the Service will be performed is given and intended as an estimate only and the Seller shall not be liable for any loss, damage or expense howsoever arising from delay in delivery.

(2) The Seller reserves the right to make delivery by instalments unless otherwise expressly agreed in writing. The period during which delivery by instalments may be made and the quantity of Goods delivered in each instalment shall be at the Seller’s discretion.

(3) Where Goods are delivered in instalments, each delivery shall constitute a separate contract (in which these Conditions apply), (mutatis mutandis) and failure by the Seller to deliver any one or more of the instalments or any claim by the Buyer in respect of any one or more instalments shall not entitle the Buyer to treat the Contract as repudiated.

(4) Notwithstanding any express agreement as to the date of delivery of the Goods or performance of the Service the Seller may postpone or cancel delivery or performance in whole or in part when it is delayed in or prevented from making or obtaining any Goods or materials or parts or components or services therefore making delivery of any goods or performing any Service by, including but not limited to an act of God, strikes, lockouts, trade disputes or labour troubles or any cause beyond the Seller's reasonable control. During any of such events the Seller's obligations shall be suspended until such events cease or until the Seller cancels delivery or performance (as the case may be) and the Seller shall not be required to obtain elsewhere in the market goods or services with which to replace or permit it to produce Goods or perform the Service delivery or performance of which has been postponed or cancelled as a result of any production of the said events. In the event of cancellation, the Seller shall be paid pro rata for Goods delivered or work done to the date of cancellation.

(5) If the Buyer fails to take delivery of Goods or to give the Seller adequate delivery instructions at the time stated for delivery (otherwise than by reason of any cause beyond the Buyer's reasonable control or the Seller's fault) then, without prejudice to any other right or remedy available to the Seller (including its right to payment) the Seller may:-

(i) Attempt to re-deliver the goods, and charge the Buyer for the reasonable cost of transport; and

(ii) store the Goods until actual delivery and charge the Buyer for the reasonable costs (including insurance) of transportation and storage; and

(iii) sell the Goods at the best price readily obtainable and (after deducting all reasonable storage, transport and selling expenses) account to the Buyer for the excess over the price under the Contract or charge the Buyer for any shortfall below price under the Contract; and the Buyer shall indemnify the Seller in full against all losses, damages, charges and expenses incurred by the Seller as a result of the Buyer's said failure to take delivery or give adequate delivery instructions to the extent that the Seller's said losses, damages, charges and expenses are not covered by any payments made or monies obtained under (i), (ii) or (iii) above.

(6) Without prejudice to any other right or remedy of the Seller whether under these Conditions or otherwise, if the Buyer is to pay the Seller for the Goods on delivery of the Goods and fails to do so the Seller reserves the right not to deliver the Goods and to charge the Buyer for such attempted delivery and any later delivery of the Goods at the Seller's then current rates for the same.

(7) The Buyer shall be solely responsible for the proper unloading of the Goods. If, to assist the Buyer remove the Goods from point of delivery, the Seller or any sub-contractor does any loading or unloading of goods free of charge, no liability whatsoever shall thereby be incurred by the Seller or sub-contractor and the Buyer shall indemnify the Seller in respect thereof.

(8) Unless agreed otherwise by the Seller the Goods will be delivered to the Buyer's premises stated on the Seller's acknowledgement of order, subject to Condition 5.3 of these Conditions.

8. BUYER'S OBLIGATIONS AND CLAIMS ON DELIVERY & RETURNS POLICY

(1) The Buyer will:-

(i) Sign for any damages or lost packages at time of delivery; and

(ii) notify the Seller in writing within 5 days of delivery or before manufacturing with the Goods, whichever is the earlier, of any error in quantity, weight or description of Goods delivered.

(2) Failure to make any notification in accordance with paragraph Condition 8.1 above could mean that the buyer is unable to make a claim.

(3) Goods can only be returned in accordance with the following:

(i) Returns will be at the sole discretion of the Seller and Goods may only be returned upon receiving written consent from the Seller. The Sellers Returns Policy must be followed so that Goods can be clearly identified upon receipt and credited by the Seller in a timely manner; and

(ii) goods should not have been used or damaged by the Buyer in any way. Returns should be sent back to the Seller in a re-saleable condition in the original packaging unless signed for as damaged, or were defective at point of receipt by the Buyer; and

(iii) unless Goods are defective, or have been sent by the Seller in error, returned items will be subject to cost of collection and a restocking charge which will be notified to the Buyer in advance. When a collection date has been agreed by the Buyer and the Seller but the carrier notifies the Seller there was nothing to collect, the Seller will pass on these fees to the Buyer.

