

Paracryl Parafill Acrylic Caulk Filler

PRODUCT INFORMATION

Paracryl Parafill is ready-to-use and perfect for filling cracks, static joints, gaps, and holes up to 50mm deep and 50mm wide (larger joints must be filled in several steps with 1 day in between). It is easy to apply and has very strong adhesion on porous materials such as stone, concrete, brickwork, and plaster etc. It will not sag, shrink, or crack and is paintable once dry.

- Excellent adhesion without primer
- Does not sag, shrink or crack
- Suitable for indoor use only
- Paintable after a few minutes, ideally after \pm 2 hours
- Can be abraded after 1 day
- Phthalate free
- Processing temperature: between 5°C & 35°C
- Available in 310ml tube or 1 litre tub
