WELCOME

Axim offer a comprehensive range of secure, neat, durable and reliable closing solutions, panic exit devices, electric strikes, deadlatches and flush-bolts perfectly designed for commercial aluminium door-sets. Axim products not only conform to the latest building regulations and trade association guidelines, but their transom closers also achieve the reduced closing forces required to comply with the Disability Discrimination Act (DDA) in the UK.

Door Closers

Here, you'll find a closing solution to suit most aluminium door sets. And because the system is completely hidden within the door leaf and transom, it eliminates the need for any additional external hardware, for clean aesthetics and uninterrupted lines. Choose from Axim's fully adjustable TC-8800 series closers, TC-9600 series closers with extended side load or end load fittings available and the cost-effective TC-9900 replacement closer.

Flush Bolts & Keeps

Axim flush bolts secure the slave leaf on double aluminium doors at the top and bottom with a hardened steel 18mm diameter bolt that achieves maximum protection against unauthorised access. To aid assembly, all fixings are included, corners are 2.5mm radiused for easy matching to the cut-out, a centre punch helps locate the centre of the keep and all holes are pre-drilled and countersunk for M fixings.

Electric Strikes

Axim's ES-2200 electric strikes or electric door releases are designed to work with most deadlocks, as well as the Axim LK-2100 deadlatch, to create an access control system to secure a door. Whether you want fail-safe mode (so the door stays unlocked if the power fails) or fail-secure mode (so the door is locked in the event of a power outage) the ES-2200 will work for both. Axim electric strikes can also be configured on site to suit 12V or 24V systems.

Locks & Deadlatches

Axim LK-1800 series hook locks and LK-2100 series deadlatches deliver secure locking for a variety of commercial aluminium and steel doors including swing and sliding systems, providing flexible access control during and after business hours. Axim locks and deadlatches are designed to accept euro profile cylinders and are available in three different backsets.

Panic Exit Devices

Axim's PR Series of emergency and panic exit devices not only provide a reliable, easy-to-operate means of escape in the event of a fire or emergency, they offer excellent burglar protection too. Whether you want a BE EN 1125 compliant panic exit device operated by a horizontal bar for a public building or a BS EN 179 compliant emergency exit device operated by lever handle or push pad for an office space, you'll find an Axim solution to meet your needs.