10. TITLE TO GOODS All goods are supplied to the Buyer by the Seller on the following terms:

(1) The goods shall remain the sole and absolute property of the Seller as legal and equitable owner until such time as all sums due to the Seller from the Buyer, whether in respect of the goods or other goods or services, have been paid in full.

(2) Until such payment the Buyer shall be in possession of the goods solely as bailee for the Seller and shall store the goods separately in such a way as to enable them to be identified as the property of the Seller and maintain the Goods in satisfactory condition.

(3) The Seller reserves the immediate right at any time of re-possession of any goods to which it has retained title and thereafter to re-sell the same and for this purpose the Buyer hereby grants an irrevocable right and licence to the Seller's employees and agents to enter at any time upon all or any of its premises with or without vehicles during normal business hours. This right shall continue to subsist notwithstanding the termination of the contract for any reason and is without prejudice to any accrued rights of the Seller hereunder or otherwise.

(4) As a separate and independent condition, the Buyer shall be at liberty and may in the ordinary course of its business and prior to title passing, sell and deliver the goods to any third party but such right shall immediately cease should any of the events in 13(1) apply to the Buyer.

(5) Whilst the goods remain the property of the Seller, the Buyer shall insure the goods against all usual risks for an amount equal to or greater than the purchase price and hold the proceeds of such insurance on trust for the Seller.

11. WARRANTIES AND LIABILITY

(1) Subject as expressly provided in these Conditions all warranties, conditions or other terms implied by law are excluded to the fullest extent permitted by law, whether relating to the Goods and/or the Service or otherwise.

(2) The Seller will give a guarantee in respect of the Goods and/or the Service in its standard form from time to time for that type of Goods or the Service (as the case may be).

(3) Except as expressly provided in these Conditions, the Seller shall have no liability to the Buyer (whether arising under contract, tort (including negligence), breach of statutory duty or otherwise) in excess of the price of the Goods and shall have no liability for any indirect, special or consequential loss or damage or for any loss of profit, loss opportunity, loss of sales or loss of goodwill, costs, expenses or other claims for compensation whatsoever which arise out of or in connection with the supply of goods or their use or resale by the Buyer. Nothing in these Conditions shall limit or exclude the Seller's liability for death or personal injury, any fraud or for any other liability which it is not permitted to limit or exclude by operation of law.

12. TRADEMARKS, PATENTS AND OTHER INDUSTRIAL RIGHTS

(1) If any claim is made against the Buyer alleging that the Goods or the Service infringe any patent rights, registered designs, copyright or other industrial property rights of another then:- (i) the Buyer shall forthwith notify the Seller with full particulars; and (ii) the Seller or its suppliers or licensors (as the case may be) shall be at liberty at their expense to conduct all negotiations and/or litigation in respect thereof and (if necessary) in the name of the Buyer; and (iii) except pursuant to a final award, the Buyer shall not pay or accept any such claim or compromise any proceedings without the consent of the Seller (which shall not be unreasonably withheld or delayed); and if as a result of such negotiations or litigation the Buyer shall be unable to use the goods substantially for the purpose for which they were bought the Seller shall (except where Condition 13 below applies) take them back and refund the price thereof and such refund shall be in full satisfaction of all claims by the Buyer against the Seller.

(2) The Buyer shall indemnify the Seller against all actions, costs (including cost of defending legal proceedings), claims, proceedings and demands in respect of any infringement or alleged infringement by the Seller of patent rights, registered design, copyright, design rights or other industrial rights attributed to the Seller complying with any special instructions from or requirements of the Buyer relating to the Goods or the Service.

continued over...

TERMS & CONDITIONS

(3) The Buyer shall not represent to its customers that it sells products manufactured by the Seller after the Buyer shall have ceased to purchase such products on a regular basis from the Seller and in such event the Buyer shall return to the Seller all sales literature relating to products manufactured by the Seller.

13. INSOLVENCY OF THE BUYER

(1) This Condition applies if:-

(i) the Buyer makes any voluntary arrangement with its creditors or (being an individual or firm) becomes bankrupt or (being a company) becomes subject to an administration order or goes into liquidation (otherwise than for the purpose of amalgamation or reconstruction); or

(ii) an encumbrancer takes possession, or a receiver is appointed, of any of the property or assets of the Buyer; or

(iii) the Buyer ceases, or threatens to cease, to carry on business; or

(iv) the Seller reasonably apprehends that any of the events mentioned above is about to occur in relation to the Buyer and notifies the Buyer accordingly.

(2) If this Condition applies then without prejudice to any other right or remedy available to the Seller, the Seller shall be entitled to suspend work, delay or withhold delivery under or cancel the Contract without any liability to the Buyer, and if the Goods have been delivered but not paid for the price shall become immediately due and payable notwithstanding any previous agreement or arrangement to the contrary.

