

Avantis® 750 Series Door Lock
2 Hookbolt,
Composite or Timber

This high-security locking system for timber and composite doors is armed with an impressive array of defences as standard. Every lock comes with Avantis' unique twin fix cylinder guard, which achieves anti-pick, anti-bump, anti-snap and anti-drill cylinder protection. In addition, the large hook and bolt system is capable of defeating even the most aggressive and determined attack, as well as ensure the door is pulled in top and bottom for a firm, even seal that prevents bowing.

Features:

- 16mm and 20mm faceplates, square and radius cut
- 35mm and 45mm back sets available
- PZ92/62mm dual follower centre case
- Sash rebates: min. 1852mm (1688mm with reduced handle height). Max. 2200mm
- Excellent compression: 25mm direct drive centre bolt & optional roller cams
- Accredited protection: large, strong security hooks and exclusive cylinder guard
- Profile-specific fully adjustable one-piece keeps simplify installation
- Suitable for timber and composite doors

Guarantees and certifications:

- Tested to PAS 24 & BS 6375
- Secured by Design accredited
- Corrosion-resistant to EN 1670: grade 4
- Tested over 50,000 cycles with a 10-year mechanical guarantee