TC-8800 Size 2 Concealed Overhead Transom Closer

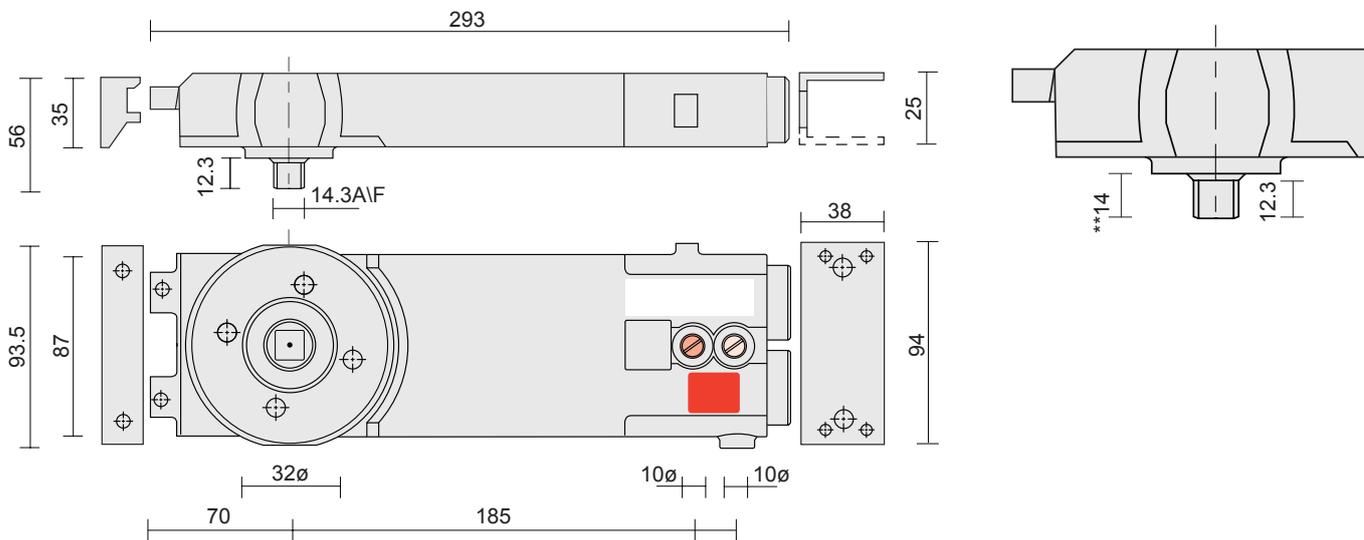

PRODUCT INFORMATION

The Axim TC-8800 universal concealed closer is a hidden commercial closing solution held integrally in the door leaf and transom. This means that the door requires no external hardware to create an uncluttered and secure solution. Choose from a variety of door control options to achieve the desired level of functionality such as no-hold opening for low-traffic areas or 90° hold-open for high traffic installations. The TC range is fully adjustable vertically and laterally so it's easy to ensure smooth operation and perfect closing.

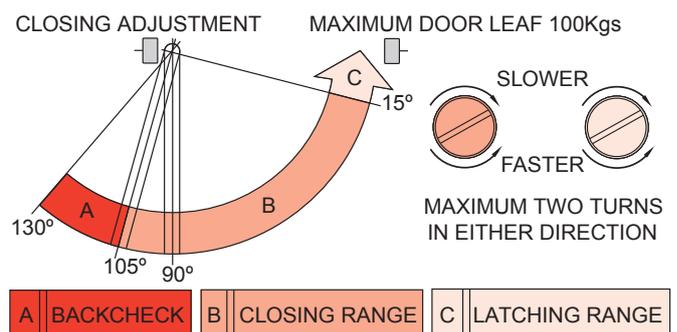

- Includes body unit and fixings – 70mm bracket size 2
- Suitable for single and double action doors
- 10mm and 15mm extended spindle models
- 2 valves for closing and latching speed adjustment
- Pre-set cushion back-check
- No hold-open or mechanical hold-open at 90° in stock (hold-open 105° available by special order)
- Suitable for door widths 751mm to 950mm
- Maximum door leaf weight 100Kg
- Standard & Anti finger trap package options are available
- Dummy unit available
- Conforms to EN 1154
- 30-month manufacturers guarantee