14. AGE REQUIREMENTS FOR SPECIFIC GOODS

Where the Buyer places an order for age-restricted goods such as solvents or knives, the buyer confirms that they are over the age of 18 and that delivery will be received by a person over the age of 18.

15. DISPOSAL OF ELECTRICAL AND ELECTRONIC EQUIPMENT

The WEEE regulations exist to ensure that disposal of certain electrical and electronics items is carried out in a sound environmental manner. All Buyers agree that they will be responsible for collection and disposal of any electrical and electronic equipment procured from the Seller.

16. GENERAL

(1) The Seller is a trading division of Heywood Williams Components Limited, itself a member of the group of companies whose holding company is Arran Isle Ltd., and accordingly the Seller may perform any of its obligations or exercise any of its rights by itself or through any other member of its group, provided that any act or omission of any such member shall be deemed to be the act or omission of the Seller.

(2) Any notice given hereunder must be in writing and may be affected by personal delivery, facsimile transmission, email (to finance@windowware.co.uk) or by registered mail postage and (subject, in each case to proof that such notice was properly addressed and dispatched) if effected by facsimile transmission or email shall be deemed to be received on the day of sending and if effected by post shall be deemed to be received 48 hours after the date of posting.

(3) The Contract shall be personal to the Buyer and shall not, nor shall any rights under it, be assigned by the Buyer without the written consent of the Seller.

(4) No waiver by the Seller of any breach of the Contract by the Buyer shall be considered as a waiver of any subsequent breach of the same or any other provision.

(5) The Contract (and these Conditions) shall be governed by and constructed in accordance with the laws of England.

(6) If any provision of the Contract (or these Conditions) is held by any competent authority to be invalid or unenforceable in whole or in part the validity of the other provisions of the Contract (or these Conditions) and the remainder of the provision in question shall not be affected thereby.

17. TERMS APPLYING TO CONSUMERS ONLY

(1) PLEASE NOTE THAT THIS SECTION ONLY APPLIES WHEN THE BUYER IS ENTERING THE CONTRACT AS A CONSUMER

(2) Where the Buyer is a Consumer under the Unfair Contract Terms Act 1977 (the Buyer enters into the Contract not in the course of business), the following provisions may, subject to determination by the Courts, have no force or effect:

(i) 6(5) – no right of set-off;

(ii) 6(4) – payment of interest on late payment;

(iii) 10(3) – right of entry and re-possession;

(iv) 11(1) and 11(3) – liability;

(v) 4, 7(5)(iii), 7(7) and 12(2) – indemnities.

(3) Should any defect occur in the Goods, other than one for which the Buyer is responsible, the Seller will at their option either, replace or repair the Goods (at no charge to the Buyer) as soon as is reasonably practicable.

(4) Following receipt of the Goods, the Buyer can cancel their order by notifying the Seller within 14 working days of the date on which the Goods were delivered. The Buyer can return the Goods for a refund. If the Buyer's purchase order comprises of more than one item the Buyer can cancel and return any of the items individually or in combination.

(5) Where the Buyer cancels their order after the Goods have been delivered or collected the Buyer agrees to return the Goods to the Seller by following the procedure set out below..

(6) The Buyer agrees to return the Goods in full, in a resalable condition and securely packaged (properly repacked in their original packaging if they were removed from it) and unused. The Buyer is responsible for all costs of returning the Goods subject to the exceptions set out below.

(7) Nothing within these Conditions affects the Buyer's rights under law, and in particular the Buyer will always be entitled to return products to the Seller for a full refund if they were misdescribed, or are not of satisfactory quality or reasonably fit for their purpose and the Seller cannot remedy the fault to the Buyer's reasonable satisfaction. Only in such circumstances and/or if the Seller provides the Buyer with substitute products which the Buyer does not want will the Seller refund the Buyer's reasonable costs to return the products to the Seller.

(8) If the Goods are damaged whilst in the Buyer's care (including damage caused in assembling or disassembling the Goods), if the Buyer fails to return all parts of the Goods or otherwise if the Buyer's failure to take reasonable care of the Goods means that the Seller reasonably believes that a resale will not be possible, the Buyer agrees that the Seller may withhold payment of all or part of the refund in respect of the Goods as compensation for the Seller's loss on these Goods.

(9) The Seller will make all refunds to the card used for payment.

18. DATA PROTECTION

(1) We will make a search with a credit reference agency which will keep a record of that search and will share that information with other businesses. We may also make enquiries with a credit reference agency. If supplying payment data to a credit reference agency we will monitor and record information relating to your trade performance and such records will be made available to credit reference agencies, who will share that information with other businesses in assessing applications for credit and fraud prevention. For Credit Circle members we will record information relating to your trade credit performance and such records will be made available to other organisations to access applications for credit.
