Electric Window Controls

1 GANG SWITCH AND BOX

This S50-1 Rocker switch is part of the Highline electric window controls range and can be used to control the open/close operation of both 230V AC actuators and 24V DC actuators (via 24V DC controllers) which are available by special order.

- 2-way centre off retractive switch
- 10 Amp (max)
- 1-Gang (2-Gang, 3-Gang and 4-Gang versions available upon request)
- Controls the movement of 230V AC window actuators (or 24V DC controllers if required)
- Supplied with surface-mounted box
- Dimensions: 86 x 86 x 28mm

CCU2 WINDOW CONTROL UNIT 230V - RAIN & TEMPERATURE ACTIVATION

This compact window control unit is a great way to automatically achieve natural ventilation and ensure a more comfortable environment in stuffy rooms or stifling conservatories. With the digital display, it's quick and easy to program the system to automatically open and close windows or roof vents to achieve a specific room temperature, as well as ensure windows are shut and watertight whenever it rains.

- Control unit for 230V AC Window actuators (max output 8 Amp)
- Automatically opens windows if room gets too hot and closes them according to temperature or when it rains.
- Rain sensor and temperature sensor included
- Digital display for simple programming of the desired room temperature
- High protection class IP 4X rated
- Open and close buttons on front of control panel for direct control

FUNCTIONS

Rain

Temperature

Manual Override

ADDITIONAL INCLUDED ITEMS

Rain Sensor

Temperature Probe

TECHNICAL SPECIFICATIONS

Voltage	230V AC
Output Current	8A
Protection Class	IP 4X
Dimensions	146 x 86 x 28mm
Inputs	Rain Sensor, Temperature Probe

PRODUCT INFORMATION

The Highline electric window controls range offers reliable, flexible and cost-effective systems to automate the opening of vents and high-level windows for natural ventilation. Natural ventilation improves the air quality of inside spaces by allowing clean, fresh air to enter the building while letting stale air out.

Our range of motorised single chain actuators are controllable from either a simple switch or a digital control panel with temperature, wind or rain activation. The 230V AC actuators featured in this brochure all run off standard mains electricity and are available from stock. 24V models for use in bathrooms and kitchens are also available by special order only.

Highlights of the range include the ever-popular ACK4 chain actuator (sometimes referred to as the MAC) with its 7 opening positions ranging between 100mm to 400mm and fitting brackets for most applications. Then there's the newer Micro EVO Actuator. Versatile enough to adapt to any application, it incorporates a synchronisation feature which lets you easily link several actuators together on the same window – perfect for operating wider casements.

We also have access to lots of other actuators and controls not shown in this brochure, so if you need something you can't see here, why not give our technical team a call on 01234 242724 to discuss your specific requirements.