TC-9600 Series with Extended Spindle Concealed Overhead Transom Closer

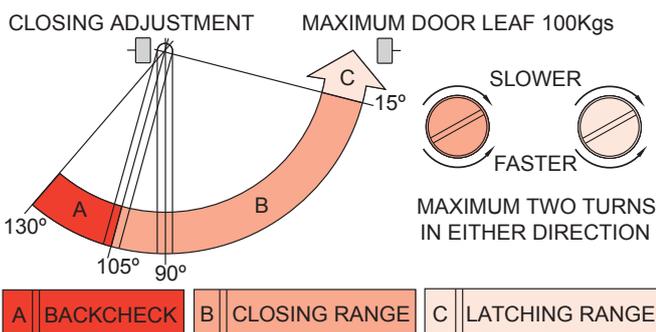

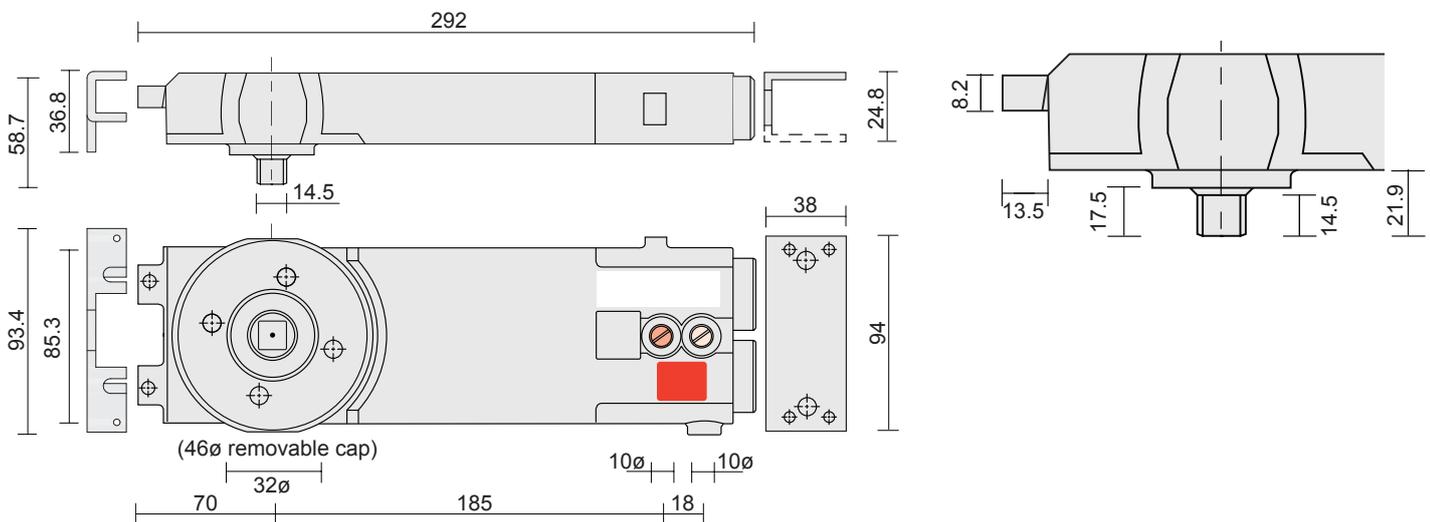

PRODUCT INFORMATION

The Axim TC-9600 concealed door closer offers all the functionality of the TC-8800 closer but with a longer spindle suitable for patch fittings and door rails. This sleek and reliable hidden closing system works for double or single door configurations to deliver controlled closing and hold-open functionality if required

- Includes body unit and fixings – 70mm bracket size 2
- Suitable for single and double action doors
- Extended spindle compared to TC-8800
- 2 valves for closing and latching speed adjustment
- Pre-set cushion back-check
- No hold-open or mechanical hold-open at 90°
- Size 2 closer suitable for door widths 751mm to 950mm
- Maximum door leaf weight 100Kg
- Standard & Anti finger trap package options are available
- Dummy unit available
- Conforms to EN 1154
- 30-month manufacturer's guarantee

TC-9900-ADJ Series Universal Concealed Overhead Transom Closer

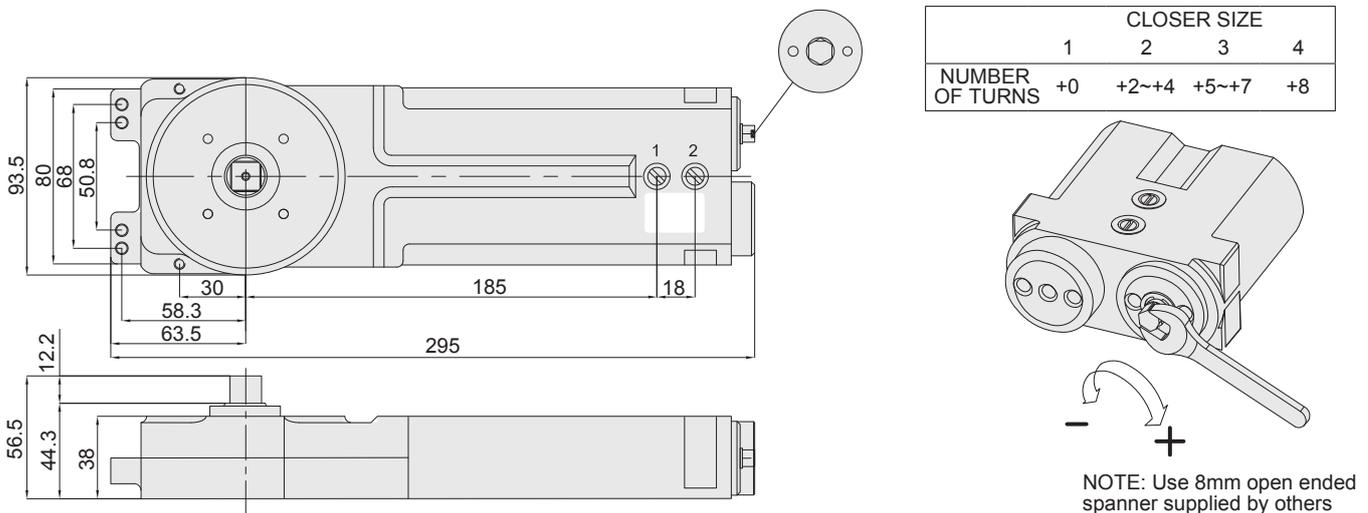

PRODUCT INFORMATION

The TC-9900 universal concealed door closer offers a sleek and smooth-operating closing solution for both new commercial door installations and replacement applications where other leading transom closers have failed. Quick and easy to fit, it will confidently replace the Axim TC-8800 series closer, as well as other leading brands such as Dorma, Peters Jackson, Newman, Tonks, Ryobi - all without costly modifications to the door or door frame.

