

TTF Slimline Window Ventilator

**WINDOW
WARE**
We've got it

Trickle vent to meet build regulations & match any RAL colour

The slender TTF Slimline aluminium through-frame window trickle ventilator from RW Simon is robust, durable and offers the perfect solution to securely ventilate a room and conform to building regulations while keeping the elements and insects out. This vent is available off the shelf in four popular colours (white, anthracite grey, anodised silver and black), but can also be custom coloured on request to match any RAL colour and work in harmony with most windows.

The vent is easy to fit and requires only a small rout to shorten build time. With integrated updraught, excellent performance, a choice of manual or cord operation to suit most preferences, this slot vent delivers controllable, draught-free, unobtrusive ventilation to tick all your boxes.

Key features and benefits:

- Suitable for PVCu, Aluminium and Timber Windows for **flexible application**
- Delivers 2500 EA to comply with Approved Document F 2006
- Available with easy-to-use manual or cord operation to suit most preferences
- Fully controllable and draught-free to **keep homeowners happy**
- Easy installation to **save fitting time and avoid hassle**
- Ideal for new builds and retro-fitting
- Available in 4 single or dual standard colours – HIPCA white (RAL 9910), anthracite grey (RAL7016), anodised silver and black (RAL 9005)
