

GU UNI-JET D Tilt & Turn Hardware Range

GU UNI-JET tilt & turn gearing works hard for fabricators, fitters and users alike. This flexible, universal system is suitable for most window frame materials and applications and supports both manual and machine-based manufacturing processes.

Renowned German engineering combined with intelligent design and compact packaging means your tilt & turn hardware takes up less space in your stock room, plus it's simple to fit and fine-tune. What's more, ultra-smooth operation, excellent tolerances and advanced corrosion resistance all adds up to fewer call-backs too!

Universal and fitter-friendly

- Options for PVCu, aluminium and timber windows
- Precision-engineered - suitable for manual or automated fabrication
- Single universal central locking system can be adapted to suit all applications
- High-security version available by special order
- Fewer components results in faster fabrication and reduced stock-holding
- 'Cleverle' mushroom cam automatically compensates for clearance tolerances and is easily adjusted with a Torx key
- Smart, space-saving packaging

- Choose from face-fix (GU UNI-JET D) or fully concealed (GU-UNI-JET SC) systems

Enduring practicality

- Super-smooth operation even on large or reinforced windows
- Sash lifter reduces component wear and abuse while ensuring an effortless close action
- Integrated anti-slam device keeps sash in tilt position even in windy conditions
- GU FerGuard silver finish: high-grade corrosion protection salt spray tested to 576 hours
- 10-year mechanical guarantee