- Includes body unit and universal fixings – 70mm bracket
- Suitable for single and double action doors
- 2 valves for closing and latching speed adjustment
- Pre-set cushion back-check
- No hold-open or mechanical hold-open at 90°
- Suitable for closer sizes 1-4 and door widths 750-1150mm
- Maximum door leaf weight 100Kg
- Standard & Anti finger trap package options are available
- Dummy body unit available
- Conforms to EN 1154
- 30-month manufacturer's guarantee

CLOSING ADJUSTMENT

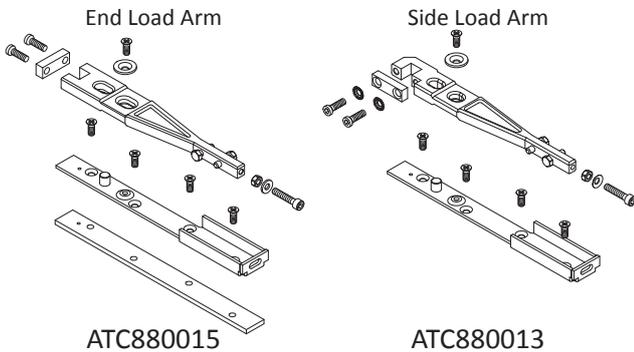

Independent valve screws permit closing speed adjustment from fully open to 15° and 15° to closed.

Side Load and End Load Arms for Transom Closers

PRODUCT INFORMATION

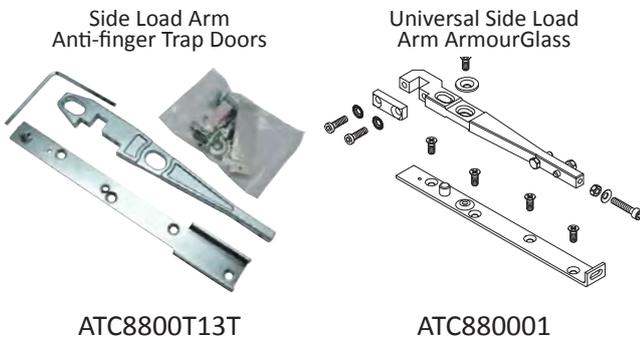

These arms are an essential component of the concealed transom door closer system. Available as either side loading (suitable for use on anti-finger trap doors, armour glass doors and those with a round door stile or narrow door rail) or end loading (for use with anti finger trap doors). These products are fully adjustable, come with hexagonal spanner and feature handy hole and centre lines in channel for easy location of pivot point.

End load- The door is fitted in the open position therefore the cut-out for the transom spindle is at the end of the arm – hence end load

Side load- The door is fitted in the closed position. Therefore the spindle cut-out is at the side of the arm – hence side load.

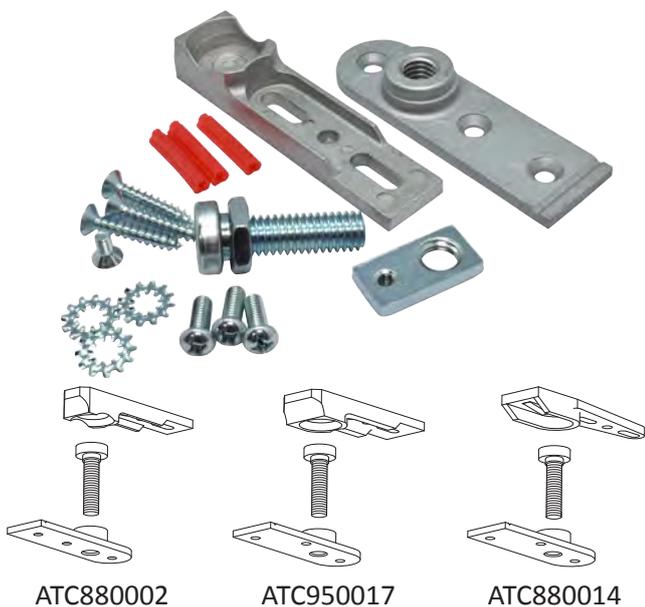

PART NUMBERS

Description	Size	Part Codes
End Load Arm	260 x 36.8 x 21mm	ATC880015
Side Load Arm	263 x 35 x 16mm	ATC880013T

