

Supa™ Stainless Steel Escutcheon

SUPA™

Stainless Steel

PRODUCT INFORMATION

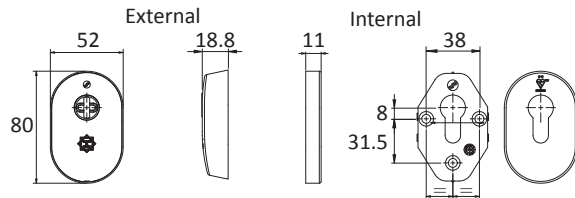

Boasting the same superior surface finish guarantees as the rest of the Supa™ range, these ultra-corrosion resistant stainless-steel escutcheons are most definitely made to last. The Supa™ Secure, Supa™ Secure pull and Supa™ pull variants are made from resilient grade 304 stainless steel, while the Supa™ standard version is even tougher in marine grade 316. That guarantees these escutcheons will be looking great for years to come, whether they're fitted on doors in the heart of the city or right by the sea!

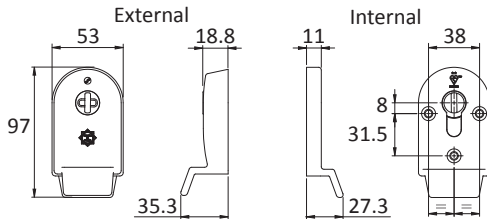

- Three escutcheon designs available
- Suitable for PVCu, composite, aluminium and timber doors
- Clever design features such as clip-on covers conceal screw fixings for a neat finish
- The security versions are Secured by Design accredited, BSI Kitemarked and CE marked to visually deter burglars and resist forced entry.
- Security escutcheons also have chamfered anti-grip shoulders, so burglars can't get leverage and an anti-drill design to protect the cylinder from attack.
