

Glazpart Link Vents Mk2

High-performing compact window vent

Glazpart has taken trickle vents to a whole new level with the launch of their new Link Vent Mk2. Delivering 2500 Equivalent Area (EQA) performance, the Link Vent Mk2 ticks all the boxes for building designers, window fabricators, installers and homeowners alike. With its sleek design and wide choice of solid colour finishes, this vent can blend into virtually any kind of uPVC, timber or aluminium window for clean lines and unrivalled aesthetics. LABC certification guarantees compliance with building regulations on ventilation (great news for trade professionals), while the noise- and draught-reducing design keeps homeowners happy too. In addition, proven colour stability, high thermal performance and mechanical durability help to ensure low-maintenance, trouble-free operation and good looks for years!

Key features:

- Compact, low-visibility design - canopy extends just 25mm from the window
- Wide choice of solid colours. RAL colour matching and woodgrain finishes also available
- Optimised airflow means the 2500 vent achieves the performance of a vent twice its size
- Small 204mm x 13mm slot reduces routing time and keeps noise levels to a minimum - just 51dB for the 2500 vent in the closed position
- LABC approved guarantees compliance with building regulations
- Can be either screw- or clip fixed for a quick, easy fit
- Robust, sturdy design - no end caps to lose or break
- High thermal performance and excellent colourfastness
- Improved airflow means the vent is smaller and can be fitted in sashes