Universal Side Load Arm - Armour Glass	260 x 34.2 x 16mm	ATC880001

Bottom Pivot Assembly for Transom Closers

PRODUCT INFORMATION

This bottom pivot assembly is an essential component of the concealed transom door closer system. It holds and supports the weight of the door and enables it to swing open and closed. Choose between standard side loading, end-loading or heavy duty bottom pivots which are used with anti-finger trap doors

23mm Wide Flush Bolts

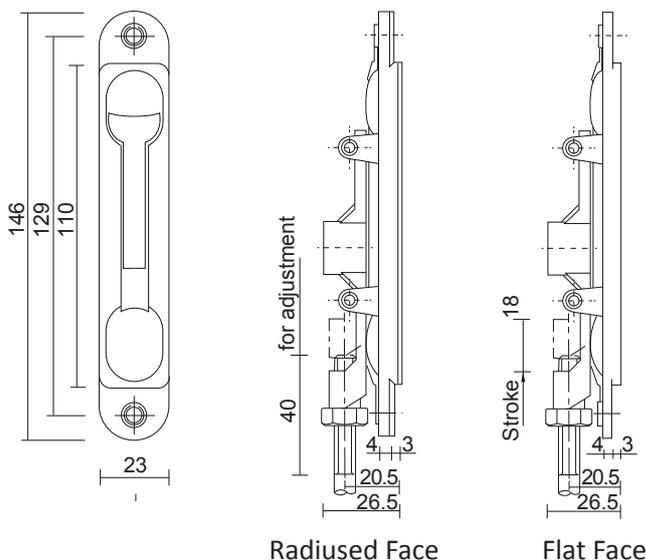

PRODUCT INFORMATION

These finger-operated shoot bolts work to secure the slave leaf on double aluminium door assemblies. They are rebated into the leading edge or inside face of the door and operated by a lever which sits flush when the bolt is engaged and the door is closed. To ensure ease of operation, Axim FB series flush bolts have a deep finger recess and large lever. A standard installation requires two flush bolts morticed into the top and bottom of the door. For maximum security the Axim flush bolt has a hardened steel bolt, zinc plated with an anti-rattle sleeve.

- Smooth lever action flush bolts
- Radiused faced or flat faced available
- Mounted in the leading edge or inside face of the slave leaf of a pair of doors
- Manufacturer's guarantee: 30 months
- Available in one fully threaded length, 305mm (12") which can be cut to suit
- Silver satin chrome finish
- Shoot bolt: 18 mm diameter and a die cast zinc alloy body mechanism
- Fixings included

FB-6300 and FB-6400 20mm Wide Flush Bolts

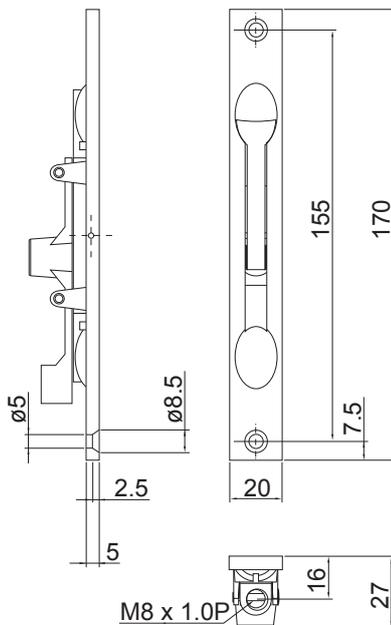

PRODUCT INFORMATION

These finger-operated shoot bolts work to secure the slave leaf on double aluminium door assemblies. They are rebated into the leading edge or inside face of the door and operated by a lever which sits flush when the bolt is engaged and the door is closed. To ensure ease of operation, Axim FB series flush bolts have a deep finger recess and large lever. A standard installation requires two flush bolts morticed into the top and bottom of the door. For maximum security the Axim flush bolt has a hardened steel bolt, zinc plated with an anti-rattle sleeve.

- Hardened steel zinc plated bolt with anti-rattle sleeve
- 18mm bolt stroke
- 7mm zinc plated steel rod with fully threaded length for easy adaption to non-standard door installations
- Length: 110mm or 230mm
- "Centre Punch" tip to mark centre of keep
- Die cast zinc alloy body mechanism
- Fixing holes tapped M5
- Fixings included
- Manufacturer's guarantee: 30 months
- Deep finger recess and large lever for ease of operation
- Available in 20mm widths

ES-2200 Electric Strike

PRODUCT INFORMATION

The Axim ES-2200 series of electric strikes are an ANSI style door release designed to work with most leading brand deadlocking night latch locks. They come complete with stainless-steel short and long faceplates for use in most metal or timber door frame applications. The Axim ES-2200 series are shipped as fail-secure and can be converted to fail-safe mode by the simple removal of a screw. The Axim ES-2200 can also be set to 12V or 24V by simply re-configuring the wires in a different sequence.

