*We've got it*

OMEC panic hardware is quality-manufactured in Italy to provide a secure, adaptable, hard-working and reliable way to operate emergency exit doors. Choose from fully reversible slave or active panic push bar kits that fit both left- and right-hand, single- and double-door arrangements with up to three locking points for maximum flexibility and minimal stock holding. Fabricators can also customise their assembly with a lever handle for external access or a neat 95mm square push pad instead of the standard green panic push bar.

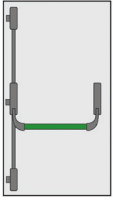

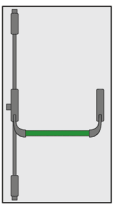

## Features:

- Fabricator-friendly surface mounted design
- Aluminium covers clip over the operating rods to give clean lines & vandalism protection
- Push bar latch mechanism tested to over a million cycles
- Designed and tested according to EN 1125:2008
- Suitable for doors up to 1200mm wide by 2500mm high
- Standard finish: powder coated black with RAL6024 green push bar
- Kit includes strikers to suit most PVCu timber & aluminium doors
- Optional push pad
- Also available external lever handle (fits doors 40-85mm thick)
- Not suitable for doors narrower than 800mm
- Not to be used on fire doors
- To make a double door setup you would use 1 x OPB10025 & 1 x OPB10035
