

ES-2200 Electric Strike

PRODUCT INFORMATION

The Axim ES-2200 series of electric strikes are an ANSI style door release designed to work with most leading brand deadlocking night latch locks. They come complete with stainless-steel short and long faceplates for use in most metal or timber door frame applications. The Axim ES-2200 series are shipped as fail-secure and can be converted to fail-safe mode by the simple removal of a screw. The Axim ES-2200 can also be set to 12V or 24V by simply re-configuring the wires in a different sequence.

- 450kg Holding Force
- Simple fail-safe/fail-secure changeover
- Easy installation
- Can be set to 12/24V AC/DC on site
- AC fail-secure only & DC fail-safe/fail-secure
- Comes with stainless-steel flat design face plates in two sizes:
Short: 124mm x 31.7mm, Long - 201.5mm x 31.7mm
- Simple, effective replacement for most leading brand ANSI electric releases
- Supplied with 250mm of cable
- 10mm, 25mm and 50mm extension lips available
- Power consumption and current draw:
12/24V DC – 300mA, 24/24V DC – 150mA