- 450kg Holding Force
- Simple fail-safe/fail-secure changeover
- Easy installation
- Can be set to 12/24V AC/DC on site
- AC fail-secure only & DC fail-safe/fail-secure
- Comes with stainless-steel flat design face plates in two sizes:
Short: 124mm x 31.7mm, Long - 201.5mm x 31.7mm
- Simple, effective replacement for most leading brand ANSI electric releases
- Supplied with 250mm of cable
- 10mm, 25mm and 50mm extension lips available
- Power consumption and current draw:
12/24V DC – 300mA, 24/24V DC – 150mA

LK-2100 Series Reversible Deadlatch

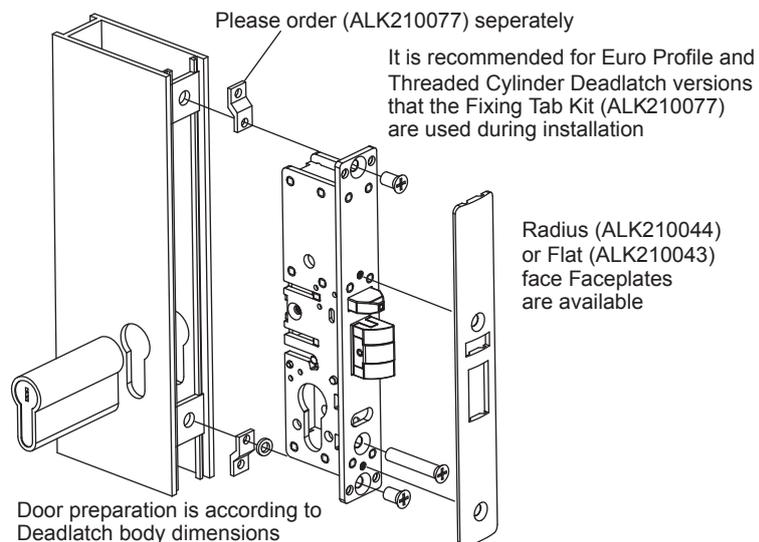

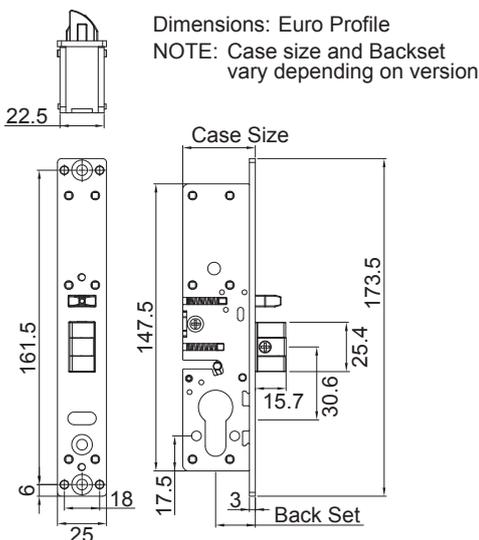

PRODUCT INFORMATION

The Axim LK-2100 series fully reversible deadlatch is non-handed for ultimate flexibility, cost-effectiveness and reduced stock holding. The LK-2100 deadlatch series accepts euro profile cylinders, with a choice of 25, 28 and 38mm backsets and strike plates to suit most single and double door configurations. An all metal case, sturdy construction and hardened steel pins help to prolong life and resist burglar attack.

- Latch bolt can be reversed without opening the deadlatch case
- Accepts euro profile cylinders
- 3 backsets available: 25mm, 28mm and 38mm
- Strike plates available to suit single and double door applications
- A reverse turn of the key while the bolt is retracted retains the latch in the case to allow two-way traffic when required
- All metal case and strong construction prevent certain unauthorised case entry
- Flat face or radius face faceplates available separately
- Suitable for use with the ES-2200 Electric Strikes
- 30 months manufacturer's guarantee

LK-1800 Series Mortise Hook Lock

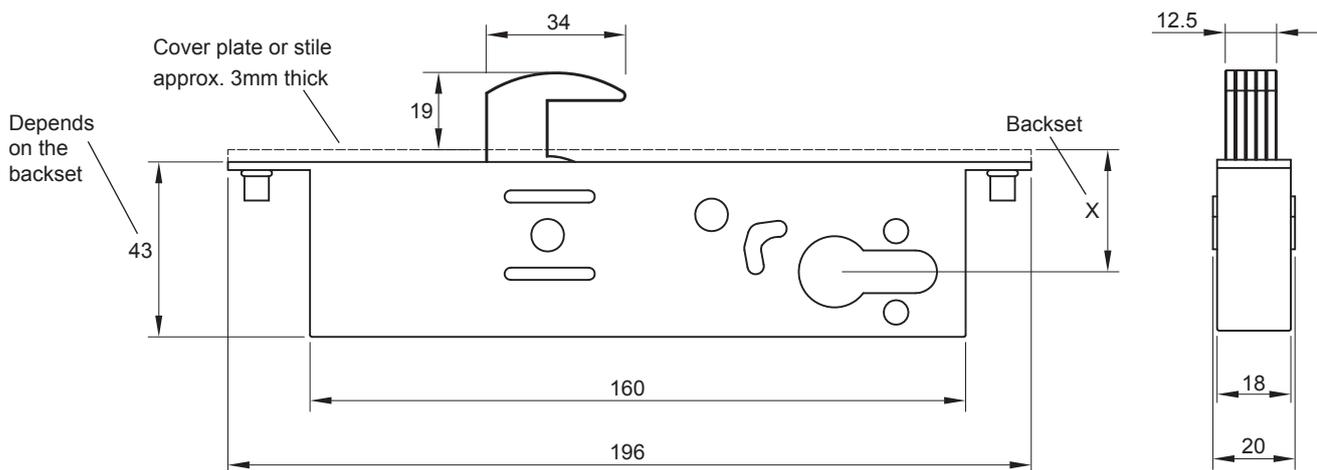

PRODUCT INFORMATION

If you're looking for a secure and affordable quality deadlocking system for narrow stile hollow metal doors, then the Axim LK-1800 mortise hook lock is just the job. A heavy-duty 5 ply laminated hook lock clasps the keep and stops the door from being separated from the frame, while a hardened case and roll pin resists hacksawing. The LK-1800 series accepts standard euro and round profile cylinders, with a choice of 25, 30 and 40mm backsets to suit most single and double aluminium or steel door configurations.

- Hacksaw-resistance 5-ply laminated hook bolt, hardened centre case and roll pin
- 19mm bolt throw
- Suitable for centre hung or offset pivot double or single aluminium and steel door assemblies
- Available in 25mm, 30mm and 40mm backset options
- Axim locks are designed to accept euro profile cylinders as standard (round cylinder version on special order)
- Flat (ALK18010F) or radius (ALK18010R) faceplates available with a natural satin silver anodized finish
- Steel case and mechanism have a corrosion-resistant zinc coating
- 30 months manufacturer's guarantee

PR-7200 Series Full Width Release Panic Bar Exit Device

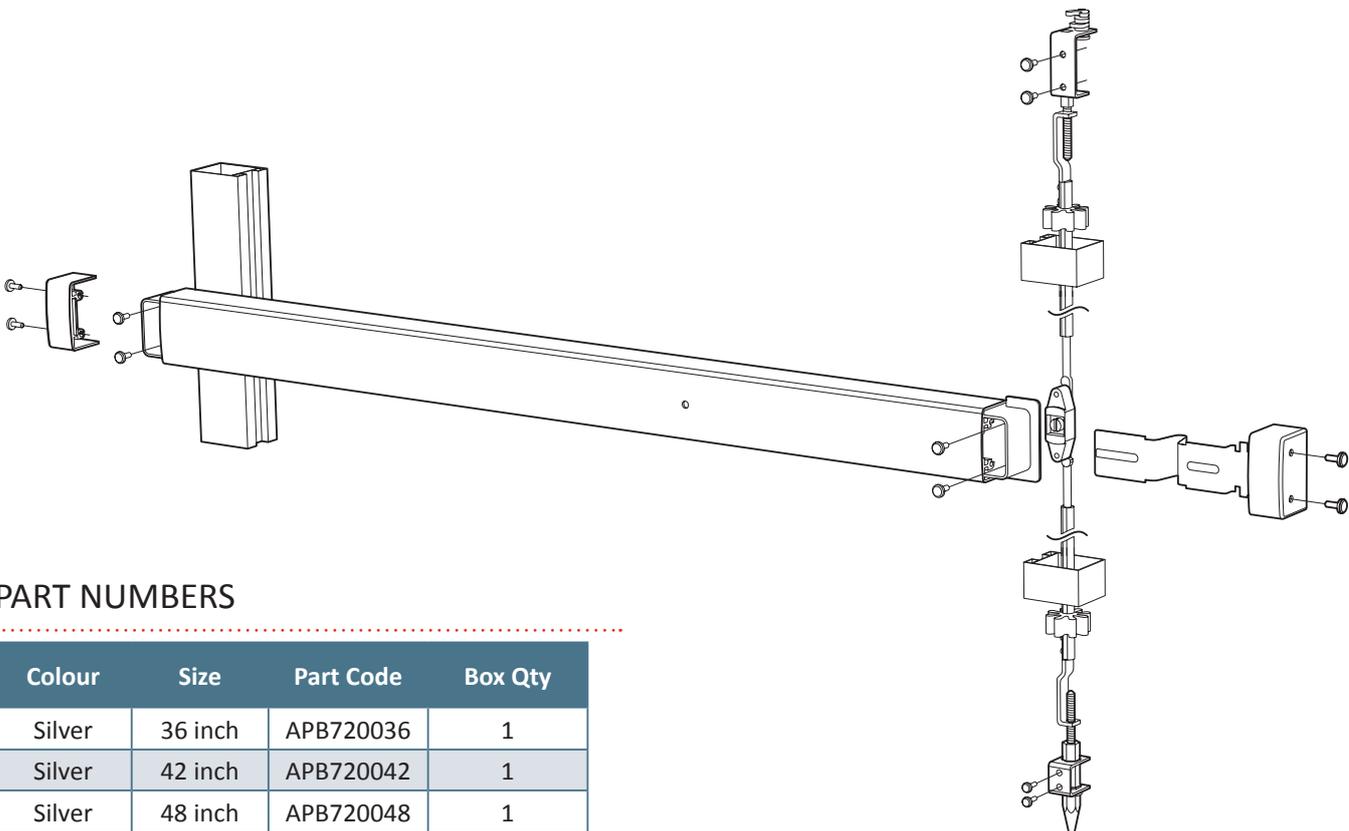

PRODUCT INFORMATION

The Axim PR-7200 is a full width, soft touch non-handed panic exit device with a concealed vertical rod which secures the top and bottom of the door. To open the door, the rods are retracted with a turn of a cylinder key or when the touch bar is locked down with an Allen key (dogged).

- The internal mechanism is manufactured from stainless and plated steel
- 8.5mm diameter steel operating rods provide a 16mm bolt throw
- Optional external key access also available.
- The push bar is extruded aluminium in an anodised finish with coloured alloy end caps to match
- All mounting screws are concealed
- Available in 3 standard widths (36", 42" & 48") which can be cut to size
- BS EN 1125 compliant
- 30 months manufacturer's guarantee

PR-7085 Concealed Rod Panic Bar Exit Device

PRODUCT INFORMATION

The Axim PR Series is a range of concealed vertical rod crash bar panic exit devices which are compliant to BS EN 1125 to give even unfamiliar users a quick and straightforward way to escape a building.

- BS EN 1125 compliant
- Cross bar is made from extruded aluminium in a silver satin finish
- All housings and lever arms are finished in an abrasive resistant finish to compliment the crossbar anodising
- Heavy duty lever springs deliver durable operation of the lever arms
- Standard model suitable for narrow and wide stile doors up to 2135mm high and 1155mm wide
- All fixings are concealed to ensure streamlined looks
- Projection from the door: 120x186mm
- Permanent latch retention by either cylinder key from the outside or concealed pins under the levers
- Non-handed and left- or right-hand paddle handle option
- 30 months manufacturer's guarantee

LH-725 Outside Access Locking Handle

PRODUCT INFORMATION

The Axim LH-7 Series lever handles work with the PR-7085 panic bar exit devices to allow key-lockable access from the outside, with options to suit a range of door stile widths.

- Key controlled
- Spindle length 9mm
- Suitable for round cylinders only
- Levers available to suit 46, 49, 54 & 67mm door stile widths
- 181 x 45mm backplate, handle 133mm
- 172 x 22mm screw centers
- 30 months manufacturer's guarantee
